Intellectual Property

All Intellectual Property, as defined below, owned by or which is otherwise the property of Samsung or its respective suppliers relating to the SAMSUNG Phone, including but not limited to, accessories, parts, or software relating there to (the "Phone System"), is proprietary to Samsung and protected under federal laws, state laws, and international treaty provisions. Intellectual Property includes, but is not limited to, inventions (patentable or unpatentable), patents, trade secrets, copyrights, software, computer programs, and related documentation and other works of authorship. You may not infringe or otherwise violate the rights secured by the Intellectual Property. Moreover, you agree that you will not (and will not attempt to) modify, prepare derivative works of, reverse engineer, decompile, disassemble, or otherwise attempt to create source code from the software. No title to or ownership in the Intellectual Property is transferred to you. All applicable rights of the Intellectual Property shall remain with SAMSUNG and its suppliers.

Open Source Software

Some software components of this product incorporate source code covered under GNU General Public License (GPL), GNU Lesser General Public License (LGPL), OpenSSL License, BSD License and other open source licenses. To obtain the source code covered under the open source licenses, please visit:

Disclaimer of Warranties; Exclusion of Liability

EXCEPT AS SET FORTH IN THE EXPRESS WARRANTY CONTAINED ON THE WARRANTY PAGE ENCLOSED WITH THE PRODUCT, THE PURCHASER TAKES THE PRODUCT "AS IS", AND SAMSUNG MAKES NO EXPRESS OR IMPLIED WARRANTY OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT, INCLUDING BUT NOT LIMITED TO THE MERCHANTABILITY OF THE PRODUCT OR ITS FITNESS FOR ANY PARTICULAR PURPOSE OR USE; THE DESIGN, CONDITION OR QUALITY OF THE PRODUCT; THE PERFORMANCE OF THE PRODUCT; THE WORKMANSHIP OF THE PRODUCT OR THE COMPONENTS CONTAINED THEREIN; OR COMPLIANCE OF THE PRODUCT WITH THE REQUIREMENTS OF ANY LAW, RULE, SPECIFICATION OR CONTRACT PERTAINING THERETO. NOTHING CONTAINED IN THE INSTRUCTION MANUAL SHALL BE CONSTRUED TO CREATE AN EXPRESS OR IMPLIED WARRANTY OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT. IN ADDITION, SAMSUNG SHALL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND RESULTING FROM THE PURCHASE OR USE OF THE PRODUCT OR ARISING FROM THE BREACH OF THE EXPRESS WARRANTY, INCLUDING INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES, OR LOSS OF ANTICIPATED PROFITS OR BENEFITS.

Modification of Software

SAMSUNG IS NOT LIABLE FOR PERFORMANCE ISSUES OR INCOMPATIBILITIES CAUSED BY YOUR EDITING OF REGISTRY SETTINGS, OR YOUR MODIFICATION OF OPERATING SYSTEM SOFTWARE.

USING CUSTOM OPERATING SYSTEM SOFTWARE MAY CAUSE YOUR DEVICE AND APPLICATIONS TO WORK IMPROPERLY. YOUR CARRIER MAY NOT PERMIT USERS TO DOWNLOAD CERTAIN SOFTWARE, SUCH AS CUSTOM OS.

IF YOUR CARRIER PROHIBITS THIS, IF YOU ATTEMPT TO DOWNLOAD SOFTWARE ONTO THE DEVICE WITHOUT AUTHORIZATION, YOU WILL BE NOTIFIED ON THE SCREEN THAT UNAUTHORIZED SOFTWARE HAS BEEN DETECTED. YOU SHOULD THEN POWER DOWN THE DEVICE AND CONTACT YOUR CARRIER TO RESTORE THE DEVICE TO THE CARRIER AUTHORIZED SETTINGS.

SAFE™ (Samsung Approved For Enterprise)

SAFE™: "SAFE™" (Samsung for Enterprise) is a mark for a Samsung device which has been tested against Samsung's own internal criteria for interoperability with certain third party security-related solutions for MDM and VPN. The testing includes field testing with local network connection and menu tree testing which tests functionality of the solutions in conjunction with the Samsung device. During the testing, the device is tested with the security solutions to see if the solutions work with the device as described by the third party security solution providers. The testing, for example, includes field testing with local network connection and menu tree testing which tests functionality of the solutions in conjunction with the Samsung device. For more information about Samsung's SAFE™ program, please refer to www.samsung.com/us/safe.

Disclaimer of Warranties: EXCEPT AS OTHERWISE PROVIDED IN THEIR STANDARD END USER LICENSE AND WARRANTY, TO THE FULL EXTENT PERMITTED BY LAW SAMSUNG ELECTRONICS CO., LTD., SAMSUNG TELECOMMUNICATIONS AMERICA, LLC, AND THEIR AFFILIATES (COLLECTIVELY REFERRED TO HEREIN AS THE "SAMSUNG ENTITIES") EXPRESSLY DISCLAIM ANY AND ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, INTEROPERABILITY OR NON-INFRINGEMENT, WITH RESPECT TO INFORMATION TECHNOLOGY SECURITY PROTECTION, SAFE™ DEVICES AND APPLICATIONS TESTED WITH SAFE™ DEVICES. IN NO EVENT SHALL THE SAMSUNG ENTITIES BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES OF ANY KIND WHATSOEVER WITH RESPECT TO INFORMATION TECHNOLOGY SECURITY PROTECTION, SAFE™ DEVICES OR APPLICATIONS TESTED WITH SAFE™ DEVICES. In addition, information technology security protection will be affected by features or functionality associated with, among other things the e-mail platform, master data management, and virtual private network solutions selected by the software provider, solution provider or user. Choice of an e-mail, master data management, and virtual private network solution is at the sole discretion of the software provider, solution provider or user and any associated effect on information technology security protection is solely the responsibility of the software provider, solution provider or user. For complete statement of limited warranty, please refer to www.samsung.com/us/safe, available on the web and where Samsung smartphone and Galaxy Tab™ devices are sold. [101212]

Devices purchased for use on AT&T's system are designed for use exclusively on AT&T's system. You agree that you won't make any modifications to the Equipment or programming to enable the Equipment to operate on any other system. A voice plan is required on all voice-capable devices, unless specifically noted otherwise in the terms governing your agreement. Some devices or plans may require you to subscribe to a data plan.

Your phone is designed to make it easy for you to access a wide variety of content. For your protection, AT&T wants you to be aware that some applications that you enable may involve the location of your phone being shared. For applications available through AT&T, AT&T offers privacy controls that let you decide how an application may use the location of your phone and other phones on your account. However, AT&T's privacy tools do not apply to applications available outside of AT&T. Please review the terms and conditions and the associated privacy policy for each location-based service to learn how location information will be used and protected.

Your phone may be used to access the Internet and to download, and/or purchase goods, applications, and services from AT&T or elsewhere from third parties. AT&T provides tools for you to control access to the Internet and certain Internet content. These controls may not be available for certain devices which bypass AT&T controls.

AT&T may collect certain types of information from your device when you use AT&T services to provide customer support and to improve its services. For more information on AT&T's Privacy Policy, visit http://www.att.com/privacy.

Your phone features earSmart™, an intelligent voice processor that delivers a clear voice experience, allowing you to **hear and be heard**™ in nearly any environment. earSmart technology uses the science of human hearing to distinguish sounds, identify your voice and suppress surrounding noise, for clear conversations just about anywhere.

How Does It Work?

- The earSmart voice processor in your phone captures your voice and all the sounds around you.
- Working like the human ear, it processes and distinguishes these sounds, isolates your voice conversation, and removes background noise - from both ends of a call.
- It also automatically equalizes and adjusts voice volume so you can hear and talk naturally, even in the noisiest places.
- With earSmart technology, you can talk where you want, and have clear conversations for mobile calls, video chats, even speakerphone calls, without worrying about surrounding noise.

Section 10: Samsung Product Registration 209

Index 210

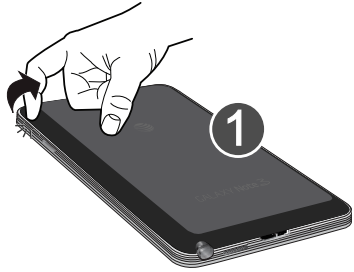
Section 1: Getting Started

This section explains how to start using your phone by first configuring your hardware, activating your service, and then setting up your voice mail.

Setting Up Your Phone

Prior to use it is necessary to install both the battery and SIM into their corresponding internal compartments. The microSD™ card slot is also located in this same internal area.

1. Remove the back cover by inserting a fingernail into the slot on the top of your phone (1).



2. Lift the cover up (2) and to the right of the phone.

Caution! Do not bend or twist the back cover excessively. Doing so may damage the cover.

Installing the SIM Card

When you subscribe to a cellular network, you are provided with a plug-in SIM card loaded with your subscription details, such as your PIN, available optional services, and many others features.

Important! The plug-in SIM card information and its contacts can be easily damaged by scratching or bending, so be careful when handling, inserting, or removing the card. Keep all SIM cards out of reach of small children.

- Carefully slide the SIM card into the SIM card socket (as shown) until the card locks into place.
  - Make sure that the card's gold contacts face into the phone and that the upper-left angled corner of the card is positioned as shown.

Note: If the card is not inserted correctly, the phone will not detect the SIM card. Re-orient the card back into the slot if the SIM is not detected.

Installing the Battery

1. Insert the battery into the opening on the back of the phone, making sure the connectors align (1).
2. Gently press down to secure the battery (2).

Removing and Installing the Memory Card

You can use a microSD™ (SD) or microSDHC™ card to expand available memory space if you desire. This secure digital card enables you to exchange images, music, and

data between SD-compatible devices. This type of memory card is designed for use with this mobile phone and other devices.

Note: Your phone has been tested to support up to a 64GB memory card.

Installing the Memory Card

- Push the microSD card into the slot until it clicks (as shown).
  - Make sure the microSD's gold contact pins face downward and the card is securely inserted.

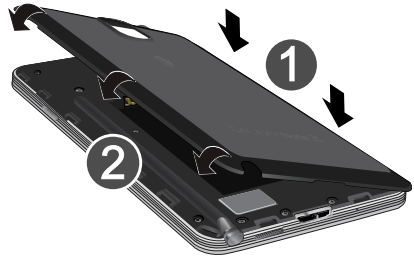
For more information on Memory Cards, see *"Memory Card"* on page 43.

Removing the Memory Card

1. Push on the memory card until it clicks and is released.
2. Grasp the memory card and remove it from the phone.

Installing the Back Cover

1. Place the battery cover onto the back of the phone (1) and press down (2).



2. Press along the edge of the back cover (3) until you have a secure seal.

Note: Make sure the battery is properly installed before switching on the phone.

Charging a Battery

Your device is powered by a rechargeable Li-ion battery. The USB 3.0 Travel Charger that is used to charge the battery, is included with your device. Use only Samsung-approved batteries and chargers.

Note: You must fully charge the battery before using your phone for the first time. A discharged battery recharges fully in approximately 4 hours.

Note: Long backlight settings, searching for service, vibrate mode, web browser use, and other variables may reduce the battery's talk and standby times.

Although you can use the phone while the battery is charging, doing so will require additional charging time.

Using the Travel Charger

Important! Verify that the handset battery is installed prior to connection. If the battery is not properly installed and the wall charger is connected, the handset may power off and on continuously, preventing proper operation.

1. Plug the flat end of the USB 3.0 Travel Charger into the Power/Accessory Interface connector and the other end into the Travel adapter. Plug the Travel adapter into a standard AC wall outlet.
2. When charging is finished, remove the flat end from the interface connector jack on the phone.
3. If you are using the older style USB 2.0 Travel Charger to charge your battery, plug the flat end of the Travel Charger into the port on the right side as shown below.

Note: Connecting the charger improperly may cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.

Note: Failure to unplug the wall charger before you remove the battery, can cause damage to the phone.

Low Battery Indicator

When the battery is weak and only a few minutes of talk time remain, the battery icon ( ) blinks and the device sounds a warning tone at regular intervals. In this condition, your phone conserves its remaining battery power, not by turning off the backlight, but by entering the dimming mode. For a quick check of your battery level, glance at the battery charge indicator located in the upper-right corner of your device's display. Solid color ( ) indicates a full charge .

When the battery level becomes too low, the phone automatically turns off.

Switching the Phone On or Off

1. On the top right side of your phone, press and hold ⏻ until the phone switches on.
2. Swipe your finger across the screen to unlock the phone.

Note: The display language is preset to English at the factory. To change the language, use the Language menu. For more information, refer to *"Changing Your Settings"* on page 85.

---

3. To switch off the phone, press and hold ⏻, until the **Device options** screen displays.
4. Tap **Power off** to switch off the phone.
5. At the **Power off** prompt, tap **OK**.

Locking and Unlocking the Touch Screen

1. When your phone is on, press ⏻ to lock the touch screen and turn off the display.
2. Press ⏻ again to display the lock screen then swipe your finger across the screen to unlock.

Note: Swipe is the default screen locking method. To change your screen lock, see *"Lock Screen Settings"* on page 101.

Warning! Please note that a touch screen responds best to a light touch from the pad of your finger. Using excessive force or a metallic object when pressing on the touch screen may damage the tempered glass surface and void the warranty. For more information, refer to *"Standard Limited Warranty"* on page 233.

Configuring your Phone

When you first turn on your phone, you will need to set up a few things.

1. When you first turn on your phone, the **Let's set up your device!** screen displays.
2. The default language for your phone is English. If you would like to select Spanish, tap **Español** on the bottom right-hand side of the screen.
3. Tap **Terms & Conditions**, read the End User License Agreement for Ready2Go, then tap **Back**.
4. Tap **get started**.

   – or –

   Touch **Remind Later** to configure your phone later. You can access Ready2Go from the Home screen by tapping **Applications** ➔ **AT&T Ready2Go**.
5. Read and follow the instructions on each screen to set up your phone.

Creating a Samsung Account

An active Samsung account is required to begin accessing applications such as ChatON and Samsung Hub. If you did not create a Samsung account when you first set up your phone, follow these steps:

1. From the home screen, tap **Applications** ➔ **Settings** ➔ **General** ➔ **Accounts** ➔ **Add account**.
2. Tap **Samsung account**.
3. Tap **Create new account**.
4. Follow the on-screen instructions to create and activate your account.

Creating a New Google Account

In order to utilize your device to the fullest extent, you will need to create a Google™ Account when you first use your device. With a Google Account, Google applications will always be in sync between your phone and computer.

If you did not create a new account during the setup procedure when you first turned your phone on, follow these steps:

1. From the Home screen, tap → **Gmail**.
   The **Add a Google Account** screen displays.
2. Tap **New** to create a new Google account.
   – or –
   If you already have a Google account, tap **Existing** to sign in and add the account to your phone.
3. Follow the on-screen instructions to add a Google Account.

Note: Once you have created a Google account, you only need to sign in.

Setting Up Your Voice Mail

1. From the Home screen, tap , then tap .
2. Follow the tutorial to create a password, record a greeting, and record your name.

Note: These steps may be different depending on your network.

Accessing Your Voice Mail

1. From the Home screen, tap , then tap .
   You may be prompted to enter a password.
2. When connected, follow the voice prompts from the voice mail center.

Accessing Your Voice Mail From Another Phone

1. Dial your wireless phone number.
2. When you hear your voicemail greeting, press the asterisk key on the phone you are using.
3. Enter your password.

Section 2: Understanding Your Phone

This section outlines some key features of your phone and describes the screen and the icons that appear when the phone is in use.

Features of Your Phone

Your phone is lightweight, easy-to-use and offers many useful features. The following list outlines a few of the features included in your phone.

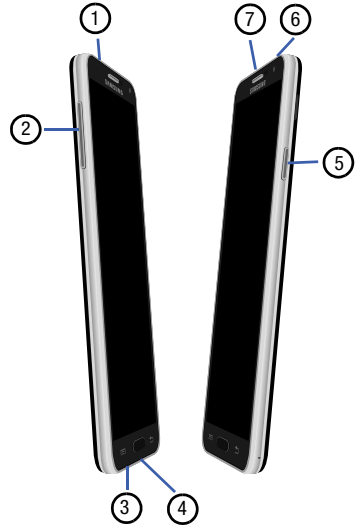
- 4G LTE network with 2.3 GHz quad-core processor
- Android v 4.4.2, KitKat Platform
- Brilliant 5.7" Full HD Super AMOLED® screen (1920 x 1080)
- Touch screen provides quick response to a variety of in-phone menus and options
- Galaxy Gear™ compliant. For more information, please visit: www.samsung.com/us/galaxygearsupport
- Smart Switch™ compliant. For more information, see www.samsungsmartswitch.com
- Ready access to the Internet
- Built-in 4.0 Bluetooth and advanced Wi-Fi® 802.11 a/g/n/ac (HT80) technology
- USB 3.0 Tethering-capable
- Mobile Hotspot capability
- 13 Megapixel camera and camcorder with 2 Megapixel Front Facing camera with Smart Stabilization
- AT&T GPS Navigation functionality provides real-time navigation
- High speed download capability
- Up to 64 GB expandable memory slot
- Corporate and Personal Email
- Sync and update social network applications
- Apps available to download via Google Play Store™
- Access Movies, TV Shows, Music, Games, and Books with Samsung Hub™
- Full Integration of Google Mobile™ Services (Gmail, YouTube, Google Maps, Google Voice Search)
- Multiple Messaging Options: Text/Picture/Video Messaging, and Instant Messaging with Google Hangouts
- Video with Full HD 1080p recording and playback
- Samsung Link to share your media content across DLNA certified devices

Front View of Your Phone

1. **Status light**: displays red when charging or the battery is low, blue when a notification has arrived or you are voice recording, and green when fully charged.
2. **External speaker**: allows you to hear the caller.
3. **Application icons**: you can place shortcuts to your favorite applications on the Home screen.
4. **Primary shortcuts**: allows quick access to important features such as Phone, Contacts, Messaging, Internet, and Apps.
5. **Menu key**: allows you to access sub-menus with additional options for different features and applications such as Home screen, Phone, Contacts, Messages, and Internet.
6. **Home key**: allows you to return to the main Home screen from any Home screen or menu. Press and hold to display Recent apps, Task Manager, and Google Search. Quickly press twice to activate the S Voice application.
7. **Back key**: allows you step backwards when navigating a menu or web page.

8. **Home screen indicator**: shows which Home screen is presently displayed.
9. **Google Quick Search bar**: a shortcut to Google Search that allows you to search for items on the internet.
10. **AccuWeather screen**: displays Time, Day, Date, Temperature and weather conditions for your area.
11. **Indicator icons**: shows the information needed to operate your phone, such as the received signal strength, phone battery level, time, unread Emails, missed calls, etc.
12. **Front facing camera**: allows you to take pictures of yourself when you set the camera shooting mode to Self shot.
13. **Proximity and Light sensors**: uses the ambient light level to make adjustments. If the light path is blocked, for example, when holding the phone close to your ear, the touch screen will turn off.
14. **Gestures Sensor** used to detect Gesture motions.

Side Views of Your Phone



1. **3.5mm Headset jack**: allows you to plug in headphones.
2. **Volume keys**: allow you to adjust the ringer volume while in standby mode or adjust the voice volume during a call. When receiving an incoming call, briefly press down either volume key ( ) to mute the ring tone. Adjusts text size when reading a message.
3. **Microphone**: allows other callers to hear you when you are speaking to them. It is also used for the Speakerphone.
4. **Power/Accessory Interface connector**: allows you to connect a Travel Charger or other optional accessories such as a USB/data cable or a hands-free headset for convenient, hands-free conversations.
5. **Power/Lock key**: (⏻) lets you power your phone on and off. Also allows you to lock or unlock the touch screen. For more information on locking your phone, see *"Locking and Unlocking the Phone"* on page 30.
6. **Infrared Blaster**: Used to emit infrared signals used for controlling external devices.
7. **Microphone**: used for noise cancellation and stereo recording.

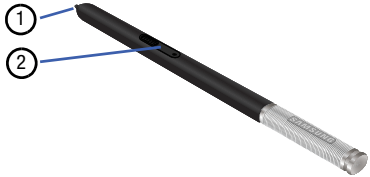
Rear View of Your Phone

1. **Camera lens**: is used to take pictures and shoot videos.
2. **S Pen**: a stylus that assists you in performing different functions.

3. **External speaker**: allows you to hear when the Speakerphone is turned on.
4. **Flash**: is used to provide adequate light when taking pictures in dark places.

S Pen

The S Pen is a stylus that assists you in performing different functions. By using the Pen button, you can minimize having to switch between touch and pen input.



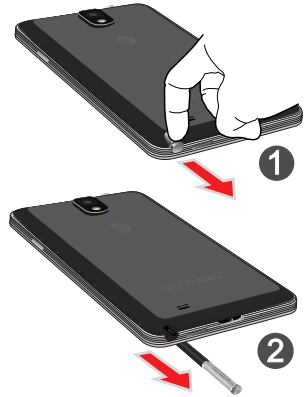
1. **Pen button**: by pressing the Pen button, you can add functionality to the S Pen. For more information, refer to *"Using the S Pen"* on page 19.
2. **Stylus tip**: the tip of the S Pen is used for tapping the screen.

Removing the S Pen from your Phone

The S Pen is stored in your phone to make it easier to keep track of.

To remove the S Pen, follow these steps:

1. Use your fingernail or a sharp object to pull the end of the S Pen out of the phone (1).



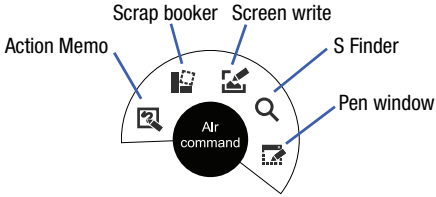
2. Pull the S Pen out of the phone (2).

Using the S Pen

There are several different functions you can perform by using the S Pen.

Air Command Toolbar

Once removed from its slot, S Pen shows an on-screen Air Command button toolbar that allows you to quickly activate frequently used applications or actions.



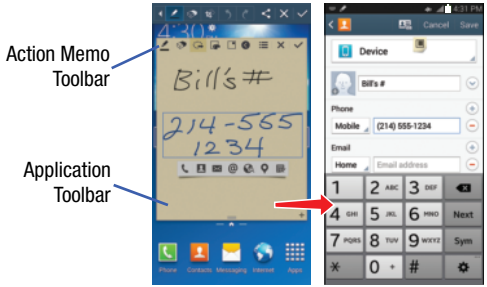
S Pen - Using Action Memo

1. Remove the S Pen from its slot.

   – or –

   Hover over the screen and press the S Pen button.

2. From the Air Command menu, tap (**Action Memo**).
3. Use the on-screen pop up page to enter in text and numbers.
4. Tap (**Link to action**), circle the action memo content, and from the application toolbar, select an available application (such as Contacts).
5. The new content is then copied into your selected application.



S Pen - Using Scrap booker

1. Remove the S Pen from its slot.
2. Navigate to your target medium, such as a Youtube video, document, or image.
3. Hover over the screen and press the S Pen button.
4. From the Air Command menu, select (**Scrap booker**).
5. In a single motion, press and hold the **S Pen button** then quickly draw a freeform enclosed shape on the screen to select the area you want to capture into your Scrapbook.

6. Select the **Scrapbook** option. The image is copied into your clipboard.
7. From the top drop-down menu, select the target scrapbook into which to place the current selection.
8. Enter a memo and tag that can be assigned/attached to your selection.
9. Tap (**Save**) to save your new entry.
10. Tap → **Scrapbook** to access your scrapbook.

S Pen - Using Screen Write

1. Remove the S Pen from its slot.
2. Hover over the screen and press the S Pen button.
3. From the Air Command menu, select (**Screen Write**).
4. The current on-screen elements are shot and then displayed as an editable image.
5. Tap to open the Pen settings menu and adjust the pen color and thickness.
6. Begin to write on the image and tap (**Save**) to store the new image.

   Results are stored in the **My Files** → **All** → **Device storage** → **Pictures** → **Screenshots** folder.

S Pen Using S Finder

1. Remove the S Pen from its slot.
2. Hover over the screen and press the S Pen button.
3. From the Air Command menu, select (**S Finder**) and use the on-screen search tools.

S Pen - Using Pen Window

This feature allows you to draw an on-screen window and then populate the drawn area a target application,

1. Remove the S Pen from its slot.
2. Hover over the screen and press the S Pen button.
3. From the Air Command menu, select (**Pen window**).
4. Locate an on-screen area and use the S Pen to draw out a rectangular shaped window.
5. Select an available application. The desired app then appears within the drawn area.

Pen window

S Pen - Using Smart Clip

Instantly outline and crop images displayed on the screen in any shape to share or paste with Smart Clip. Once desired image is selected, users can freely edit the cropped content, or personalize with their own handwriting.

To take a selective screen capture:

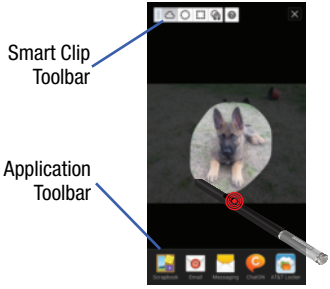
Note: These steps allow you to capture selected areas of a screen based on a freehand area drawn on-screen.

1. Grasp the pen.
2. In a single motion, press and hold the **S Pen button** then quickly draw a freeform enclosed shape on the screen to select the area you want to capture.

Note: The shape you draw must be completed by ending over the same point at which you started. This creates a closed shape.

3. After a second, confirm the newly captured image appears on-screen.

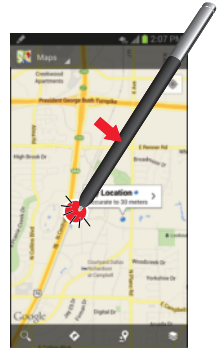
Note: Additional options are available by scrolling left across the bottom of the screen.



4. Select a destination for the newly captured image from the Application Toolbar at the bottom of the screen.

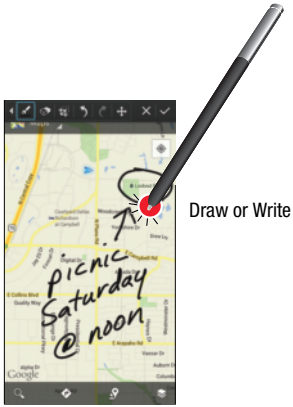
Screen Capture

To take a screen capture, hold the S Pen button and press and hold the S Pen anywhere on the screen. Files are saved in the **Apps** ➔ **My Files** ➔ **All** ➔ **Device storage** ➔ **Pictures** ➔ **Screenshots** folder. You can also find them in your Gallery in the **Screenshots** album.



Write on any Screen after Capture

To write on a screen capture, use the pen to draw or write. Files are saved in the **Apps** ➔ **My Files** ➔ **All** ➔ **Device storage** ➔ **Pictures** ➔ **Screenshots** folder.



Air view

When you hold the S Pen near the screen, a pointer appears on the screen. Move the pointer to files, subjects, or options to preview the contents or view information in pop-up windows.

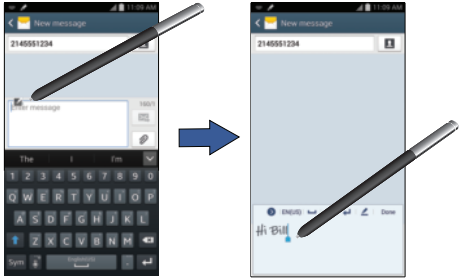
You can scroll through panels or lists by moving the pointer to an edge (top/bottom/left/right) of the screen.

S Pen Input

Instead of using the keyboard, you can use the S Pen Input feature to allow for handwriting input. When the S Pen hovers above a text input area, a Handwriting field is provided. You can use S Pen Input in many functions such as Messages, Email, Dialer, Calculator, Calendar, etc.

In the following example, the S Pen Input feature is used for sending a message.

1. Hover the S Pen over the area you would like to write on.
2. Tap the icon with the S Pen.
3. Use the S Pen to write.



Air Button

The S Pen displays a menu via the Air Button interaction for different applicable contents.

1. Remove the S Pen from its slot.
2. Launch an application that contains an attachment or selection field such as:
   - Attachment button within Messages or Email: provides a list of the most recently used
   - Recipient selector within Messages or Email
   - Enter message filed within Messages
3. Press and hold the S Pen button to reveal some of your most used items, contents, or text strings.
4. Make a selection.

Display Layout

Your display screen provides a wealth of information about the phone's status and options, as well as providing access to application icons. For more information, refer to *"Front View of Your Phone"* on page 15.

Indicator Icons

This list identifies the symbols you'll see on your phone's display and Indicator area:

Displays your current signal strength. The greater the number of bars, the stronger the signal.

Indicates that the Airplane Mode is active. You cannot send or receive any calls or access online information.

Displays when there is no SIM card in the phone.

Displays when there is no network available.

Displays when your phone is in Blocking mode.

Displays when there is a system error or alert.

Displays when the S pen has been removed from the phone.

Displays when a call is in progress.

Displays when a call is on hold.

Displays when the speakerphone is on.

Displays when a call has been missed.

Displays when a call has been muted.

Displays when Call forwarding is set to Always forward. For more information, refer to *"Call Settings"* on page 107.

Displays your battery charge level. Icon shown is fully charged.

Displays when your battery is charging. Also displays battery charge level.

Device Power Low – Shows your current battery charge level.

Device Power Critical – Shows your current battery only has less than 5 percent power remaining and will immediately shutdown.

Displays when your connection to an EDGE network is active.

Displays when your phone is communicating with the EDGE network.

Displays when your connection to a UTMS, HSDPA, HSPA, or HSPA+ network is active.

Displays when your phone is communicating with the UTMS, HSDPA, HSPA, or HSPA+ network.

Displays when your connection to a 4G LTE network is active.

Displays when your phone is communicating with the 4G LTE network.

Displays when your phone is downloading or has downloaded a file. It will blink green when it is installing.

Displays when the an outbound file transfer is in progress.

Displays when a Play Store download has completed.

Displays when updates are available for download.

Displays when the phone is connected to a computer via a supported USB 2.0 cable connection.

Displays when the phone is connected to a computer via a supported USB 3.0 cable connection.

Displays when the phone is tethered via a supported USB cable connection.

Displays when a new text or multimedia message is received.

Displays when a new voice mail is received.

Displays when Email is received.

Displays when the time and date for a Calendar Event has arrived. For more information, refer to *"Calendar"* on page 170.

Displays when you set an alarm to ring at a specified time. For more information, refer to *"Alarm"* on page 172.

Displays when the Sound profile is set to Mute.

Displays when the Sound profile is set to Vibrate.

Displays when Bluetooth is activated.

Displays when a Bluetooth device has been paired with the phone.

Displays when Wi-Fi is connected, active, and communicating with a Wireless Access Point (WAP).

Displays when Wi-Fi is active but there is a communication issue with the target Wireless Access Point (WAP).

Displays when Wi-Fi Direct is active and your phone is connected to another device.

Displays when your phone as been configured as a portable Wi-Fi hotspot.

Displays when your device is currently sharing/ streaming media to a paired device using the Samsung Link application.

Displays when GPS is active and acquiring a signal.

Displays when data synchronization and application sync is active and synchronization is in progress for Gmail, Calendar, and Contacts.

Displays when your phone is connecting to the Device Management server when you first turn on your phone.

Displays when your device is connected being used to control streaming media and is connected to a Digital Living Network Alliance (DLNA) certified device using the Samsung Link application.

Displays when TTY device has been inserted.

Displays when a screen capture has been taken.

Displays when the keypad is active.

For more details on configuring your phone's settings, see *"Changing Your Settings"* on page 85.

Google Search Bar

The Google Search Bar provides you an on-screen Internet search engine powered by Google™.

1. From the main home screen, tap the Google Search bar

.
2. Use the on-screen keypad to enter the item you want to search for, then tap .
3. Tap to use Google Voice Search. Follow the on-screen instructions.

Menu Navigation

You can tailor the phone's range of functions to fit your needs using both menus and widgets. Menus, sub-menus, and features can be accessed by scrolling through the available on-screen menus. Your phone originally has three home screens but you can expand up to seven home screens.

Command Keys

Menu Key

Press **Menu** to display a context-sensitive menu of options for the current screen or feature.

Home Key

Press **Home** to display the main Home screen. Press and hold to display recently used apps and access the Task manager.

Back Key

Press **Back** to return to the previous screen, option or step.

Terms used in this user manual

Tap

Lightly touch items to select or launch them. For example:

- Tap the on screen keyboard to enter characters or text.
- Tap a menu item to select it.
- Tap an application's icon to launch the application.

Touch and Hold

Activate on-screen items by a touch and hold gesture. For example:

- Touch and hold a widget on the home screen to move it.
- Touch and hold on a field to display a pop-up menu of options.

Swipe and Palm Swipe

To swipe, lightly drag your finger vertically or horizontally across the screen. Use swipe when:

- Unlocking the screen
- Scrolling through the Home screen or a menu

To palm swipe, swipe the side of your hand horizontally across the screen. Use palm swipe when:

- Capturing the screen

Panning

To pan, touch and hold a selected icon, then move the device to the left or right to reposition it to another page. You must first activate Motion on your device. Use panning to:

- Move icons on your Home screens or Application Menus to another page.

Tilt

To activate the tilt feature, press and hold two points on the screen then tilt the device back and forth to reduce or enlarge the screen. Use tilt to:

- Reduce or enlarge the screen in the Gallery or Browser.

Turn over

Turn your phone over so that the screen faces downward. For example:

- Mute incoming calls and playing sounds by turning your phone over.

Using Gestures

By activating the various gesture features within the Motion Settings menu, you can access a variety of time saving functions.

To activate motion:

1. From the Home screen, press and then tap **Settings** →

Controls → **Motions**.
2. Tap the ON/OFF icon

located at the top of the screen to activate motions.
3. Tap the ON/OFF icon

located to the right of each motion option to activate it.

Caution! Excessive shaking or impact to the device may cause unintended results.

The following is a description of the available gestures:

- **Direct call**: Once enabled, the device will dial the currently displayed on-screen Contact entry as soon as you place the device to your ear.
- **Smart alert**: Once enabled, pickup the device to be alerted and notified of you have missed any calls or messages.
- **Zoom**: Once enabled, you must be on a screen where content can be zoomed. In a single motion, touch and hold two points on the display then tilt the tilt the device back and forth to zoom in or out.
- **Browse an image**: Once enabled, touch and hold a desired on-screen image to pan around it. Move the device left or right to pan horizontally or up and down to pan vertically around the large on-screen image.
- **Mute/pause**: Once enabled, mute incoming calls and any playing sounds by turning the device display down on a surface. This is the opposite of the Pickup to be Notified Gesture.

For more information, refer to *"Motions and Gestures"* on page 122.

Locking and Unlocking the Phone

To unlock your phone:

1. Press the lock button located on the upper right side of your phone.
2. The lock screen will display with **Swipe screen to unlock** displayed at the bottom of the screen.
3. Swipe the touch screen in any direction.
4. The Home screen will display.

Note: There are several additional ways you can lock your screen. For more information, refer to *"Lock Screen Settings"* on page 101.

Navigating Through the Home Screens

Your phone originally has three home screens but you can expand up to seven home screens. If you like, you can place different applications on each of the home screens.

- From the main Home screen, sweep the screen with your finger in either direction. The main Home Screen is located in the middle with a Home screen on each side.

Navigating Through the Application Menus

Your phone initially has one Application Menu available. As you add apps, additional screens will be automatically created. Follow these steps to navigate through the Application Menus:

1. At the Home screen, tap . The first application menu will be displayed.
2. If you have additional application menus, sweep the screen left or right to access them.
3. Tap one of the application icons.

Note: As you add applications, the number of Application menus that you have available will increase.

Navigating Using Sub-Menus

Sub-menus are available when you are at any Home screen or have selected a feature or application such as Phone, Contacts, Messages, or Internet.

To access a sub-menu:

1. Press .

   A sub-menu will appear at the bottom of the phone screen.
2. Tap an option.

Note: Not all screens will have sub-menus available.

Accessing Recently-Used Apps

1. Press and hold from any screen to open the recently-used applications window.
2. Tap an icon to open the selected application.

   – or –

   Tap to go to the Task manager.

   – or –

   Tap to go to Google Search.

   – or –

   Tap to delete the record of all recently used applications.

Using the Multi Window

This feature allows you to run multiple applications on the current screen at the same time.

Note: Only applications found within the Multi window panel can be active atop another current application on the screen.
When launching applications that contain multimedia files (music/video), audio from both files will be played simultaneously.

Activating and Deactivating Multi window

There are two different ways you can activate and deactivate the Multi window feature:

To activate Multi window via the Notification screen:

1. In a single motion, touch the Status bar to reveal the Notifications tab, and then drag it to the bottom of the screen to open the Notifications screen.
2. Swipe the row of icons to the left until the Multi window icon is displayed.
3. Tap the **Multi window** entry to activate the feature. The icon turns green when active.
4. Tap **Home** to return to the Home screen.
5. Tap the tab to open the application panel showing all the available Multi window apps.

Note: Once you have turned the Multi window option on in step 3, you only need to press and hold the **Back** key ( ) to re-activate the Multi window feature.

To activate Multi window via the Settings menu:

1. From the Home screen, tap → **Settings** → Device → **Multi window**.
2. Tap the ON/OFF slider, located to the right of the Multi window field, to turn the feature on ON.
3. Tap **Home** to return to the Home screen.
4. Tap the tab to open the application panel showing all the available Multi window apps.

To deactivate Multi window:

- Press and hold the **Back** key ( ). This action hides the Multi window tab from view.

Repositioning the Multi Window

The Multi window contains two components: tab and apps panel. The tab can be manually moved across the screen. The apps panel (containing the scrollable apps) can be relocated to lock onto the left or right sides of the screen.

To move the tab:

1. Activate the Multi window feature.
2. In a single motion, touch and hold the tab for approximately one-second, then slowly drag it to its new location **along the current** screen edge.

Note: This is a quick way to get the tab out of the way if you can't get to a button or option behind it.

To relocate the Multi window apps panel:

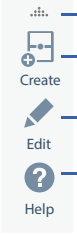
1. Activate the Multi window feature.
2. Tap the tab to display the apps panel (containing the scrollable apps).
3. In a single motion, touch and hold the tab for approximately one-second to detach it from the screen, then slowly drag it to its new location along the left or right screen edge.

Customizing the Multi Window apps

The applications found within the apps panel of the Multi window can be organized by either being rearranged or removed.

To rearrange the Multi window applications:

1. Activate the Multi window feature.
2. Tap the tab to display the apps panel (containing the scrollable apps).
3. In a single motion, touch and hold a desired app until it detaches from the panel, then carefully drag it to a new location in the list of apps. Lift your finger or stylus off the screen to let go of the app and drop it into its new location.



More - access to additional functions

Create - create a user-defined custom Multi window (presets)

Edit - edit the available Multi window apps

Help - access to Help information

To edit a Multi window application:

1. Activate the Multi window feature.
2. Tap the tab to display the apps panel (containing the scrollable apps).
3. Tap (**More**) ➔ (**Edit**) (located at the bottom of the list) to reveal a staging area (on the right) that can house any removed applications from the Multi window panel.
4. In a single motion, touch and hold a desired app until it detaches from the Multi window panel, then carefully drag it to the right to the staging area to remove it.

To restore a Multi window application:

1. Activate the Multi window feature.
2. Tap the tab to display the apps panel (containing the scrollable apps).
3. Tap (**More**) ➔ (**Edit**) located at the bottom of the list) to reveal the staging area containing any previously removed apps.
4. Locate the desired application.
5. In a single motion, touch and hold a desired app until it detaches from the staging area, then carefully drag it to a new location in the current list of apps on the Multi window panel.

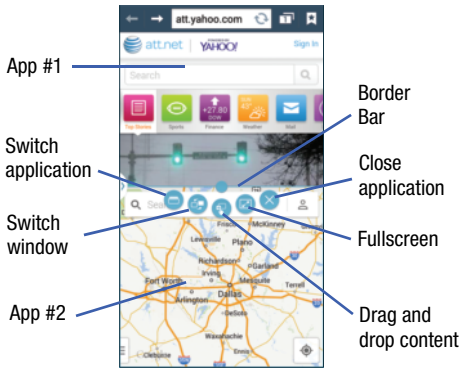
Using Multi Window to run multiple apps on the same screen

Any of the apps found within the Multi window panel can be run at the same time as a current on-screen app.

Once multiple apps are running on the same screen, you can then choose to either swap their positions or maximize a desired app.

Note: Only applications found within the Multi-window panel can be active atop another current application on the screen.

When launching applications that contain multimedia files (music/video), audio from both files will be played simultaneously.



In this example we will be launching both the Internet and Maps applications.

1. Launch an application such as Internet.
2. Activate the Multi window feature.
3. Tap the tab to display the apps panel.
4. Touch and hold the desired app, such as Maps, until it detaches from the panel.
5. In a single motion, drag it over the current app and drop the new Multi window app over either the top or bottom area of the current on-screen app.

Note: Once two applications are running, the device displays a split screen view containing both the initial app and the new Multi window app. Each application is still independent of the other.

To switch applications:

1. Tap the desired application area (top or bottom) that you would like to switch out with another application.
2. With the two applications shown in a split screen, tap the Border button to show the on-screen functions.
3. Locate and tap **Switch application**.

4. Scroll through the list of applications you already have open and tap the one you wish.

   The new application replaces the old one.

To switch windows: (swap the locations)

1. Tap the desired application area (top or bottom).
2. With the two applications shown in a split screen, tap the Border button to show the on-screen functions.
3. Locate and tap **Switch window**. The location of the current apps are switched.

To drag and drop content:

You can drag and drop text and images in selected applications.

1. With the two applications shown in a split screen, tap one of the two on-screen apps to select it.
2. Tap the Border bar to show the on-screen icons.
3. Locate and tap **Drag and drop content**.
4. Drag text or images from one app and drop them in the other app.
5. If an application does not support Drag and drop, then **Not supported** is displayed.

To close a selected application:

1. With the two applications shown in a split screen, tap one of the two on-screen apps to select it.
2. Tap the Border bar to show the on-screen icons.
3. Locate and tap **Close application**. The current app is closed and the remaining app is maximized.

To increase the size of a desired application window:

1. With the two applications shown in a split screen, locate the Border bar indicating the edge of the app window.
2. In a single motion, touch and hold the Border bar then drag it to resize the desired window.

Creating a Customized Multi Window Preset

1. Arrange the Multi window view as desired (app location, high of windows, etc.)
1. Once configured, tap (**More**) ➔ (**Create**).
2. Use the on-screen keyboard to name the new preset of paired windows.

3. Tap **OK**. The new preset then appears at the top of the Multi window list of apps.

Customizing Your Home Screen

You can customize your Home screen by doing the following:

- Creating Shortcuts
- Adding and Removing Widgets on the Home Screen
- Repositioning Widgets
- Creating Folders
- Changing the Wallpaper
- Adding and Deleting Home Screens

Creating Shortcuts

Shortcuts are different than the current Home screen Widgets that only launch an application. Shortcuts activate a feature, action, or launch an application.

Note: To move a shortcut from one screen to another, it must first be deleted from its current screen. Navigate to the new screen, then add the shortcut.

Adding a shortcut from the Apps Menu

1. Press to activate the main Home screen.
2. Navigate to the desired Home Page.
3. Tap to display your current applications.
4. Scroll through the list and locate your desired application.
5. Touch and hold the application icon. This creates an immediate shortcut of the selected icon and closes the **Apps** tab.
6. While still holding the on-screen icon, position it on the current page. Once complete, release the screen to lock the new shortcut into its new position on the current screen.

Adding a shortcut via the Add to Home screen

1. Press to activate the main Home screen.
2. Navigate to the desired Home Page.
3. Touch and hold on an empty area of the Home screen.
4. Tap **Apps and widgets**, **Folder**, or **Page**.
5. Press and hold a shortcut from the available list and position it on the current screen.

Deleting a shortcut

1. Press ⬭ to activate the main Home screen.
2. Navigate to the desired Home Page.
3. Touch and hold the desired shortcut. This unlocks it from its location on the current screen.
4. Drag the icon over the **Remove** icon and release it.

   As you place the shortcut into the Trash, both items turn red.

Note: This action does not delete the shortcut, it just removes it from the current screen.

Adding and Removing Primary Shortcuts

You can change any of your primary shortcuts with the exception of the **Apps** shortcut. The Primary Shortcuts that display on your Home screen by default, are Phone, Contacts, Messaging, Internet, and Apps.

1. Press ⬭ to activate the main Home screen.
2. Touch and hold the primary shortcut you want to replace, then drag it to an empty space on any Home screen.
3. Scroll through the App menu to find the shortcut you want to add as the new primary short cut.
4. Touch and hold the new shortcut, then drag it to the empty space in the row of primary shortcuts.

   The new primary shortcut will now appear on all Home screens.

Adding and Removing Widgets

Widgets are self-contained applications that reside in either your Widgets tab or on the main or extended Home screens. Unlike a shortcut, the Widget appears as an on-screen application.

Adding a Widget

1. Press ⬭ to activate the main Home screen.
2. Navigate to the desired Home Page.
3. Touch and hold on an empty area of the screen.
4. Tap **Apps and Widgets**.
5. Tap the **Widgets** tab at the top of the screen.
6. Press and hold an available Widget to position it on the current screen, then release the Widget.

Removing a Widget

1. Touch and hold a Widget until you can move it around on the screen.
2. Drag the Widget over the **Remove** icon and release it.

   As you place the Widget into the Trash, both items turn red.

Note: This action does not actually delete the Widget, it just removes it from the current Home screen.

Moving Icons in the Apps Menu

1. Press to activate the main Home screen.
2. Tap to display your current applications.
3. Tap the **Apps** tab at the top of the screen if it is not already selected.
4. Press and tap **View type**.
5. Tap **Customizable grid**. A green circle will appear next to the option.
6. Press and tap **Edit**.
7. Scroll through the list and locate the icon you wish to move.
8. Touch and drag the icon to the position that you want. To move to a different page, drag the icon to the edge of the page until the page scrolls to the desired page.
9. Tap **Save**.
10. Press to return to the Home screen.

Creating Application Folders

You can create application folders to hold similar applications if you wish.

To create a folder follow these steps:

1. Press to activate the main Home screen.
2. Tap to display your current applications.
3. Tap the **Apps** tab at the top of the screen if it is not already selected.
4. Press and tap **Edit**.
5. Touch and hold the first application that you would like to move to a folder.
6. Drag the icon down to the **Create folder** icon.
7. Enter a folder name and tap **OK**.

A folder is displayed in the original place of the application icon with the application icon displayed on top of it. You can now drag other Apps into the folder.

8. To view information on an App, drag the App icon up to the App info icon to view information on the application.
9. Tap **Save**.

Adding a New Page to the Application Menu

You can add a new page to your application menu by following these steps:

1. Press to activate the main Home screen.
2. Tap to display your current applications.
3. Tap the **Apps** tab at the top of the screen if it is not already selected.
4. Press and tap **Edit**.
5. Touch and hold the first application that you would like to move to a new page.
6. Drag the icon down to the **Create page** icon.
7. Tap **Save**.

   The app will appear on a new page.

Changing the Wallpaper

You can change the Wallpaper (background) of your home screens by following these steps:

1. From any Home screen, touch and hold on an empty area of the screen.

   The **Home screen** window is displayed.
2. Tap **Set wallpaper**.
3. Select the location where you would like to change the wallpaper. Tap **Home screen**, **Lock screen**, or **Home and lock screens**.
4. Tap one of the following options:
   - **Gallery**: select a wallpaper from photographs you have taken with your camera.
   - **Live wallpapers**: select an animated wallpaper. This option is not available for the Lock screen option.
   - **Photos**: select a photo from your Gallery. This option is only available for the Home screen option.
   - **Wallpapers**: select from many still-life wallpapers.
   - **Travel wallpaper**: select to have recommended destinations displayed. This option is only available for the Lock screen option.

5. Select a wallpaper and tap **Set wallpaper**, **Done**, or **Cancel**.

Adding and Deleting Home Screens

You can add and delete Home screens. You can have up to seven Home screens.

To add a new Home screen:

1. Press [Home] to activate the main Home screen.
2. Press [Menu] and tap **Edit page**.
3. Tap the Home screen that contains [+].

   A new screen is added.
4. If desired, touch and hold the new screen and drag it to a different location.
5. Press [Home] to return to the main Home screen.

   You can now add items to your new Home screen.

To delete a Home screen:

1. Press [Home] to activate the main Home screen.
2. Press [Menu] and tap **Edit page**.
3. Touch and hold the Home screen you want to delete.
4. Drag the Widget over the **Remove** icon [Remove] and release it. The page will turn red.
5. If there are items on the Home screen that you want to delete, the **Remove home screen page** prompt is displayed.
6. Tap **OK** to delete the page and its contents, otherwise tap **Cancel**.
7. Press [Home] to return to the main Home screen.

Moving Home Screens

You can arrange your Home screens in any order that you want.

To move a Home screen, follow these steps:

1. Press [Home] to activate the main Home screen.
2. Press [Menu] and tap **Edit page**.
3. Touch and hold the Home screen you want to move.
4. Drag it to the location that you would like to place it.

   In this example, the Dual clock app screen is moved to the last position.

   When you move a Home screen, the other Home screens are be re-ordered automatically.
5. Press [Home] to return to the main Home screen.

Notification Panel

The Notification Panel includes a pull-down list to show information about processes that are running, recent notifications, and alerts. To display the Status indicator:

- On the Home screen, touch and hold the top of the screen until the pull-down displays, then drag down vertically.

Clearing Notifications

To clear all notifications from the Notification Panel:

1. From the Home screen, touch and hold the top of the screen until the pull-down displays, then drag down vertically.
2. Tap the **Clear** button.

   The notifications are cleared and the panel closes.

Accessing Additional Panel Functions

In addition to notifications, the Notification Panel also provides quick and ready access to separate device functions. These can be quickly activated or deactivated by toggling them on or off. You can choose the functions that will be displayed.

1. From the notification Panel, tap to display additional options.

   The following functions (default) are located in the top two rows and can either be activated (green) or deactivated (gray): Wi-Fi, GPS, Sound, Screen rotation, Bluetooth, Reading mode, Blocking mode, Power saving, Multi window, and Screen Mirroring.
2. Tap then locate the Notifications panel area located at the bottom of the Notifications panel screen.
3. In a single motion, touch and hold a desired function from the bottom two rows and then drag it to the top two rows. Additional functions are S Beam, NFC, Air view, Air gesture, Hands-free mode, Smart stay, Smart pause, Smart scroll, Sync, and Airplane mode.

4. Tap **Brightness adjustment** to create a checkmark if you want to be able to adjust the screen brightness via the Notification panel.
5. Tap and then tap to display only your primary functions.

Memory Card

Your device lets you use a microSD™ (SD) or microSDHC™ card to expand available memory space. This secure digital card enables you to exchange images, music, and data between SD-compatible devices. This section addresses the features and options of your device's SD functionality. The device has a USB SD card mode.

Mounting the SD Card

To store additional photos, music, videos, and other applications, you must mount (install) the SD card prior to use. Mounting the SD card establishes a USB connection with your computer.

1. Insert the SD card into the external, SD card slot. For more information, refer to *"Removing and Installing the Memory Card"* on page 7.
2. Your SD card is scanned to see the available information on it.

Unmounting the SD card

Unmounting the SD card prevents corruption and damage to the SD card while removing it from the slot.

1. From the Home screen, tap → **Settings** → **General** → **Storage**.
2. Scroll to the bottom of the display and tap **Unmount SD card**.
3. Tap **OK**.

   For more information, refer to *"Removing and Installing the Memory Card"* on page 7.

SD card Available Memory Status

To view the memory allocation for your external SD card:

1. From the Home screen, tap → **Settings** → **General** → **Storage**.
2. The available memory for Device and SD card displays under the **Total space** and **Available space** headings.

Erasing Files from the SD card

You can erase files from the SD card using the phone.

1. Ensure the SD card is mounted. For more information, refer to *"Mounting the SD Card"* on page 43.
1. From the Home screen, tap ➔ **Settings** ➔

General ➔ **Storage**.
2. Tap **Format SD card**.
3. At the **Format SD card** confirmation prompt, tap **Format SD card**.

Warning! Performing the next step erases all data stored on the SD card.

4. Tap **Delete all** to format or press ⮌ to cancel.

Entering Text

This section describes how to select the desired text input method when entering characters into your phone. This section also describes the predictive text entry system that reduces the amount of key strokes associated with entering text.

Your phone comes equipped with an orientation detector that can tell if the phone is being held in an upright (Portrait) or sideways (Landscape) orientation. This is useful when entering text.

Keyboards and Input Methods

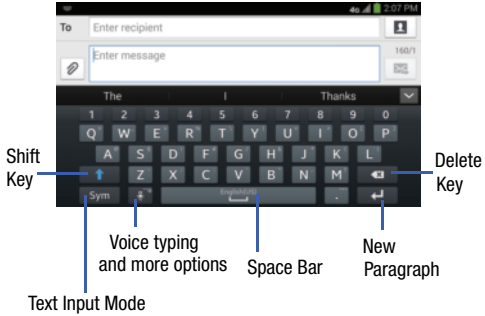
There are three text input methods available:

- **Samsung keyboard (default)**: Samsung's on-screen QWERTY keypad that can be used in both portrait and landscape orientation.
- **Swype**: a new way to enter text on touch screens. Instead of tapping each key, use your finger to trace over each letter of a word.
- **Google voice typing**: allows you to enter text by speaking.

To change the input method, see *"Keyboards and Input Methods"* on page 114.

Entering Text Using the Samsung Keyboard

From a screen where you can enter text, rotate your phone counterclockwise to a Landscape orientation. The on-screen QWERTY keypad will display.



Changing the Text Input Mode - Keypad

There are two main keypad layout keys that will change the on-screen keys within the QWERTY keypad.

The available Text Input modes are: **Sym** and **Abc**.

Sym **Symbol/Numeric Mode**: activates the number, symbol, and emoticon keys.

ABC **ABC Mode**: activates the default alphabet keys. Can also be set to **Abc** or **abc** by using the shift ( ) key.

Note: When in **Abc** mode, the **Sym** button will appear. When in **Sym** mode, the **Abc**/**ABC**/**abc** button will appear.

Using ABC Mode

1. If desired, rotate your phone counterclockwise to a Landscape orientation.
2. When you tap the **Enter message** field, the following screen displays:
3. Tap the desired alphabetic characters.

4. The screen initially opens in ABC mode. After typing the first letter, the shift key ( ) will change to and following letters will be lowercase.
5. Tap to input another upper-case letter or tap twice to switch to caps lock mode. The shift key will change to in caps lock mode. All following letters will be uppercase until you tap the shift key again.

Using Symbol/Numeric Mode

Use Symbol/Numeric Mode to add numbers, symbols, or emoticons.

1. Rotate your phone counterclockwise to a Landscape orientation.
2. Tap Sym at the bottom of the screen.
3. Tap the desired number, symbol, or emoticon characters.
4. Tap the 1/2 button to access additional symbols.
5. Tap ABC to return to Abc mode.

Predictive Text

By using the Predictive Text option, you can have next-letter prediction and regional error correction, which compensates for pressing the wrong keys on the QWERTY keyboard. Predictive text is turned on by default.

1. Press and hold on the keyboard, then tap .
2. Tap the ON/OFF slider, located to the right of the **Predictive text** field, to ON, then tap .
3. In the text portion of the message screen, begin typing a word. A list of word options is displayed above the keyboard. Tap one of the words to replace the word that has already been typed or scroll the line of words to the left for more word choices.
4. Continue typing your message. Tap to send the message or press for more options. For more information, refer to *"Creating and Sending Messages"* on page 142.

Note: You can also use Predictive Text mode in the portrait orientation.

Entering Text Using Handwriting

You can enter text simply by using your finger to handwrite letters on your screen.

1. Press and hold on the keyboard, then tap .
2. Use your finger tip to write out each character. You can print or use cursive.
3. You can write out your entire message using the Handwriting feature or tap to switch back to Samsung keyboard mode.

Samsung Keyboard Settings

For information on how you can configure your Samsung keyboard settings, see *"Samsung Keyboard settings"* on page 114.

Using the Google Voice Typing Feature

You can use your voice to enter text using the Google Voice typing feature.

1. From the keypad, touch the top of the screen and drag it down to display your notification panel.
2. Tap **Select input method**.
3. Tap **Google voice typing**.
4. At the **Speak now** prompt, speak clearly and distinctly into the microphone.
5. If the red microphone turns gray, then the feature has timed out and you should tap the microphone icon to start again.

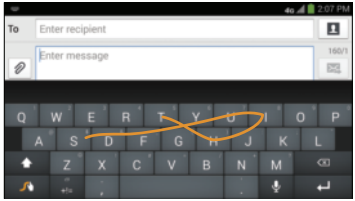
   The text is displayed in the message as you are speaking.

Note: The feature works best when you break your message down into smaller segments.

Entering Text Using Swype

Swype™ is a text input method that allows you to enter a word by sliding your finger or stylus from letter to letter, lifting your finger between words. Swype uses error correcting algorithms and a language model to predict the next word. Swype also includes a tapping predictive text system.

The following example shows how to enter the word "This". Put your finger down on the "T", and without lifting, glide it to the "h", then to the "i" then over to the "s".



Enabling and Configuring Swype

The Samsung keyboard is the default text input method, so to use Swype, you must first change the default keyboard setting.

To enable Swype:

1. From a screen where you can enter text, touch and drag down from the Notifications area then tap **Select input method**.
2. Tap the **Swype** radio button. It will turn green.

   The Swype keyboard is displayed.

Swype Settings

For information on how you can configure your Swype settings, see *"Swype Keypad Settings"* on page 116.

Swype Text Entry Tips

You may find the following Swype text entry tips helpful:

- Create a squiggle (like an S shape) to create a double letter (such as pp in apple).
- Touch and hold a key to view the punctuation menu then make a selection.
- Move your finger or stylus over the apostrophe to enter contractions.
- Double-tap on the word you want to change to correct a misspelled word, then tap the delete key to erase one character. Touch and hold the delete key to erase an entire word.

Section 3: Call Functions

This section describes how to make or answer a call. It also includes the features and functionality associated with making or answering a call.

Displaying Your Phone Number

- Tap ➔ **Settings** ➔

General ➔ **About device** ➔ **Status**. Your phone number is displayed in the **My phone number** field.

Making a Call

1. From the Home screen, tap and use the on-screen keypad to enter the number you wish to dial.
2. Tap to make the call.

Note: When you activate the **Auto redial** option in the Voice Call menu, the phone will automatically redial up to 10 times when the person does not answer the call or is already on the phone. For more information, refer to *"Call Settings"* on page 60.

Making an International Call

1. From the Home screen, tap , then touch and hold

. The **+** character appears.
2. Use the on-screen keypad to enter the country code, area code, and phone number.
   - If you make a mistake, tap until the desired numbers have been deleted.
3. Tap to make the call.

Manual Pause Dialing

To manually call a number with pause(s) without storing it in your Contacts list:

1. From the Home screen, tap and use the on-screen keypad to enter the phone number.
2. Press to display the dialer sub-menu.
3. Tap **Add 3-sec pause** to add a three second pause, and use the keypad to enter the additional numbers.

Tip: You can create pauses longer than three seconds by entering multiple three second pauses.

4. Select **Add wait** to add a wait. A wait will pause the calling sequence until you enter a number or press a key.
5. Tap to make the call.

For more information, refer to *"Adding Pauses to Contact Numbers"* on page 63.

Correcting an Entered Number

Use the following steps to correct a mis-typed entry when dialing.

- After entering a number using the keypad:
  - If you make a mistake, tap to erase a single character.
  - Press and hold to erase the entire string of numbers.

Ending a Call

- Tap the key.

Dialing a Recent Number

All incoming, outgoing and missed calls are recorded in the **Call log**. If the number or caller is listed in your Address Book, the associated name is also displayed.

1. From the Home screen, tap .
2. Tap the **Logs** tab.

   A list of recent calls is displayed.
3. Tap the desired Contact to enter the **Details** page, then tap to make a call.

Making Emergency Calls

If you do not have a SIM card installed the first time you turn on the phone, the **Insert SIM card to make calls** message displays and an animated tutorial shows you how to install the SIM card.

Without a SIM card, you can only make an emergency call with the phone; normal cell phone service is not available.

Making an Emergency Call without a SIM card

1. Tap **Emergency call** from the on-screen display to make an emergency call.
2. Enter 9-1-1 and tap . Complete your call. During this type of call, you will have access to the Speaker mode, Keypad, and End Call features.
3. Tap to exit this calling mode.

Making an Emergency Call with a SIM card

The Emergency calling mode makes redialing an emergency number a 1-tap process. Before you can resume normal calling operations, you should first exit this mode.

1. From the Home screen, tap .
2. Enter the emergency number (ex: 911) and then tap .
3. Complete your call. During this type of call, you will have access to the Speaker mode, Keypad, and End Call features.
   - After completing your emergency call, appears in the Notification area until you exit the Emergency calling mode.

Note: This mode can drain your battery power more rapidly than a normal calling mode.

Making a Call Using Speed Dial

You can assign a short cut number to a phone number in your Contacts List for speed dialing.

1. From the Home screen, tap **Contacts** to display your Contacts List.
2. Press to display the Contacts List sub-menu.
3. Tap **Speed dial setting**.
4. The **Speed dial setting** screen displays showing the numbers 1 through 100. The number 1 is reserved for Voicemail.
5. Tap an unused number and the **Select contact** screen displays.
6. Select a contact to assign to the number. The selected contact number will display in the speed dial number box.
7. To remove a speed dial number or change the order, press to display the Speed dial setting sub-menu.
8. Tap **Change order** or **Remove**.
9. To make a call using Speed Dial, tap → **Keypad** and from the Dialer, touch and hold the speed dial number.

Making a Call from the Address Book

You can store phone numbers that you use regularly on the SIM card or in the phone's memory. These entries are collectively called the **Address Book**.

For further details about the **Address Book** feature, see *"Finding an Address Book Entry"* on page 64.

Answering a Call

When a call is received the phone rings and displays the caller's phone number, or name if stored in the Address Book.

1. At the incoming call screen:
   - Touch and drag in any direction to answer the call.
   - Touch and drag in any direction to reject the call and send it to your voicemail.
   - Touch and drag the **Reject call with message** tab upward and tap a predefined text message to send to the caller.
     - I'm driving
     - I'm at the movie theater
     - I'm in class
     - I'm in a meeting
     - Sorry, I'm busy. Call back later.

   – or –

     - Tap **Create new message** to compose a new message.
2. Tap to end the call.

Note: You can answer a call while using the Address Book or other menu feature. After ending the call, the phone returns to the previously active function screen.

Dialing Options

From the Home screen and Application menus, you have the option to access the Dialer and initiate a call by tapping ➔ **Keypad**. From the Dialer and the Contacts screen, the following tabs are located at the top of your screen:

- **Keypad**: dials the current number entered using the on-screen keypad.
- **Logs**: displays a list of all dialed, received, and missed calls.
- **Favorites**: displays your contacts that you have marked as Favorites.
- **Contacts**: takes you to your Address Book where you can select a contact to call.

After you begin to enter numbers, the **Add to contacts** option appears so you can save the Contact if needed.

Call Log

The phone stores the numbers of the calls you've dialed, received, or missed in the Call log. The Call log displays the details of the call.

1. From the Home screen, tap .
2. Tap the **Logs** tab.

   A list of recent calls is displayed. If the number or caller is listed in your Address Book, the associated name is displayed.

All calls made, received, and missed are listed. Types of calls are identified by the following icons:

- **Incoming Calls**:
- **Outgoing Calls**:
- **Missed Calls**:
- **Rejected Calls**:
- **Auto Rejected Calls**:

Calling Back a Missed Call

To call back a missed call number:

1. From the Home screen, tap → **Logs** .

   A list of recent calls is displayed. If the number or caller is listed in your Address Book, the associated name is displayed.
2. Swipe the desired missed call to the right to call.

   – or –

   Swipe the desired missed call to the left to message.

Saving a Recent Call to your Address Book

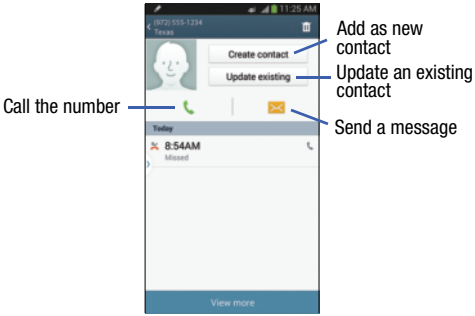
1. From the Home screen, tap → **Logs** .

   A list of recent calls is displayed.
2. Tap the call you want to save to your Address Book.
3. The call detail page is displayed. Tap **Create contact** to add the call to your Address Book.

   The Create contact screen is displayed.

   – or –

   If you want to replace the number for an existing contact, tap **Update existing**.



4. Enter information into the various fields using the keypad.
5. Tap **Save** to save when you are finished.

For further details about the **Address Book** feature, see *"Adding a New Contact"* on page 62.

Sending a Message to a Recent Call

1. From the Home screen, tap → **Logs**.
   A list of recent calls is displayed.
2. Swipe the entry you want to message to the left.
3. At the Message screen, tap the empty text field and use the on-screen keypad to type in a message.
4. When you are done with your message, tap to send.
   For more information, refer to *"Creating and Sending Messages"* on page 142.

Deleting a Call from the Call Log

1. From the Home screen, tap → **Logs**.
   A list of recent calls is displayed.
2. Touch and hold the call you want to delete from the Call log.
3. Tap **Delete**.
4. At the **Delete log** prompt, tap **Delete**.
   The call is deleted from the Call log.

Adding a Call to the Reject List

1. From the Home screen, tap → **Logs**.
   A list of recent calls is displayed.
2. Touch and hold the call you want to add to the Reject List.
3. Tap **Add to reject list**.

4. At the **Add to reject list** prompt, tap **OK**.

   Future calls from this number will be rejected and sent to your voicemail.

Call Duration

1. From the Home screen, tap ➔ **Logs**

.
2. Press ➔ **Call duration**.
3. The following times are displayed for Voice and Data:
   - **Last call**: shows the length of time for the last call.
   - **Dialed calls**: shows the total length of time for all calls made.
   - **Received calls**: shows the total length of time for all calls received.
   - **All calls**: shows the total length of time for all calls made and received.
4. You may reset these times to zero by pressing then tapping **Reset**.

Options During a Call

Your phone provides a number of control functions that you can use during a call.

Adjusting the Call Volume

During a call, to adjust the earpiece volume, use the **Volume** keys on the left side of the phone.

- Press the **Up** volume key to increase the volume level and press the **Down** volume key to decrease the volume level.

From the Home screen, you can also adjust the ringer volume using these same keys.

In-Call Options

During an active call there are several functions available by tapping a corresponding on-screen button.

- **Hold**: place the current active call on hold.
- **Add call**: displays the dialer so you can call another person.
- **Keypad**: displays the on-screen keypad, where you can enter number using DTMF (Dual Tone Multi-Frequency).
- **End call**: terminates the call.
- **Speaker**: routes the phone's audio through either the speaker or through the earpiece.
  - Tap **Speaker** to route the audio through the speaker. (You can adjust the speaker volume using the volume keys.) A green line will appear under the Speaker button.

– Tap **Speaker** again to use the phone's earpiece (see *"Using the Speakerphone During an Active Call"* on page 58). The green line will disappear when Speaker is not activated.

- **Mute/Unmute** turn the onboard microphone either on or off.
  - Tap **Mute** during a call to mute the microphone. A green line will appear under the Mute button.
  - Tap **Mute** again to unmute the microphone. The green line will disappear when Mute is not activated.
- **Headset** connects to a Bluetooth headset.
  - Tap **Headset** during a call to activate a Bluetooth headset. A green line will appear under the Headset button.
  - Tap **Headset** again to de-activate the Bluetooth headset. The green line will disappear when the Headset is not activated.
- Press for more options:
  - **Contacts**: allows you to go to your Contact list.
  - **Action Memo**: allows you to write a note using the Action Memo feature.
  - **Message**: allows you to write a message during a call.
  - **One-handed operation on/off**: allows you to enable or disable the resize and reposition the keypad/dialer for either left-handed (off) or right-handed operation (on).

Personalizing the Call Sound Setting

During a call it may be necessary to adjust the sound of the incoming call by selecting an audio equalizer setting for the current call.

1. From the call screen, tap .
2. Confirm the option is enabled .
3. Select an available option. Choose from: Adapt Sound, Soft sound, Clear sound, and Off.

Activating Noise Reduction

During a call it may be necessary to activate the noise reduction feature. Activating this feature can improve the quality of your conversation by reducing ambient noise. Noise reduction in on by default.

1. Press to turn **Noise reduction off**.
2. Press to turn **Noise reduction on**.

Placing a Call on Hold

You can place the current call on hold at any point during a conversation. You can also make another call while you have a call in progress if your network supports this service.

1. While on a call, tap **Hold**

. This action places the current caller on hold.
2. You can later reactivate this call by tapping **Unhold**

.

To make a new call while you have a call in progress

1. Tap **Hold**

.
2. Tap **Add call**

to display the dialer.
3. Enter the new number and tap
.

   Once connected, the active call will appear in a large box at the top of your screen and the call on hold will appear in a smaller box in the middle of your screen.

Switching Between Calls

When you have an active call and a call on hold, you may switch between the two calls, changing the one on hold to active and placing the other on hold.

1. Tap **Swap**.

   The current call (caller #2) is placed on hold and the previous call on hold (caller #1) is then reactivated so that you can continue conversing with that person. The active call will appear in a green box.
2. Tap

to end the currently active call.

To end a specific call

1. Tap **Swap** until the call you want to end appears in a green box.
2. Tap

to end the specific call.
3. Tap

to end the remaining call.

To answer a call while you have a call in progress

1. Tap
and slide to the right to answer another call.
2. Tap **Putting "Name/Number" on hold** to put the first call on hold.

   – or –

Tap **Ending call with "Name/Number"** to end the first call.

3. To switch between the two calls, tap **Swap**.
   - **Swap**: Places the current call on hold and then activates the previous call. The active call will appear in a green box. Tap **Swap** again to switch back.

To end a call on hold

1. Tap to disconnect the active call.
2. The call on hold will now become the active call. Tap to end the call.

3-Way Calling (Multi-Party Calling)

The 3-Way or Multi-Party feature allows you to answer a series of incoming calls and place them on hold. If this service is supported by the network, all calls can be joined together. You are notified of an incoming call by a call waiting tone.

Note: The **Merge** option combines all of the calls you have established with your phone (both active and on hold). **Swap** places the current call on hold and then activates the previous call.

This feature joins all of the calls you have established with your phone (both active and on hold) into a multi-party call.

1. Tap and slide to the right to answer the call.
2. Tap and slide to the right to answer the next call.
3. Tap **Putting "Name/Number" on hold** to put the first call on hold.
4. Join the first two callers into a single multi-party call by tapping **Merge** .
5. To temporarily leave the conference call, tap **Hold** .

   To rejoin the conference call tap **Unhold** .
6. Tap to end the call.

Using the Speakerphone During an Active Call

While in an active call, it is possible to enable the speakerphone feature.

1. Tap **Speaker** .

   The **Speaker** button now appears as and the speakerphone is activated.
2. Use the **Volume** keys (located on the left side of your phone) to adjust the volume.

3. To deactivate the speakerphone, tap **Speaker** .

Important! For more information, see *"Responsible Listening"* on page 224.

Switching off the Microphone (Mute)

You can temporarily switch your phone's microphone off, so that the other person cannot hear you.

Example: You wish to say something to person in the room, but do not want the person on the phone to hear you.

To mute your phone during a call

1. Tap **Mute** .
   The **Mute** button now appears as and Mute is activated.
2. Tap **Mute** to deactivate the Mute function and reactivate the microphone.

Bluetooth headset

1. Tap **Headset** .
2. The phone will scan for your Bluetooth headset. When found, connect to the headset.
   The **Headset** button now appears as and the Bluetooth headset is activated.
3. Tap **Headset** to deactivate the Bluetooth headset and reactivate the phone speaker.

Searching for a Number in Address Book

1. During the active call, press then tap **Contacts**.
2. Tap the Address Book entry.

For further details about the **Address Book** feature, see *"Finding an Address Book Entry"* on page 64.

Call Waiting

The Call Waiting feature allows you to answer an incoming call while you have a call in progress, if this service is supported by the network, and you must first activate the Call Waiting feature:

- From the Home screen, tap ➔ ➔ **Call settings** ➔ **Additional settings** ➔**Call waiting**.

  You are notified of an incoming call by a call waiting tone.

Call Settings

To access the Call settings menu:

- From the Home screen, tap ➔ ➔ **Call settings**.

  – or –

- From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call**.

For detailed information on all of the call settings, see *“Call Settings”* on page 107.

Section 4: Contacts and Your Address Book

This section allows you to manage your daily contacts by storing their name and number in your Address Book. Address Book entries can be sorted by name, entry, or group.

AT&T Address Book Activation

When you access the AT&T Address Book, the network backup service, contacts are automatically synchronized between your phone and online address book. The changes you make are automatically saved and if you ever upgrade, damage, or lose your phone, you can easily restore your contacts onto your new phone.

To activate the AT&T Address Book:

1. From the Home screen, tap **Contacts** .
   Your Address Book is displayed.
2. If you have not synchronized your phone with your online AT&T Address Book recently, the **AT&T Address Book** screen is displayed. Tap **Yes** if you want to synchronize your Address Book.
3. Follow the on-screen instructions.

Your AT&T Address Book is Ready to Use. You can now make a call or send a message through your Address Book.

You can also manage your Address Book on the web at http://www.att.com/addressbook.

Synchronizing your AT&T Address Book

If you ever upgrade, damage, or lose your phone, you can easily restore your contacts onto your new phone by following these steps:

1. From the Home screen, tap **Contacts** .
2. Press ➔ **Settings** ➔ **AT&T Address Book**.
3. At the AT&T Address Book screen, tap **Yes** to synchronize your phone with your online Address Book.
4. If there are existing contacts on your phone, you will be prompted if you would like to remove them first. Tap **Yes** or **No**.

Note: You must first copy any contacts that exist on your SIM card to your phone. For more information, refer to *"Copying Contacts to the Phone"* on page 72.

Your phone is synchronized.

5. At the **Your AT&T Address Book is Ready for Use** screen, tap **OK**.

   Your Contact list is displayed.

Adding a New Contact

Use the following procedure to add a new contact to your Address Book.

Saving a Number from the Home screen

1. From the Home screen, tap **Contacts** ➔ [+].
2. Contacts are saved to your device by default, If you want to save your contacts to your SIM card or an account, tap the **Device** box and select **SIM** or Account name.
3. Tap the image icon and assign a picture to the new entry by choosing one of three options:
   - **Image**: retrieve a previously stored image from your Gallery or from your My files folder and assign it to this entry. Tap an image to assign the image to the contact, then tap **Done**.
   - **Pictures by people**: retrieve a previously shared image from your Gallery.
   - **Take picture**: use the camera to take a new picture and assign it to this entry, then tap **Done**.
   - **S Note**: use an image from one of your S Notes.
   - **Remove**: although not an option with a new entry, deletes any previously assigned image on an existing contact.
4. Tap the **Name** field and use the on-screen keypad to enter the full name. For more information, refer to *"Entering Text"* on page 44.

   – or –

   Tap ⌄ next to the **Name** field to display additional name fields.
5. Tap the **Phone number** field.

   The numerical keypad is displayed.

   The **Mobile** button [Mobile] initially displays next to the **Phone number** field. If you want to add a phone number that is not a mobile number, tap the **Mobile** button and select another phone number type.
6. Enter the phone number.

   Tap ⊕ to add another Phone number field or tap ⊖ to delete a field.
7. Tap the **Email address** field.

   The keyboard is displayed.

The **Home** button Home initially displays next to the **Email** field. If you want to add an Email address that is not a Home email address, tap the **Home** button and select another Email address type.

8. Enter the Email address.
   Tap ⊕ to add another Email address field or tap ⊖ to delete a field.
9. Tap any of the following fields that you want to add to your new contact:
   - **Groups**: assign the contact to Not assigned, Favorites, ICE - emergency contacts, Co-workers, Family, or Friends.
   - **Ringtone**: adds a field used to assign a message tone that will sound when messages are received from this contact.
   - **Message alert**: allows you to set the ringtone for your message alerts.
   - **Vibration pattern**: allows you to set the specific type of vibration.
   - **Add another field**: tap this button to add additional fields.
10. Tap **Save** to save the new contact.

Adding Pauses to Contact Numbers

When you call automated systems, you are often required to enter a password or account number. Instead of manually entering the numbers each time, you can store the numbers in your Contacts along with special characters called pauses and waits. A pause will stop the calling sequence for two seconds and a wait will pause the calling sequence until you enter a number or press a key.

To add a pause or a wait to an existing Contact:

1. From the Home screen, tap **Contacts**, and then tap the name or number to open the Contact.
2. Tap to edit.
3. Tap the phone number field.
4. Tap the screen at the position where the pause or wait needs to be added.
5. Tap Sym.
6. Tap **Pause(,)** to add a two-second pause or tap **Wait(;)** to add a wait, and use the keypad to enter the additional numbers. A pause will be displayed as a comma (,) and a wait will be displayed as a semi-colon (;).

7. Tap **Save** to save your changes, or tap **Cancel** to discard.

Editing an Existing Contact

When editing an existing contact, you can tap a field and change or delete the information, or you can add additional fields to the contact's list of information.

1. From the Home screen, tap **Contacts** .
2. Tap the Contact that you want to edit.
3. Tap to edit.
4. Tap any of the fields to add, change, or delete information.
5. Tap **Save** to save the edited information.

Using Contacts

Dialing or Messaging from Address Book

Once you have stored phone numbers in the Address Book, you can dial them easily and quickly by either using their SIM card location number or by using the Search field to locate the entry.

From the Address book, you can also send messages.

Finding an Address Book Entry

You can store phone numbers and their corresponding names onto your SIM card and phone's onboard memory. The two locations are physically separate but are used as a single entity, called the Address Book.

Depending on your particular SIM card, the maximum number of phone numbers the SIM card can store and how they are stored may differ.

1. From the Home screen, tap **Contacts** .
2. Within the Contacts list (sorted alphabetically), tap a letter on the right side of the display to quickly jump to the contacts beginning with that letter.
3. Tap the contact you wish to call or message.
4. Tap the phone icon to make a phone call or tap the message icon to send a message.

   For more information, refer to *"Creating and Sending Messages"* on page 142.

Tip: From the Contact list, sweep right over a listing to make a call. Sweep left over a listing to send a message.

Linking Contacts

Linking Contact Information

Many people now maintain multiple email accounts, social networking logins, and other similar account information. For example, a Facebook account login name might differ from a corporate email account login because they are maintained separately and for different groups of people.

This device can synchronize with multiple accounts such as Facebook, Twitter, Corporate email, and Google. When you synchronize your phone with these accounts, each account creates a separate contact entry in the Contacts list.

If one of your contacts (Amy Smith, for example) has a regular email account that you maintain in Gmail, but also has a Facebook account under her maiden and married name, as well as a Yahoo! chat account, when you merge these accounts into your Contacts list you can link all of her entries and view the information in one record.

The next time you synchronize your phone with your accounts, any updates that contacts make to email account names, email addresses, etc. automatically update in your contacts list.

For more information about synchronizing accounts, see *"Synchronizing Accounts"* on page 67.

1. From the Home screen, tap **Contacts** .
2. Tap a contact name (the name you want to link to another entry). Typically this is the same contact with a different name or account information.
3. Press ➔ **Link contact**.

   The contact list is displayed.

Note: Only contacts stored on your device can be linked.

4. Tap the second contact entry (the entry in which to link). The second contact is now linked with the first and the account information is merged into one screen.

Note: The information is still maintained in both entries, but displays in one record for easier viewing when you link the contacts.

5. Tap area under the **Connection** bar to view the contact information you linked. The contacts and information displays with an icon next to the contact name to indicate what type of account information is contained in the entry.

Unlinking a Contact

1. From the Home screen, tap **Contacts** .
2. Tap a contact name (the account name from which you want to unlink an entry). **Note**: typically this is the same contact with a different name or account information.
3. Tap the link icon under the **Connection** bar.
4. Tap the minus sign next to entry in which you want to unlink.
5. At the **Separate contact** prompt, tap **OK**.

   The contact is now separated and no longer displays in the merged record screen.

Marking a Contact as Default

When you use messaging type applications, the application needs to know which information is primary (default) in a contact entry list. For example, you may have three different contact records for John Smith, so the application will be looking for the “default” number or entry.

1. From the Home screen, tap **Contacts** .
2. Tap a Contact name.
3. Press ➔ **Mark as default**. The Mark as default screen displays radio buttons next to the contact names or phone numbers of all the linked contacts. The radio button next to the default contact will be green.
4. To change the default contact, tap the radio button next to another entry that you want to be the default. The radio button will turn green, then tap **Done**.

Synchronizing Accounts

From the Accounts menu you decide if you want applications to synchronize, send, and receive data at any given time, or if you want the applications to synchronize automatically. After determining how you want the accounts to synchronize, indicate which account to synchronize with your Contacts list.

1. From the Home screen, tap **Contacts** .
2. Press then tap **Accounts**.

   If you have previously added any accounts, the **Sync settings** prompt is displayed with your current accounts listed.
3. Tap an account that you would like to synchronize.
4. At the **Sync settings** screen, tap the options that you would like to synchronize for that account.
5. Tap **Sync now** to synchronize the account.

   The account is synchronized.
6. Press to return to the Contacts list.

Note: You can also synchronize your accounts using the Settings menu. For more information, refer to *"Synchronizing Accounts"* on page 127.

Address Book Options

You can access Address Book options while at the main Address Book page or while in the details page for a specific entry.

Options in Address Book

1. From the Home screen, tap **Contacts** then press .
2. The following options are displayed:
   - **Delete:** allows you to delete 1 or more of your contacts.
   - **Business cards**: allows you to take pictures of business cards and have the information added to your contact list.
   - **SIM Management**: allows you to copy contacts from your phone to your SIM card or from your SIM card to your phone. You can also delete contacts from your SIM.
   - **Import/Export**: allows you to move contacts to or from your memory card or USB storage.

- **Share namecard via**: allows you to send the contact's information via various applications.
- **Accounts**: allows you to add and manage your Samsung, ChatON, Google, LDAP, and Microsoft Exchange ActiveSync accounts. Tap Add account and then follow the on-screen instructions.
- **Speed dial setting**: allows you to set up speed-dialing. For more information, refer to *"Making a Call Using Speed Dial"* on page 51.
- **Send message/email**: allows you to send a text or message.
- **Contacts to display**: You can choose to display all of your contacts or only display contacts on your Device, SIM, or contacts stored to other accounts. You can also tap Customized list to change other options on how your contacts are displayed.
- **Settings**: allows you to choose set the following options:
  - **Only contacts with phones**: allows you to only display contacts that have phone numbers.
  - **List by**: allows you to sort by First name or Last name.
  - **Display contacts by**: allows you to sort by First name or Last name first.
  - **Service numbers**: allows you to display or edit your service numbers.
  - **Contact sharing settings**: allows you to send all or individual contacts via Bluetooth in the form of namecards.
  - **AT&T Address Book**: allows you to access the AT&T Address Book so you can sync your contacts.
- **Help**: provides additional information.

Options at Selected Contact Screen

1. From the Home screen, tap **Contacts** .
2. Tap a contact and at the contact's display screen, press .
3. The following options are displayed:
   - **History**: allows you to view the phone and message history for the contact.
   - **Edit**: allows you to change the contact's information. For more information, refer to *"Editing an Existing Contact"* on page 64.
   - **Delete**: allows you to delete the contact from your Address Book.
   - **Link contact**: allows you to link contacts with other contacts (only displays when contact is saved to SIM).

- **Separate contact**: allows you to separate contacts that have been linked. This option only appears if the contact has been linked.
- **Mark as default**: when you have multiple contacts linked together, you can mark one of them as default (only displays when contact is saved to the phone). For more information, refer to *"Marking a Contact as Default"* on page 66.
- **Assign speed dial**: allows you to assign this contact to your speed dial list. For more information, refer to *"Making a Call Using Speed Dial"* on page 51.
- **Share namecard via**: allows you to send the contact's information via various applications.
- **Add to/Remove from reject list**: allows you to add or remove the contact from your reject list. If they call while being on the reject list, the call will be sent directly to voice mail.
- **Add shortcut to home**: allows you to place a shortcut for this contact on your Home screen.

Groups

Adding a Contact to a Group

1. From the Home screen, tap **Contacts** .
2. Tap a contact that you would like to add to a group.
3. Tap in the **Groups** section. If the contact has not been previously added to a group, **Not assigned** is shown.
4. Tap the group that you would like to add the contact to. You may select as many groups as you like.
5. Tap **Save**.

   The contact is added to the group.

Removing a Contact From a Group

1. From the Home screen, tap **Contacts** ➔ **Groups** .
2. Tap a group entry.
3. Press ➔ **Remove member**.
4. Tap all of the contacts you want to remove from this group. A green checkmark will appear next to their name.
5. Tap **Done**.

The contacts are now removed from the group.

Creating a New Group

1. From the Home screen, tap **Contacts** → **Groups** → → **Create**.
2. Tap the **Group name** field and use the on-screen keypad to enter a new group name. For more information, refer to *"Entering Text"* on page 44.
3. Tap **Group ringtone** to choose a ringtone for assignment to this new group. Tap a ringtone to hear how it sounds, then tap **OK**.

   – or –

   Tap **Add** to select a ringtone from your music files.
4. Tap **Message alert** to choose an alert tone for assignment to this new group, then tap **OK**.
5. Tap **Vibration pattern** to choose a vibration audio file for assignment to this new group, then tap **OK**.

   – or –

   Tap **Create** and follow the on-screen instructions to create your own vibration pattern.
6. Tap **Add member** to add contacts to the new group.
7. Tap each contact you want to add to create a checkmark. You can also tap **Select all**.
8. Tap **Done**.
9. Tap **Save** to save the new Group category.

Editing a Caller Group

To edit a Group entry, there must be at least one member as part of the selected group.

1. From the Home screen, tap **Contacts** → **Groups** .
2. Tap a group entry.
3. Press → **Edit group**.
4. Make modifications to the **Group name**, **Group ringtone**, **Message alert**, or **Vibration pattern** fields.
5. Tap **Add member** to add more contacts to this group.
6. Tap **Save** to save the edited Group category.

Address Book Favorites

Once you have stored phone numbers in the Address Book, you can add them to your Favorites list.

To view your Favorites list:

- From the Home screen, tap **Contacts** → **Favorites** .

Adding Favorites to your Address Book

1. From the Home screen, tap **Contacts** .
2. Within the Contacts list, tap a contact that you want to add to your Favorites list.
3. Tap the white start in the top right corner of the screen.
4. The star will turn gold and the contact is added to your Favorites list. A gold star will also appear next to the contact in the Address Book.

Removing Favorites from your Address Book

1. From the Home screen, tap **Contacts** .
2. Within the Contacts list, tap a contact that you want to remove from your Favorites list.
3. Tap the gold start in the top right corner of the screen.
4. The star will turn white and the contact is removed from your Favorites list. A gold star will no longer appear next to the contact in the Address Book.

Managing Address Book Contacts

You can copy, delete, and view the memory status for the Phone and SIM contacts on your phone.

Copying Contacts to the SIM Card

Note: When storing an Address Book entry into the SIM card, only the name, phone number, and email address are available as fields. Also, if you move the SIM card to another phone that does not support additional fields on the SIM card, this additional information may not be available.

1. From the Home screen, tap **Contacts** → → **SIM Management**.
2. Tap **Copy Contacts to SIM**.

   The phone then displays a list of your current phone contacts.
3. Tap the contacts to place a checkmark adjacent to those entries you wish to have copied to the SIM card.

- Repeat this step for all individual entries you wish copied to the SIM or tap **Select all** to place a checkmark alongside all entries.

4. Tap **Done** to copy.
5. At the **Copy to SIM** display, tap **OK**.

   The selected numbers are copied to the SIM card.

Copying Contacts to the Phone

1. From the Home screen, tap **Contacts** ➔ ➔ **SIM Management**.
2. Tap **Copy Contacts from SIM**.
3. At the **Create contact under account** prompt, tap on **Device** or an account name that you would like to copy the contact to.

   The phone then displays a list of your current contacts stored on your SIM card.
4. Tap the contacts to place a checkmark adjacent to those entries you wish to have copied to your phone.
   - Repeat this step for all individual entries you wish copied to your phone or tap **Select all** to place a checkmark alongside all entries.
5. Tap **Done** to copy.

   The selected numbers are copied.

Deleting Contacts from the SIM card

1. From the Home screen, tap **Contacts** ➔ ➔ **SIM Management**.
2. Tap **Delete Contacts from SIM**.

   The phone then displays a list of your current SIM contacts.
3. Tap the contacts to place a checkmark adjacent to those entries you wish to have deleted from the SIM card.
   - Repeat this step for all individual entries you wish copied to the SIM or tap **Select all** to place a checkmark alongside all entries.
4. Tap **Delete**.
5. At the **Delete Contacts from SIM** prompt, tap **OK**.

   The selected numbers are deleted from the SIM card.

Deleting Address Book Entries from the Phone

You can delete Phone or SIM entries from your phone's memory.

1. From the Home screen, tap **Contacts** .
2. Within the Contacts list, touch and hold a contact that you want to delete.
3. Tap **Delete** on the displayed list.
4. At the **Delete** prompt, tap **OK** to delete the contact or **Cancel** to exit.

Using the Service Dialing Numbers

You can view the list of Service Dialing Numbers (SDN) assigned by your service provider. These numbers may include emergency numbers, customer service numbers, and directory inquiries.

1. From the Home screen, tap **Contacts** → → **Settings**.
2. Tap **Service numbers**.
3. Scroll through the available numbers (if available).
4. Tap a number and the call is made.

Note: This menu is available only when your SIM card supports Service Dialing Numbers.

Section 5: Pictures and Videos

This section explains features related to the use of the camera and camcorder on your phone. You can take photographs and shoot video by using the built-in camera functionality. Your 13 megapixel camera produces photos in JPEG format.

Important! Do not take photos of people without their permission.
Do not take photos in places where cameras are not allowed.
Do not take photos in places where you may interfere with another person's privacy.

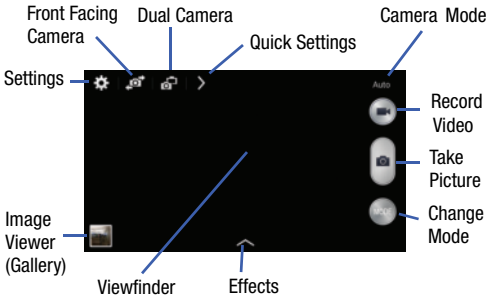
Using the Camera

Taking Photos

Taking pictures with your device's built-in camera is as simple as choosing a subject, pointing the camera, then pressing the camera key.

Note: When taking a photo in direct sunlight or in bright conditions, shadows may appear on the photo.

1. From the main Home screen, tap **Camera** to activate the camera mode.
2. Using the phone's main display screen as a viewfinder, adjust the image by aiming the camera at the subject.
3. Before you take a picture, use the **Up** and **Down** Volume keys to zoom in or out. You can magnify the picture up to x4 (400 percent).
   – or –
   Pinch the screen to zoom out or pinch outwards to zoom in.
4. If desired, before taking the photo, you can tap on-screen icons to access various camera options and settings.
5. You can also tap the screen to move the focus to the area you touch.
6. Press the Camera key ( ) until the shutter sounds. (The picture is automatically stored within your designated storage location. If no microSD is installed, all pictures are stored on the Phone.)



7. While viewing a picture, after you have taken it, pinch the screen outwards to zoom in or pinch the screen inwards to zoom out.

   You can magnify the picture up to x4.

8. Press ⮌ to return to the viewfinder.

Taking Dual Camera Photos

With the Dual Camera feature, you can take a picture with both the front and rear cameras at the same time.

To take a Dual Camera picture:

1. From the camera viewfinder, tap the Dual Camera icon located at the top left side of the screen.

   The camera viewfinder displays an image from the front-facing camera within a postage stamp picture frame on top of the main image displayed from the rear-facing camera.

2. Press the Camera key ( ) to take the picture.

To resize the front camera image:

- Touch and hold the postage stamp picture frame until the resize handles appear, then drag a corner to enlarge the image.

To reposition the front camera image

- Touch and hold the postage stamp picture frame to detach it and then move it to a desired location.

Camera Modes

There are many different camera modes that you can use to help optimize your photos depending on the conditions and your experience.

1. From the camera viewfinder, tap the Mode button to change the mode to one of the following:
   - **Auto**: Automatically adjusts your camera to optimize color and brightness. This is the default setting
   - **Beauty face**: Use this to take photos with lightened faces for gentler images.
   - **Best photo**: Use this to take multiple photos in a short time, and then choose the best photos among them. Press the Shutter button to take multiple photos. When Gallery opens, tap and hold thumbnails of photos to save, and then tap Done.
   - **Best face**: Use this to take multiple group shots at the same time and combine them to create the best possible image. Press the Shutter button to take multiple photos. When Gallery opens, tap the yellow frame on each face, and choose the best individual face for the subject. After choosing a pose for each individual, tap Done to merge the images into a single photo, and tap Save.
   - **Sound & shot**: Use this mode to enrich pictures by adding background sounds for a few seconds. The background sound is recorded for up to 9 seconds after taking the photo.
   - **Drama**: Use this to take a series of photos of a moving object and then merge them together into one image.
   - **Animated photo**: Use this to create a picture in which a few selected static objects move by animating objects detected by the device.
   - **Golf**: Use this feature to take pictures of a gold swing and then play the pictures back (forwards or backwards).
   - **Rich tone (HDR)**: Use this to take photos with richer colors and contrasts.
   - **Eraser**: Saves the best of 5 taken pictures and removes any passers by.
   - **Panorama**: Use this to take wide panoramic photos. Press the Shutter button to take a photo, and then move the camera in any direction. When the blue frame aligns with the preview screen, the camera automatically takes another shot in the panoramic sequence. To stop shooting, press the Shutter button again.

– **Surround shot**: Use this to take a 360-degree pictures that are then used to create a spherical panorama.

– **Sports**: Use this to take fast action photos.

Quick Settings

Tap > at the top of the display to quickly change Camera settings. Not all of the following options are available in both still camera and video camera modes. The available options vary by mode.

Activate or deactivate the flash.

Activate/deactivate night detection.

Activate or deactivate the voice control to take photos.

Select a resolution for videos.

Activate or deactivate the sharing options.

Hide Quick settings.

Camera and Camcorder Settings

This section describes the different settings that you can configure on your camera. Not all of the following options are available in both still camera and video camera modes. The available options vary by mode.

1. From the viewfinder, tap (**Camera Settings**).
2. The follow settings are located under the Camera, Camcorder, and General tabs. The settings that are displayed will depend on what camera mode you are in.

   Camera:

   - **Photo size**: Select a resolution for photos. Use higher resolution for higher quality. Higher resolution photos take up more memory.
   - **Burst shot**: allows several photographs to be captured in quick succession by touching and holding the Camera button.
   - **Tap to take pics**: allows you to tap the screen to also take a new picture (vs using the Camera button).
   - **Face detection**: allows you to adjust the camera focus based on face detection technology.

- **Metering modes**: allows you to set how the camera measures or meters the light source: Center-weighted, Matrix, or Spot.
- **ISO**: determines how sensitive the light meter is on your digital camera. Choose from Auto, 100, 200, 400, or 800. Use a lower ISO number to make your camera less sensitive to light, a higher ISO number to take photos with less light, or Auto to let the camera automatically adjust the ISO for each of your shots.
- **Smart stabilization**: compensates for camera movement.
- **Save as**: allows you to assign rich tone usage to an image.

Camcorder:

- **Video size**: Select a resolution for videos. Use higher resolution for higher quality. Higher resolution videos take up more memory.
- **Video stabilization**: Activate or deactivate Optical Image Stabilization.
- **Audio zoom**: when active, allows you to focus your microphone on a zoomed area during video recording.

Settings:

- **Location tag**: attach a GPS location tag to the photo. To improve GPS signals, avoid shooting in locations where the signal may be obstructed, such as between buildings or in low-lying areas, or in poor weather conditions. Your location may appear on your photos when you upload them to the Internet. To avoid this, deactivate the Location tag setting.
- **Review pics/videos**: set this option if you want to view each picture or video after you take it.
- **Volume key**: assigns a function to the volume key. Choose from The zoom key, The camera key, or The record key.
- **Timer**: Use this for delayed-time shots. You can set the timer to Off, 2 sec, 5 sec, or 10 sec.
- **White balance**: Select an appropriate white balance, so images have a true-to-life color range. The settings are designed for specific lighting situations. These settings are similar to the heat range for white-balance exposure in professional cameras.
- **Exposure value**: allows you to adjust the brightness level by moving the slider.

- **Guide lines**: Display viewfinder guides to help composition when selecting subjects.
- **Flash**: activate or deactivate the flash.
- **Voice control**: activates/deactivates voice control feature that allows you to verbally take a photo.
- **Contextual filename**: allows you to have your location added as part of the filename. You must first activate GPS tag described above.
- **Save as flipped**: when set to On, this option allows you to take and save a mirror-image video when using self-recording mode.
- **Storage**: Select the memory location for storage.
- **Shutter sound**: Turn the shutter sound on or off.
- **Reset**: Reset the camera settings.

Viewing your Pictures

After you take a photo, you can access various options from the Image Viewer. The Image Viewer uses your Gallery. For more information, refer to *"Gallery"* on page 82.

Editing a Photo

You can edit your photos using the built-in Photo editor application on your device. The photo editor application provides basic editing functions for pictures that you take on your phone. Along with basic image tuning like brightness, contrast, and color it also provides a wide variety of effects used for editing the picture.

1. From the Home screen, tap ➔ **Gallery** .
2. Select a folder location and tap a file to open it.
3. With the image displayed, press ➔ **Edit** to launch the Photo editor.

Note: To select the picture area, touch and hold the current picture.

---

4. Select an image area by touching and holding the image and then selecting an available option:
   - **Selection mode**: provides several on-screen selection options such as: Select area, Inverse selection, Selection size, and Selection mode (Magnetic, Lasso, Brush, Round, and Square).
   - **Select all**: select the entire area of the current image.

- **Clipboard**: copies the currently selected area to your device's clipboard.

5. Use the following editor controls to edit your picture:

Previous: move to previous photo project.

Next: move to next photo project.

Cancel: exits the current photo editing session.

Save: stores the currently edited photo.

Rotate: allows you to rotate a photo in all 4 directions. You can also mirror image a photo.

Crop: allows you to crop (cut-out) an area of a photo.

Color: allows you to adjust the color using various techniques.

Effects: allows you to add various effects to your photo.

Portrait: allows you to apply various face correction effects.

Sticker: allows you to place various pre-created on-screen stickers atop your current image.

Drawing: allows you to add draw directly on your current picture by using either a brush/pen or eraser.

Frame: places a pre-created border style atop your current image.

6. Press to access the following options:
   - **Save as**: allows you to rename your current image and save it to your gallery.
   - **Select image**: allows you to select a new image for editing.
   - **Take picture**: allows you to activate the camera and take a new image for editing.
   - **Share via**: allows you to share your saved photo via various applications.
   - **Set as**: assigns the currently saved image as either a: Contact photo, Home and lock screens, Home screen, or Lock screen.

Using the Camcorder

In addition to taking photos, the camera also doubles as a camcorder that also allows you to record, view, and send videos.

Note: The camera may not be able to properly record videos to a memory card with a slow transfer speed.

Shooting Video

Tip: When shooting video in direct sunlight or in bright conditions, it is recommended that you provide your subject with sufficient light by having the light source behind you.

1. From the main Home screen, tap **Camera** to activate the camera mode.
2. Using the camera's main display screen as a viewfinder, adjust the image by aiming the camcorder at the subject.
3. Before you take a video, use the Volume control buttons to zoom in or out. You can magnify the video up to x4 (400 percent).
4. Tap the Video key ( ) to begin shooting video. The red light will blink while recording.
5. You can tap the screen to move the focus to the area you touch.
6. To capture an image from the video while recording, tap . This feature is not available while the anti-shake feature is activated.
7. Tap the Pause key ( ) to stop the recording and save the video file to your Camera folder.
8. Tap the Stop key ( ) to stop the recording and save the video file to your Camera folder.
9. Once the file has been saved, tap the image viewer, then tap to play your video.
10. Press to return to the viewer.

Viewing your Videos

After you take a video, you can access various options from the Image Viewer. The Image Viewer uses your Gallery and the Video player. For more information, refer to *"Gallery"* on page 82. Also, see *"Video"* on page 200.

Gallery

The Gallery is where you view photos and play back videos. For photos, you can also perform basic editing tasks, view a slideshow, set photos as wallpaper or contact image, and share as a picture message.

1. Tap ➔ **Gallery** .

   All of the Albums that hold your pictures and videos will be displayed with folder name and number of files.

2. Tap an Album and thumbnails of the contents will be displayed.

Note: If your device displays that the memory is full when you access Gallery, delete some of the files by using **My Files** or other file management applications and try again. For more information, refer to *"My Files"* on page 185.

Viewing Pictures

1. Within an album, tap a thumbnail to view a single picture.

Note: If no control icons are displayed on the screen in addition to the picture, tap anywhere on the screen to display them.

---

2. The following options are available at the top of the screen in landscape orientation:
   - **Change player** : allows you to change the device the picture is displayed on if you are using Samsung Link.
   - **Share via** : allows you to share the picture via various applications.
   - **Delete** : allows you to delete the picture.
   - **Camera** : activates the camera.
3. Press for additional options.

Viewing Videos

Note: If no control icons are displayed on the screen in addition to the picture, tap anywhere on the screen to display them.

1. Tap a video to select it.
2. Tap ▶ to play the video.
3. Press Menu for additional options.

   For video player controls, see *"Video"* on page 200.

Using S Beam to Share Pictures

This feature (when activated via NFC) allows you to beam large files directly to another compatible device that is in direct contact. These files can be larger, such as Videos, HD pictures, and other large files.You can beam images and videos from your gallery, music files from your Music, and more.

1. From the Home screen, tap Apps ➔ **Settings**.
2. If not already active, in a single motion touch and slide the **NFC** slider to the right to turn it on ON.
3. Tap **S Beam** and make sure the feature is turned on.
4. If not already active, in a single motion touch and slide the **S Beam** slider to the right to turn it on ON.
5. On the source device (containing the desired image or video), tap Apps ➔ **Gallery**.
6. Locate and tap the selected image to open it in the preview window.

Important! Neither device must be in Lock mode or displaying the Lock screen. They must both be active and unlocked. It is recommended that the target device be on the Home screen.

7. Place the two active NFC-enabled devices back to back to begin.

Note: If the **Touch to beam** screen does not appear on the source device:
- Pull them apart
- Verify the image is visible in the preview window on the source device (providing the file)
- Place them together again

8. From the **Touch to beam** screen, tap the reduced image preview to begin the transfer.
9. When prompted, separate the two devices. After a few seconds (depending on file size) the recipient with then see the transferred file displayed on their screen.

To share multiple pictures via S Beam:

1. On the source device (containing the desired image or video), tap → **Gallery** .
2. Locate the selected folder.
3. Touch and hold the first image and place a checkmark on it and all desired images.
4. Place the two active NFC-enabled devices back to back to begin.
5. From the **Touch to beam** screen, tap the reduced image preview to begin the transfer.
6. When prompted, separate the two devices.
7. The picture(s) is transferred to the other device.

Section 6: Changing Your Settings

This section explains the settings used for customizing your device.

Accessing Settings

1. From any Home screen, tap ➔ **Settings** .

   – or –

   From any Home screen, press ➔ **Settings**.

Settings Tabs

The Settings are divided into 4 main groups. When the Settings screen displays, the following 4 tabs are located at the top of the screen:

Connections:

This tab allows you to see all of settings related to the connection of your device to external sources. Options include: Wi-Fi, Bluetooth, Tethering and portable hotspot, Airplane mode, Data usage, Location, More networks (Default messaging app, Printing, Mobile networks and VPN), NFC, S Beam, Nearby devices, and Screen Mirroring.

Device:

This tab provides access to display configuration and features. Options include: Sound, Display, Multi window, LED indicator, Lock screen, Wallpaper, Font, Notification panel, Easy mode, Accessibility, Call, and Blocking mode.

Controls:

This tab provides access to Voice and input methods and Motion control. Options include: Language and input, Voice control, Hands-free mode, S Pen, One-handed operation, Air gesture, Air view, Air command, Motions, Palm motion, Smart screen, and Increase touch sensitivity.

General:

This tab provides access to the General set of device settings not listed under the other three tabs. These include Accounts, Backup and reset, Date and time, Accessory, Browser Bar, Application manager, Default applications, Battery, Power saving mode, Storage, Security, and About device.

Note: The settings for your device are described below in the order that they appear within the Settings menu. Options under the Connections tab are listed first, followed by Device, Controls, and General settings.

Wi-Fi Settings

This section describes the Wi-Fi settings. For information on how to use Wi-Fi, see *"Wi-Fi"* on page 155.

Activating Wi-Fi

1. From the Home screen, tap → **Settings** → **Connections** → **Wi-Fi**.
2. Tap the ON/OFF slider, located to the right of the Wi-Fi field, to turn Wi-Fi ON .
3. Tap **Scan** to scan for available Wi-Fi networks. For more information, refer to *"Connect to a Wi-Fi Network"* on page 155.

Activating Wi-Fi Direct

Wi-Fi Direct allows device-to-device connections so you can transfer large amounts of data over a Wi-Fi connection.

1. From the Home screen, tap → **Settings** → **Connections** → **Wi-Fi**.
2. Tap the ON/OFF slider, located to the right of the Wi-Fi field, to turn Wi-Fi ON .
3. At the bottom of the Wi-Fi screen, tap the **Wi-Fi Direct** button.

   For more information, refer to *"Wi-Fi Direct"* on page 158.

Advanced Wi-Fi Settings

The advanced Wi-Fi settings allow you to set up and manage wireless access points.

1. From the Home screen, tap → **Settings** → **Connections** → **Wi-Fi**.
2. Press → **Advanced**.

   The following options are available:

- **Network notification**: alerts you when a new WAP is available.
- **Passpoint**: allows you to connect to passpoint-enabled Wi-Fi Access Points automatically. Touch and slide the slider to the right to turn it on

.
- **Sort by**: allows you to sort by alphabet or RSSI.
- **Keep Wi-Fi on during sleep**: allows you to specify when to disconnect from Wi-Fi.
- **Always allow scanning**: allows the Google location service and other apps to scan for networks, even when Wi-Fi is turned off.
- **Auto network switch**: allows the device to automatically switch between a Wi-Fi network or a cellular network.
- **Auto connect**: allows you to be automatically connected to an AT&T Wi-Fi Hotspot as soon as your phone detects it.
- **Install certificates**: allows you to install security certificates that you have on a MicroSD card.
- **MAC address**: view your device's MAC address, required when connecting to some secured networks (not configurable).
- **IP address**: view your device's IP address.

Bluetooth settings

In this menu you can activate Bluetooth, view or assign a device name, activate your phone so other Bluetooth devices can discover it, or scan for other, available Bluetooth devices with which to pair.

Activating Bluetooth

1. From the Home screen, tap ➔ **Settings** ➔

Connections.
2. Tap the ON/OFF slider, located to the right of the Bluetooth field, to turn Bluetooth ON

.
The Bluetooth icon is displayed on the status bar.

Additional Bluetooth Settings

When Bluetooth is on, additional settings are available.

1. From the Home screen, tap ➔ **Settings** ➔

Connections ➔ **Bluetooth**.
2. Tap **Scan** to scan for nearby discoverable devices. After searching, tap a device to pair with it. For more information, refer to *"Pairing Bluetooth Devices"* on page 161.
3. Press and select a Bluetooth setting to configure:

- **Visibility timeout**: Use this setting to control when to automatically turn off the Discoverable option: 2 minutes, 5 minutes, 1 hour, or Never time out.
- **Received files**: Shows the list of files received by using Bluetooth.
- **Help**: Displays additional Bluetooth information.

4. Tap the checkbox next to **SAMSUNG-SM-N900A** to remove the checkmark if you do not want your phone visible to other Bluetooth devices.

Tethering & portable hotspot

This option allows you to share your phones's mobile data connection via USB or as a portable Wi-Fi hotspot.

Mobile Hotspot

Note: To enable Mobile Hotspot on your phone, dial 611 or go to att.com/mywireless to set up the service.

1. From the Home screen, tap Apps ➔ **Mobile Hotspot**.
– or –
From the Home screen, tap Apps ➔ **Settings** ➔ **Connections** ➔ **Tethering and portable hotspot** ➔ **Mobile Hotspot**.
2. Turn Mobile Hotspot on by tapping the slider so that it changes to the ON position ON.
The Mobile Hotspot icon is displayed at the top of your screen.
3. Tap **Configure**, to configure your Mobile Hotspot settings.
4. Tap **Allowed devices** to set up the devices that you will allow to use your Mobile Hotspot.
5. Follow the on-screen instructions to use Mobile Hotspot.

USB tethering

Note: To enable USB tethering on your phone, dial 611 or go to att.com/mywireless to set up the service.

1. From the Home screen, tap Apps ➔ **Settings** ➔ **Connections** ➔ **Tethering and portable hotspot**.
2. Connect your phone to your PC using a USB cable.

3. Tap **USB tethering** to add a checkmark and activate the feature. The USB tethering icon is displayed at the top of your screen.
4. Follow the on-screen instructions to use USB tethering.

Help

- From the **Tethering and portable hotspot** menu, Press ➔ **Help** for additional information

Airplane mode

Airplane mode allows you to use many of your phone's features, such as Camera, Games, and more, when you are in an airplane or in any other area where making or receiving calls or data is prohibited.

Important! When your phone is in Airplane Mode, it cannot send or receive any calls or access online information or applications.

1. From the Home screen, tap ➔ **Settings** ➔ **Connections**.
2. Tap the **Airplane mode** checkbox to create a checkmark and activate the feature.
3. At the **Turn on airplane mode** prompt, tap **OK**.

The Airplane mode icon is displayed at the top of your screen.

Data Usage

From this screen you can view your Mobile data usage and turn your Mobile data capability On or Off.

1. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **Data usage**.
2. Tap **Mobile data** to create a checkmark and turn Mobile data usage on.
3. Tap **Set mobile data limit** to create a checkmark and allow a data limit to be set.
4. Touch and drag the orange limit bar to the GB limit that you desire.
5. Tap the **Data usage cycle** drop-down menu and select a date.

   The data usage displays as a visual (chart) and also displays a list of each application with a breakdown of how much data was used per application.

Note: Data is measured by your device. Your service provider may account for data usage differently.

6. Press to display additional options. Tap to activate.
   - **Data roaming**: enables data roaming on your device.
   - **Restrict background data**: restricts some apps and services from working unless you are connected to a Wi-Fi network.
   - **Auto sync data**: allows your accounts to automatically sync
   - **Show Wi-Fi usage**: displays a Wi-Fi tab that shows Wi-Fi usage.
   - **Mobile hotspots**: displays available mobile hotspots.

Location

The Location settings allow you to set up how the phone will determine your location and the sensor settings for your phone.

1. From the Home screen, tap → **Settings** → Connections → **Connections** → **Location**.
2. Turn Location on by tapping the slider so that it changes to the ON position ON.
3. The following options are available:
   - **Mode**: allows you to choose a location mode. Each mode enables different technologies and affects both the accuracy of the location and battery usage.
   - **Recent location requests**: under this heading, all of the apps that have requested your location are listed.
   - **Google Location Reporting**: after adding a Google account, you can turn Location Reporting and Location History on or off.
   - **My places**: allows you to add location information for your Home, Office, and Car.
4. Under the **Tag current location** heading, tap any of the Apps to create a checkmark and activate the Location service for that app. Select Camera, S Note, Scrapbook, or Voice recorder.

More networks

This option displays additional Connectivity information.

- From the Home screen, tap → **Settings** → **Connections** → **More networks**.

  The following options are displayed:

Default messaging app

This option allows you to set the default messaging app that you can use to send all of your messages.

- From the Home screen, tap → **Settings** → **Connections** → **More networks** → **Default messaging app** and make a selection.

Printing

With the Printing option, you can set your device to print on compatible Samsung Wi-Fi printers.

1. From the Home screen, tap → **Settings** → **Connections** → **More networks** → **Printing**.
2. Tap **Samsung Print Service Plugin**.
3. Tap the ON/OFF slider, to turn Printing ON (ON).

   Your device will search for compatible printers.
4. Follow the on-screen instructions.
5. Press for additional options.

Mobile networks

Before you use applications such as Google Maps and find your location or search for places of interest, you must enable the Mobile networks options.

Mobile data

To enable data access over the mobile network, this option must be selected. It is set on by default.

1. From the Home screen, tap → **Settings** → **Connections** → **More networks** → **Mobile networks**.
2. Tap **Mobile data** to create a checkmark and activate the feature.

Data Roaming

Data roaming allows you to connect to your service provider's partner networks and access data services when you are out of your service providers area of coverage.

1. From the Home screen, tap → **Settings** → **Connections** → **More networks** → **Mobile networks**.
2. Tap **Data roaming** to create a checkmark and activate the feature.

Access Point Names

To use Wi-Fi you need access to a wireless access point (hotspot).

1. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **More networks** ➔ **Mobile networks**.
2. Tap **Access Point Names**.

   A list of the Access Point names display. The active access point displays a green, filled circle to the right of the name.

Network Operators

Using this feature you can view the current network connection. You can also scan and select a network operator manually, or set the network selection to Automatic.

1. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **More networks** ➔ **Mobile networks**.
2. Tap **Network operators**.

   The current network connection displays at the bottom of the list.

Important! You must deactivate data service prior to searching for an available network.

Note: Connecting to 2G networks slows the data transfer speed and time.

Default setup options

Your phone default is set to Automatic (to automatically search for an available network. You can set this option to Manual to select a network each time you connect.

1. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **More networks** ➔ **Mobile networks**.
2. Tap **Network operators**.
3. Tap **Default setup**.
4. Tap **Manual** to locate and connect to a network manually, or tap **Automatic** to allow the device to automatically select a network.

Search for AT&T MicroCell

If you have purchased the AT&T Microcell you can set your network to use it.

1. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **More networks** ➔ **Mobile networks** ➔ **Network operators**.
2. Tap **Search for AT&T MicroCell**.

3. Follow the on-screen instructions.

Note: For additional information please contact your AT&T service representative.

VPN settings

The VPN settings menu allows you to set up and manage Virtual Private Networks (VPNs).

Important! Before you can use a VPN you must establish and configure one.

Adding a Basic VPN

Before you add a VPN you must determine which VPN protocol to use: PPTP (Point-to-Point Tunneling Protocol), L2TP(Layer 2 Tunneling Protocol)/IPSec PSK (Pre-shared key based L2TP/IPSec), L2TP/IPSec RSA (Public key based L2TP/IPSec), IPSec Xauth (Cross authentication) PSK, IPSec Xauth RSA, or IPSec Hybrid (authentication) RSA.

1. Before using VPN, you must first set up a screen unlock PIN or password. For more information, refer to *"Lock Screen Settings"* on page 101.
2. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **More networks** ➔ **VPN**.
3. Tap **Basic VPN**.
4. Tap **Add**.
5. Enter a name for the VPN network in the **Name** field.
6. Select a VPN type from the **Type** drop-down menu. The options are:
   - PPTP (Point-to-Point Tunneling Protocol)
   - L2TP/IPSec PSK (Layer 2 Tunneling Protocol / Internet Protocol Security Pre-Shared Key)
   - L2TP/IPSec RSA
   - IPSec Xauth PSK
   - IPSec Xauth RSA
   - IPSec Hybrid RSA
7. Enter the Server address and any other required fields that are dependent upon the **Type** you entered previously.
8. Tap the **Show advanced options** check box to display additional VPN options.
9. Tap **Save** to save your VPN settings.

Adding an IPsec VPN

1. Before using VPN, you must first set up a screen unlock PIN or password. For more information, refer to *"Lock Screen Settings"* on page 101.
2. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **More networks** ➔ **VPN**.
3. Tap **Advanced IPsec VPN**.
4. Tap **Add VPN Connection**.
5. Enter a password, confirm the password, and tap **OK**.
6. Enter a name for the VPN connection in the **VPN connection name** field.
7. Select a IPsec connection type from the drop-down menu.
8. Enter any other required information.
9. Tap **Show advanced options** to display additional VPN options.
10. Tap **Save** to save your VPN settings.

NFC

NFC (Near Field Communication) allows data exchange when you touch your device with another compatible device. This is used for applications such as Android Beam and S Beam.

To activate NFC, follow these steps:

1. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **NFC**.
2. Tap the ON/OFF slider, located to the right of the NFC field, to turn NFC ON .

Android Beam

When Android Beam is activated, you can beam app content to another NFC-capable device by holding the devices close together. You can beam browser pages, YouTube videos, contacts, and more.

1. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **NFC** ➔ **Android Beam**.
2. Tap the **OFF / ON** icon to turn Android Beam ON .
3. Touch the back of your device with another NFC-capable device and the content is transferred.

S Beam

When S Beam is activated, you can beam files to another NFC-capable device by holding the devices close together. You can beam images and videos from your Gallery, music files from your Music app, and more.

1. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **S Beam**.
2. Tap the **OFF / ON** icon to turn S Beam on .
3. Touch the back of your device with another NFC-capable device and the content is transferred.

Nearby devices

This option allows you to share your media files with nearby devices using DLNA and connected to the same Wi-Fi.

1. Connect to a Wi-Fi network. For more information, refer to *"Activating Wi-Fi"* on page 86.
2. From the Home screen, tap ➔ **Settings** ➔ **Connections** ➔ **Nearby devices**.
3. Tap the **OFF / ON** icon to turn Nearby devices on .
4. Verify (**Nearby devices**) appears at the top of the screen.
5. At the **Nearby devices** prompt, tap **OK**.
6. Tap **Shared contents**, then check the media you would like to share. Tap **OK**.
7. Tap **Allowed devices list**, then select the connected devices you would like to allow.
8. Tap **Not-allowed devices list**, then select the connected devices you would like to not allow.
9. Tap **Download to**, then select the destination of any downloaded (shared) content. Choose from Device or SD card.
10. Tap **Upload from other devices**, then select the actions you'll take when you upload content from other devices. Choose from either Always accept, Always ask, or Always reject.

Screen Mirroring

The Screen Mirroring feature allows you to share the media files on your device screen with an HDMI device such as an HDMI TV.

Note: This feature requires the optional AllShare Cast dongle which is available as an accessory. See your AT&T Customer Service Representative for more information.

1. From the Home screen, tap ➔ **Settings** ➔

Connections ➔ **Screen Mirroring**.
2. Connect the AllShare Cast dongle to the HDMI device using an HDMI A-to-A cable.
3. Press ➔ **Help** for information on using Screen Mirroring.

Sound Settings

From this menu you can control the sounds on the phone.

- From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Sound**.

The following options display:

Volume

The Volume option allows you to change the volume for all phone sounds in one easy location.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Sound** ➔ **Volume**.
2. Touch and drag the slider to adjust the sound volume for Music, video, games and other media, Ringtone, Notifications, and System.
3. Tap **OK**.

Vibration intensity

Vibration intensity allows you to select how intense the vibration is for different options.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Sound** ➔ **Vibration intensity**.
2. Touch and drag the slider to adjust the Vibration intensity for Incoming call, Notification, and Haptic feedback.
3. Tap **OK**.

Ringtones

This option allows you to set the ringtone.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Sound**.
2. Tap **Ringtones**.
3. Tap a ringtone and tap **OK**.

   – or –

   Tap **Add** to select a file from your music files.

Vibrations

This option allows you to set your phone to vibrate and ring.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Sound**.
2. Tap **Vibrations**.
3. Select a vibration pattern and tap **OK**.

   – or –

   Tap **Create** and follow the on-screen instructions to create your own vibration.

Default notification sound

This option allows you to set the default ringtone that will sound for notifications and alarms.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Sound**.
2. Tap **Default notification sound**.
3. Tap a ringtone and tap **OK**.

Vibrate when ringing

This option allows you to enable your phone to vibrate whenever it rings.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Sound**.
2. Tap **Vibrate when ringing** to create a checkmark and enable the feature.

System Tone Settings

The System tone settings are used when you use the dialing pad, make a screen selection, lock your screen, or tap the screen.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Sound**.
2. Tap any of the following options to create a checkmark and activate the feature:
   - **Dialing keypad tone**: makes a sound when you tap a key on the keyboard.
   - **Touch sounds**: makes a sound when you touch the screen.
   - **Screen lock sound**: makes a sound when your screen is locked or unlocked.
   - **Haptic feedback**: makes a vibration when you tap soft keys and on certain UI interactions.
   - **Pen attach/detach sound**: allows you to select a sound that will be heard whenever the S Pen is attached or detached from the phone. Choose Off or 3 different sounds.

Samsung Application Settings

The Samsung application settings are used when you want to change the sound settings for commonly used apps.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Sound**.
2. Tap **Call**, **Message**, **Email**, or **Calendar** to change the sound settings for the app.

Samsung Keyboard Sound Settings

The Samsung keyboard sound settings are used when you use the dialing pad, make a screen selection, lock your screen, or tap the screen.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Sound**.
2. Tap any of the following options to create a checkmark and activate the feature:
   - **Key-tap sound**: makes a sound when you tap a key on the Samsung keyboard.
   - **Key-tap vibration**: makes a vibration when you tap a key on the Samsung keyboard.

Audio Output

This sound feature configures the audio output.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Sound** ➔ **Audio output**.
2. Choose from either Stereo or Surround.

Adapt Sound

The Adapt Sound feature allows you to customize your call sounds.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Sound** ➔ **Adapt Sound**.
2. Read the instructions and tap **Start**.
3. Follow the on-screen instructions to set up your personal call sound.

Display Settings

In this menu, you can change various settings for the display.

- From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Display**.

  The following options display:

  - **Brightness** allows you to configure the LCD Brightness levels.
    - Tap **Automatic brightness** to allow the device to self-adjust and tap **OK**.

      - or -

      Touch and slide the on-screen slider to adjust the level and tap **OK**.
  - **Screen timeout**: allows you to adjust the delay time before the screen automatically turns off. Make an available selection. Choices include: 15 seconds, 30 seconds, 1 minute, 3 minutes, 5 minutes, and 10 minutes.
  - **Touch key light duration**: allows you to adjust the delay before the Touch key light automatically turns off.
  - **Screen mode**: allows you to select from several different color modes.

- **Reading mode**: allows you to activate an optimized reading mode for selected applications. This menu allows you to assign available applications (such as Calculator, Camera, Contacts, etc...) for enhancement using the Reader mode. Tap the OFF / ON icon next to Reading mode to turn it on

.
- **Auto adjust screen tone**: adjusts the phone's LCD brightness level to automatically adjust and conserve battery power.
- **Daydream**: allows you to control what your screen does when your device is docked or sleeping. Tap the OFF / ON icon next to Daydream to turn it on

. Follow the on-screen instructions.
- **Auto rotate screen** when enabled, this feature, allows the device to automatically switch from portrait to landscape orientation and vice versa. When this setting is disabled, the device displays in portrait mode only.
- **Show battery percentage** when enabled, displays of battery charge percentage atop the battery icon at the top of the screen.
- **Edit after screen capture** when enabled, this feature takes you to the Edit screen after capturing a screen image.

Multi window

This option to enable/disable the automatic Multi window feature.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Multi window**.
2. Tap the **OFF / ON** icon next to **Multi window** to the right to turn it on

.
3. Tap the **Open in multi window view** field to automatically view content in multi window when you open files from My Files or Video, or attachments from emails and messages.

   For more information, refer to *"Using the Multi Window"* on page 32.

LED indicator

This option allows you to turn on your LED lights for charging, missed events, and incoming notifications. The light will turn on by default unless you turn them off.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **LED indicator**.
2. Tap the following LED indicator options to turn them on or off:
   - **Charging**: LED lights up when the device is connected to the charger.
   - **Low battery**: LED lights up when the battery level is low.
   - **Notifications**: LED lights up when you have missed calls, messages, or application events.
   - **Voice recording**: LED lights up when you are recording voice. The LED only lights up when the screen is off.

Lock Screen Settings

Choose settings for unlocking your screen. For more information about using the lock and unlock features, see *"Locking and Unlocking the Touch Screen"* on page 11.

Screen Lock

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Lock screen**.
2. Tap **Screen lock** for these options then follow the on-screen instructions to set up your Screen lock:
   - **Swipe**: Swipe the screen to unlock it.
   - **Signature**: Write your signature to unlock it.
   - **Pattern**: A screen unlock pattern is a touch gesture you create and use to unlock your device. Follow the prompts to create or change your screen unlock pattern.
   - **PIN**: Select a PIN to use for unlocking the screen.
   - **Password**: Create a password for unlocking the screen.
   - **None**: No pattern, PIN, or password is required. The screen will never lock.

Lock screen options

Activate or deactivates various Unlock screen functions.

Note: The Lock screen options will differ depending on what type of Screen Lock you have selected in step 2.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Lock screen**.
2. The following options are available depending on the Screen Lock type that you have selected:

Swipe options

- **Multiple widgets** allows you to display multiple widgets on your lock screen. Appears as an options after a lock mode is enabled.
- **Clock widget options** allows you to show the dual clock on the lock screen, adjust the Clock size, and show the date.
- **Shortcuts** sets shortcuts to appear at the bottom of the Lock screen. Touch and slide the slider to the right to turn it on .
- **Personal message** allows you to enter a customized personalized message that is displayed on the lock screen. Touch and slide the slider to the right to turn it on .
- **Owner information** allows you enter text to display on the lock screen.
- **Unlock effect** sets the effect you receive when unlocking the device. You can select None, Watercolor, or Ripple.
- **Ink effect** sets the coloring for the on-screen ink used in writing/drawing.
- **Wake up in lock screen** requires that you say a command to wake-up your phone.
- **Action Memo on lock screen** allows you to open the Action Memo when double tapping the lock screen with S Pen.
- **Help text** shows help information on the Lock screen.

Signature options

- **Clock widget options** allows you to show the dual clock on the lock screen, adjust the Clock size, and show the date.
- **Personal message** allows you to enter a customized personalized message that is displayed on the lock screen. Touch and slide the slider to the right to turn it on .
- **Owner information** allows you enter text to display on the lock screen.
- **Make signature visible** allows your signature to be visible while you are writing.

- **Accuracy level** allows you to set how accurate the signature should be. Select High, Medium, or Low.
- **Secured lock time** locks the screen instantly when the screen times out or the power key is pressed.
- **Action Memo on lock screen** allows you to open the Action Memo when double tapping the lock screen with S Pen.

Pattern options

- **Clock widget options** allows you to show the dual clock on the lock screen, adjust the Clock size, and show the date.
- **Personal message** allows you to enter a customized personalized message that is displayed on the lock screen. Touch and slide the slider to the right to turn it on

.
- **Owner information** allows you enter text to display on the lock screen.
- **Make pattern visible** allows your pattern to be visible while you are writing.
- **Unlock effect** allows you to set the effect that occurs as you unlock your phone. Select None, or Watercolor.
- **Secured lock time** locks the screen instantly when the screen times out or the power key is pressed.
- **Action Memo on lock screen** allows you to open the Action Memo when double tapping the lock screen with S Pen.

PIN and Password options

- **Clock widget options** allows you to show the dual clock on the lock screen, adjust the Clock size, and show the date.
- **Personal message** allows you to enter a customized personalized message that is displayed on the lock screen. Touch and slide the slider to the right to turn it on

.
- **Owner information** allows you enter text to display on the lock screen.
- **Secured lock time** locks the screen instantly when the screen times out or the power key is pressed.
- **Action Memo on lock screen** allows you to open the Action Memo when double tapping the lock screen with S Pen.

Wallpaper

The Wallpaper settings option allows you to set the Wallpaper for your Home screen, Lock screen, or both.

1. From the Home screen, tap ➔ **Settings** ➔ 
Device ➔ **Wallpaper**.
2. Select an available option to change its current wallpaper.

For more information, refer to *"Changing the Wallpaper"* on page 40.

Font

This function adjusts the delay time before the screen automatically turns off.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Font**.
2. The following Font options are available:
   - **Font style**: sets the fonts used on the LCD display. Select a font or tap **Get fonts online** to download additional fonts.
   - **Font size**: allows you to select which size of font is displayed.

Notification Panel

This feature allows you to set the brightness of your notification panel and also select the quick setting buttons that you want to display at the top of the notification panel. For more information, refer to *"Notification Panel"* on page 42.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Notification panel**.
2. Enable the **Brightness adjustment** field to activate the ability to adjust the screen brightness via the notification panel.

To customize the notification panel quick access buttons:

1. Access the Notification Panel screen.
   - The set of buttons within the **Notification panel** area are those that are available within the Notifications panel. They provide quick access to available features. These can be customized by the user.
2. Replace existing notification panel buttons by:
   - In a single motion, touch and drag an available button from the bottom of the screen into a location within the **Notification panel** area.
   - One of the 10 default buttons is then replaced with the new selection.
3. Tap **Reset** to restore the Notification Panel buttons to their original configuration.

Easy Mode

This application allows you to leave your display using the default layout of **Standard mode** or provide an easier user experience for the first-time smartphone users using **Easy mode**.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Easy mode**.
2. Tap the **OFF / ON** icon next to **Easy mode** to the right to turn it on .

Accessibility

Accessibility services are special features to make using the device easier for those with certain physical disabilities. Use the Accessibility settings to activate these services.

Note: You can download accessibility applications from Play Store and manage their use here.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Accessibility**.
2. The following options are available:
   - **Auto rotate screen**: automatically rotate the screen from landscape to portrait when you rotate your phone.
   - **Screen timeout**: timeout the accessibility feature after a defined amount of time.
   - **Speak passwords**: reads out password information.
   - **Answering/ending calls**: accept incoming calls by pressing the home key or end calls using the power key.
   - **Easy touch mode**: allows you to easily tap the screen to stop snooze alarms, calendar events and timers, and accept/reject incoming calls.
   - **Show shortcut**: allow the accessibility shortcut under the device options to be used by pressing and holding the power key.
   - **Manage accessibility**: save and update your accessibility settings or share them with another device. You can export your settings, import a previously saved file, or share your file with another device.
   - **TalkBack**: activate the TalkBack feature.

Note: TalkBack, when installed and enabled, speaks feedback to help blind and low-vision users.

Important! TalkBack can collect all of the text you enter, except passwords, including personal data and credit card numbers. It may also log your user interface interactions with the device.

- **Font size**: change the size of the fonts used on the device within menus, options, etc. Choose from: Tiny, Extra small, Small, Medium, Large, Extra large, or Huge.
- **Magnification gestures**: use exaggerated gestures such as triple-tapping, double pinching, and dragging two fingers across the screen.
- **Negative colors**: reverse the display of on-screen colors from White text on a Black background to Black text on a White background.
- **Color adjustment**: allows you to adjust the display colors if you are color blind and have difficulty reading the display because of the colors. Touch and slide the slider to the right to turn it on

. Follow the on-screen instructions.
- **Notification reminder**: plays a beep when you have unread notifications. Touch and slide the slider to the right to turn it on

.
- **Accessibility shortcut**: allows you to quickly enable accessibility features in 2 quick steps. Follow the on-screen instructions.
- **Text-to-speech options**: allows you to adjust your text-to-speech settings. For more information, refer to *"Speech Settings"* on page 119.
- **Sound balance**: allows you to use the slider to set the Left and Right balance when using a stereo device.
- **Mono audio**: allows you to enable stereo audio to be compressed into a single mono audio stream for use with a single earbud/earphone.
- **Turn off all sounds**: allows you to mute every sound made by the device during taps, selections, notifications, etc.
- **Hearing aids**: allows you to improve the sound quality of your device for use with hearing aids.
- **Flash notification**: allows you to set your camera light to blink whenever you receive a notification.
- **Google subtitles (CC)**: allows you to turn on subtitles when using applicable Google apps.
- **Samsung subtitles (CC)**: allows you to turn on subtitles when using applicable Samsung apps.

- **Assistant menu**: allows you to improve the device accessibility for users with reduced dexterity. Touch and slide the slider to the right to turn it on

. Follow the on-screen instructions.
- **Press and hold delay**: allows you to select a time interval for this action. Choose from: Short, Medium, Long, or Custom.
- **Interaction control**: allows you to enable or disable motions and screen timeout. You can also block areas of the screen from touch interaction. Touch and slide the slider to the right to turn it on

. Follow the on-screen instructions.

Call Settings

To access the Call settings menu:

- From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call**.

  – or –

- From the Home screen, tap ➔ ➔ **Call settings**.

Call rejection

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call** ➔ **Call rejection**.
2. Tap **Auto reject mode** and tap one of the following options:
   - **Off**: to turn Auto reject mode off.
   - **All numbers**: to reject all calls.
   - **Auto reject numbers**: to reject all calls in your Reject list.
3. Tap **Auto reject list**.
4. Tap to manually add numbers to the Reject list.
5. Tap **Unknown**, to create a checkmark and automatically reject all calls that are not in your Contacts list.

Set up call rejection messages

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call** ➔ **Set up call rejection messages**.
2. Tap to manually add a reject message.

   – or –

   Tap one of the pre-written messages to be displayed when you want the call to be rejected. You can edit the message if desired.

3. Tap **Save** to save the reject message.

Answeringlending calls

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Answering/ending calls**.
2. The following options are available:
   - **The home key answers calls**: Tap this option to be able to accept incoming calls by pressing the Home key.
   - **Voice control**: Tap this option to be able to accept incoming calls by using your voice.
   - **The power key ends calls**: This option will allow you to end a call by pressing the power key without turning off the screen.

Turn off screen during calls

This option turns on the proximity sensor during calls so that your phone will know to turn the screen off to save power.

- From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Turn off screen during calls** to create a checkmark and enable the feature.

Call alerts

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Call alerts**.
2. Tap the following options to create a checkmark and activate the features:
   - **Answer vibration**: enables your phone to vibrate when the called party answers the phone.
   - **Call-end vibration**: enables your phone to vibrate when the call ends.
   - **Call connect tone**: plays a tone when a call is connected.
   - **Minute minder**: beeps twice every minute that you are on a call.
   - **Call end tone**: plays a tone when a call is ended.
   - **Alerts on call**: turns on alarm and message notifications during a call.

Incoming call notifications

This option allows on pop-up notifications for incoming voice calls when the screen is on.

- From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Incoming call notifications** to create a checkmark and enable the feature.

Call Accessories

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Call accessories**.
2. The following options are available:
   - **Automatic answering**: configures the device to automatically answer and incoming call when a headset is detected.
   - **Automatic answering timer**: configures the time delay before the device automatically accepts the incoming call.
   - **Outgoing call conditions**: allows you to make calls even when the device is locked.

Additional settings

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Additional settings**.
2. Tap one of the following options:
   - **Caller ID**: allows you to choose how your Caller ID will be displayed. Select Network default, Hide number, or Show number.
   - **Call forwarding**: allows you to forward your calls to another number.
   - **Auto area code**: allows you to automatically prepend a specific area code to all outbound calls.
   - **Call waiting**: the network service informs you when someone is trying to reach you during another call. Tap to activate.
   - **Auto redial**: automatically redials the last number if the call was either cut off or was unable to connect. Tap to activate.
   - **Fixed dialing numbers**: allows you to restrict outgoing calls to a limited set of phone numbers.

Using Fixed Dialing Numbers

Enabling FDN

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Additional settings** ➔ **Fixed dialing numbers**.
2. Tap **Turn on FDN**.
3. At the prompt, enter your PIN2 code and tap **OK**.
   FDN is enabled.
4. To enable FDN after it has been disabled, tap **Turn off FDN**, enter your PIN2 code and tap **OK**.

Important! Not all SIM cards use a PIN2 code. If your SIM card does not, this menu does not display.
The PIN2 code is provided by your carrier. Entering an incorrect PIN2 code could cause the phone to lock. Contact customer service for assistance.

Changing the PIN2 Code

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call** ➔ **Additional settings** ➔ **Fixed dialing numbers**.
2. Tap **Change PIN2**.
3. At the prompt, enter your old PIN2 code.
4. At the prompt, enter a new PIN2 code.
5. Confirm your PIN2 code.

Managing the FDN List

When this feature is enabled, you can make calls only to phone numbers stored in the FDN list on the SIM card.

Note: Before you can manage an FDN list a list must be created.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call** ➔ **Additional settings** ➔ **Fixed dialing numbers**.
2. Tap **FDN list**.
3. A list of all existing FDN numbers will be displayed.

Ringtones and keypad tones

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call** ➔ **Ringtones and keypad tones**.
2. Tap **Ringtones**, select a ringtone, and tap **OK**.
3. Tap **Vibrations**, select a vibration type, and tap **OK**.
4. Tap **Vibrate when ringing** to create a checkmark if you want your phone to vibrate when a call is incoming.
5. Tap **Dialing keypad tone** to create a checkmark if you want tones to play when the dialing keypad is pressed.

Personalize call sound

This option allows you to personalize the sounds you hear during a call with and without earphones.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Personalize call sound**.
2. At the Personalize call sound display, tap one of the following options:
   - **Adapt sound**: allows you to customize your sounds. Follow the on-screen instructions to set up your personal call sound.
   - **Soft sound**: plays a soft quite sound.
   - **Clear sound**: plays a clear distinct sound.
   - **Off**: turns off all sounds during a call.

Noise reduction

This option helps to suppress background noise from your side during a call.

- From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Noise reduction** to create a checkmark and enable the feature.

Increase volume in pocket

This option increases the ringtone volume when the device is in a pocket or a bag. It uses the proximity sensor to detect its location.

- From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Increase volume in pocket** to create a checkmark and enable the feature.

Voicemail service

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Voicemail Service**.

   Voicemail service provided by your carrier is the default.
2. Tap **My carrier** to remove the carrier Voicemail service.

Voicemail settings

You can view or modify your voicemail number from this menu.

1. From the Home screen, tap ➔ **Settings** ➔ **Device** ➔ **Call** ➔ **Voicemail settings**.
2. Tap the **Voice mail number** field, backspace to erase the digits, and enter a new voicemail number using the keypad, then tap **OK**.

3. Tap **OK**.

Sound

You can select a unique ringtone for Voicemail alerts.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call** ➔ **Sound**.
2. Tap a ringtone to hear it played.
3. Select a ringtone and tap **OK**.

Vibrate

This option allows you select vibration settings for Voicemail alerts.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call**.
2. Tap **Vibrate** to create a checkmark and activate the Vibrate feature.

TTY Mode

A TTY (also known as a TDD or Text Telephone) is a telecommunications device that allows people who are deaf, hard of hearing, or who have speech or language disabilities, to communicate by telephone.

Your phone is compatible with select TTY devices. Please check with the manufacturer of your TTY device to ensure that it is compatible with digital cell phones.

Your phone and TTY device will connect via a special cable that plugs into your phone's headset jack. If this cable was not provided with your TTY device, contact your TTY device manufacturer to purchase the connector cable.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call** ➔ **TTY mode**.
2. Tap **TTY Full**, **TTY HCO**, or **TTY VCO**. A green checkmark will appear. Tap **TTY Off** to turn it off.

Hearing aids

This option allows you to turn on Hearing aid compatibility on your device.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Call**.
2. Tap **Hearing aids** to create a checkmark and enable the Hearing aid compatibility feature.

Blocking Mode

When Blocking mode is enabled, notifications for selected features will be disabled. You will only receive notifications of incoming calls from people on your allowed list.

1. From the Home screen, tap ➔ **Settings** ➔

Device ➔ **Blocking mode**.
2. In a single motion touch and slide the **Blocking mode** slider to the right to turn it on

. Confirm that the Blocking mode active icon appears in the Status bar.
3. Place a green checkmark adjacent to those features you would like to enable.
4. Configure a timeframe for these features to be active. Remove the checkmark from the **Always** field to configure the **From** and **To** time fields.
5. Tap **Allowed contacts** to assign those contacts that are exempted from these rules. Choose from None, All contacts, Favorites, or Custom. Allowed contacts will then appear in the **Allowed contact list**.

Language and input

This menu allows you to configure the language in which to display the menus. You can also set on-screen keyboard options.

Language

You can change the language used by your device by following these steps:

1. From the Home screen, tap ➔ **Settings** ➔

Controls ➔ **Language and input** ➔ **Language**.
2. Tap a language from the list.

Keyboards and Input Methods

You can change the keyboard used by your device by following these steps:

1. From the Home screen, tap ➔ **Settings** ➔ **Controls** ➔ **Language and input**.
2. Tap **Default** and select a keyboard.

   Select Samsung keyboard or Swype.
3. Tap **Set up input methods**.
4. Tap the icon next to the input method that you would like to configure the settings for.

   Based on your selection of input method, the appropriate settings will appear and are explained below.

Samsung Keyboard settings

From this menu you can set Samsung keyboard options.

1. From the Home screen, tap ➔ **Settings** ➔ **Controls** ➔ **Language and input**.
2. Tap the icon next to **Samsung keyboard**.
3. Set any of the following options:
   - **Input languages** settings is used to setup the language you will be using for input.
     - **English(US)** is the default language. Whatever language you select in the Select input languages option below, will be displayed here.
     - **Select input languages** sets the input language. Tap a language from the available list. The keyboard is updated to the selected language.
   - **Smart typing** provides access to additional typing settings.
     - **Predictive text** enables predictive text entry mode. This must be enabled to gain access to the advanced settings. Touch and hold to access the advanced settings.
     - **Auto replacement** automatically completes or replaces the current word with the most probable word match after tapping the space bar or entering a punctuation mark.
     - **Auto capitalization** automatically capitalizes the first letter of the first word in each sentence (standard English style).
     - **Auto spacing** automatically inserts space between words.

– **Auto punctuate** automatically inserts a full stop in a sentence by tapping the space bar twice when using the on-screen QWERTY keyboard.

- **Keyboard swipe**: allows you to combine the Samsung keyboard with an additional input method choose from:
  – **None** leaves text input as only via the on-screen keyboard.
  – **SwiftKey Flow** like using Swipe, allows you to enter text by sliding your fingers across the on-screen keyboard. This feature is optimized for use with the on-screen QWERTY keyboard.
  – **Cursor control** when enabled, allows you to control your on-screen cursor by moving your finger across the keyboard.
- **Key-tap feedback** provides feedback functions to be enabled such as:
  – **Sound** enables auditory feedback when you tap an on-screen key.
  – **Vibration** enables vibration feedback when you tap an on-screen key.
  – **Character preview** provides an automatic preview of the current character selection within the text string. This is helpful when multiple characters are available within one key.
- **More settings** provides access to additional access to more settings.
  – **Pen detection** enables the device to automatically switch to handwriting mode when the S Pen is detected.
  – **Help** launches a brief on-screen help tutorial covering the main concepts related to the Samsung keyboard.
  – **Reset settings** resets the keyboard settings back to their original configuration.

Predictive Text Settings

From this menu you can set Predictive Text settings.

1. From the Home screen, tap ➔ **Settings** ➔

Controls ➔ **Language and input**.
2. Tap the icon next to **Samsung keyboard**.
3. Tap the ON/OFF slider, located to the right of the **Predictive text** field, to turn it ON

.
4. Tap **Predictive text**.
5. The following options are available:
   - **Live word update** allows the device to automatically update its word database with popular new words every day.

- **Personalized data** activate this feature to use the personal language data that you have entered and selected to make your text entry prediction results better. By enabling this feature you can choose from the following personalization features:
- **Learn from Facebook** allows you to log into your current Facebook account and add used text to your personal dictionary.
- **Learn from Gmail**: allows you to sign in to your existing Gmail account from where your style and existing contact information is added to your personal dictionary. Helps recognize familiar names.
- **Learn from Twitter** allows you to sign into your existing Twitter account and add used text to your personal dictionary.
- **Learn from Messages** allows your device to learn your messaging style by using your Messaging information.
- **Learn from Contacts** updates predictive style by learning your Contacts style.
- **Clear remote data** allows you to delete your anonymous data stored on the personalization server.
- **Clear personal data** removes all personalized data entered by the user.
- **Privacy Policy** displays on-screen privacy information.

Swype Keypad Settings

To configure Swype settings:

1. From the Home screen, tap ➔ **Settings** ➔

Controls ➔ **Language and input**.
2. Tap the icon next to **Swype**.
3. Tap **Settings** on the left side of the screen to alter these settings:
   - **Vibrate on keypress**: activates a vibration sensation as you enter text using the keypad.
   - **Sound on keypress**: turns on sounds generated by the Swype application.
   - **Pop-up on keypress**: displays the character above the key when typing.
   - **Long-press delay**: set the time needed to select alternate characters.
   - **Show complete trace**: once enabled, sets wether or not to display the complete Swype path.
   - **Auto-capitalization**: automatically capitalizes the first letter of every sentence.

- **Auto-spacing**: automatically inserts a space between words. When you finish a word, just lift your finger or stylus and start the next word.
- **Next word prediction**: once enabled, predicts the next word in your text string based on your current text entries.
- **Show Voice key**: once enabled, displays the Voice icon on your Swype keyboard so you can use the Voice input option.

4. Tap **Themes** on the left side of the screen to access the following options:
   - **Portrait keyboard**: allows you to set the Portrait keyboard to Full screen, Mini left, or Mini right.
   - **Landscape keyboard**: allows you to set the Landscape keyboard to Full screen, Mini left, Mini right, or split.
   - **Keyboard height**: allows you to set the keyboard height in both Portrait and Landscape modes.
   - **Word choice list font size**: allows you to change the font size in the word choice list.
5. Tap **My Words** on the left side of the screen to access the following options:
   - **Backup & Sync**: allows you to backup your Swype dictionary and sync your Swype dictionary across multiple devices.
   - **Living Language**: when enabled, this feature automatically updates your Swype dictionary with popular new words.
   - **Social integration**: allows you to learn information from your Facebook, Twitter, and Gmail accounts to help you while using Swype.
   - **Edit my dictionary**: allows you to edit your personal Swype dictionary.
   - **Clear language data**: deletes all of your personal language data, including your words.
   - **Contribute usage data**: when enabled, allows the Nuance® application to collect usage data for better word predictions.
   - **Cellular data**: when enabled, activates cellular data usage by the Swype application so it can receive program updates, language downloads, and other related features via your existing data connection.
6. Tap **Languages** on the left side of the screen to activate and select the current text input language. Default language is English. Touch **Download languages**, to download additional languages.

7. Tap **Gestures** on the left side of the screen to view helpful information on using gestures while using Swype.
8. Tap **Help** on the left side of the screen to see the following options:
   - **How to Swype**: provides tips on how to learn to use Swype.
   - **Show helpful tips**: once enabled, displays helpful tips and hints as you are using Swype.
   - **Version**: displays the software version information.
9. Tap **Updates** on the left side of the screen to download any new Swype updates. If an update is available, it will display under the updates heading. If no updates are displayed, then check back later to see any available updates.

Google voice typing settings

From this menu you can set Samsung keyboard options.

1. From the Home screen, tap ➔ **Settings** ➔

Controls ➔ **Language and input**.
2. Tap the icon next to **Google voice typing**.
3. The following options are available:
   - **Choose input languages**: tap on a language that you want to input. Select Automatic to use the local language or select a language from the list.
   - **Block offensive words**: tap to create a checkmark and enable the blocking of recognized offensive words from the results of your voice-input Google typing.
   - **Offline speech recognition**: Enables voice input while offline.

Handwriting Recognition Settings

This menu allows you to set the language setting for Handwriting recognition.

1. From the Home screen, tap ➔ **Settings** ➔

Controls ➔ **Language and input**.
2. Tap **Language** under the Handwriting recognition heading.
3. To change the default language of **English**, tap another language.
4. If the language you desire is not listed, tap **More languages** to update your language list from the server.

Speech Settings

This menu allows you to set the speech settings for Voice input.

1. From the Home screen, tap ➔ **Settings** ➔ **Controls** ➔ **Language and input**.
2. Tap **Voice search** to configure the following:
   - **Language**: Choose a language for your voice input.
   - **Speech output**: Sets whether you will use speech output always or only when using hands-free.
   - **Block offensive words**: Enable or disable blocking of recognized offensive words from the results of your voice-input Google searches.
   - **Hotword detection**: Enable to being able to launch voice search by saying the word “Google”.
   - **Offline speech recognition**: Enables voice input while offline.
   - **Bluetooth headset**: allows you to record audio through a Bluetooth headset if available.
3. Tap **Text-to-speech options** and select **Samsung text-to-speech engine**.
4. Tap next to the preferred TTS engine configure the following settings:
   - **Language**: allows you to set the language for spoken text.
   - **Settings for Samsung text-to-speech engine** allows you to view Open Source Licenses.
   - **Install voice data**: allows you to install voice data for speech synthesis.
5. Scroll down to the **General** section to access the following options:
   - **Speech rate**: Set the speed at which the text is spoken.
   - **Listen to an example**: Play a sample of speech synthesis (available if voice data is installed).
   - **Default language status**: Displays whether or not the default language is supported.

Pointer speed

This option sets your Pointer speed for your mouse or trackpad when you are using a keyboard dock accessory.

1. From the Home screen, tap ➔ **Settings** ➔ **Controls** ➔ **Language and input**.
2. Tap **Pointer speed** then drag the slider to the right to go faster or to the left to go slower.
3. Tap **OK** to save your setting.

Voice control

The Voice control settings allow you to set up voice commands to control your device.

1. From the Home screen, tap ➔ **Settings** ➔ **Controls** ➔ **Voice control**.
2. Tap the ON/OFF icon at the top of your screen to activate Voice control.
3. The following options are available. Tap an option to create a checkmark and activate the feature.
   - **Incoming calls**: allows you to answer or reject calls using the commands **Answer** and **Reject**.
   - **Alarm**: allows you to stop or snooze an alarm by using the commands **Stop** and **Snooze**.
   - **Camera**: allows you to take pictures using the voice commands **Capture**, **Shoot**, **Smile**, or **Cheese**.
   - **Music**: allows you to control your Music app using the voice commands **Next**, **Previous**, **Play**, **Pause**, **Volume up**, and **Volume down**.

Note: If you set the alert type for calls or alarms to vibration, voice control will not be available.

Hands-free Mode

When Hands-free mode is enabled, incoming calls and notifications will be read out automatically.

1. From the Home screen, tap ➔ **Settings** ➔ **Controls** ➔ **Hands-free mode**.
2. Tap the **OFF / ON** icon next to **Driving mode** to the right to turn it on .

   Confirm that the Driving mode active icon appears in the Status bar.

   All incoming calls and notifications will be read out automatically.
3. The following options are available:
   - **Incoming call**: read out callers' information when receiving incoming calls.
   - **Air call-accept**: wave your hand over the screen to accept incoming calls.
   - **Message**: read out senders' information when receiving incoming calls.
   - **Alarm**: read out alarm information when alarms sound.

- **Schedule**: read out scheduled alarm information when alarms sound.

4. You can disable Driving mode by saying “Driving mode off” while in S voice, or by accessing the Settings menu and sliding the Hands-free mode slider to the off position

or by using the Notification panel.

S Pen Settings

This menu allows you to customize settings for the S Pen.

1. From the Home screen, tap ➔ **Settings** ➔

Controls ➔ **S Pen**.
2. The following options are available:
   - **Turn off pen detection**: allows you to deactivate pen detection
   - **S Pen keeper**: allows to enable a a sound alert and on-screen notification when you walk around with the device without the pen inserted in its slot.
   - **Pointer**: allows you to activate the ability to show the pointer when you hover the S Pen over the screen.
   - **Direct pen input**: displays the handwriting pad within the text input area when the S Pen is detected.
   - **Pen detachment options**: allows you activate a selected action when the device detects the S Pen is detached. Choose from: None, Action Memo, or Air command.
   - **Pen attach/detach sound**: allows you to select a sound to be played whenever the pen is attached or detached.

One-handed operation

The one-handed operation settings help you to use your phone keypads easily with only one hand.

1. From the Home screen, tap ➔ **Settings** ➔

Controls ➔ **One-handed operation**.
2. The following options are available:
   - **Use for all screens**: configures selected options for all available screens. This feature adjusts the scale and position of all screens by swiping the edge of the current screen.
   - **Keypad and in-call buttons**: activate the feature to adjust the position of the dialing keyboard and in-call buttons for one-handed operation.
   - **Samsung keyboard**: activate the feature to adjust the position of the Samsung keyboard for one-handed operation.
   - **Calculator**: activate the feature to adjust the position of the Samsung calculator for one-handed operation.

- **Unlock pattern**: activate to adjust the scale of the unlock pattern screen for use with one hand.
- **Learn about one-handed operation**: provides an on-screen tutorial for the use of these one-handed features/functions.

Motions and Gestures

The Motions and Gestures settings allow you to set up various Motion activation services. For more information on using gestures, see *"Using Gestures"* on page 29.

1. From the Home screen, tap Apps ➔ **Settings** ➔ Controls **Controls**.

Caution! Excessive shaking or impact to the device may cause unintended results.

2. The following options are available:
   - **Air gesture**: allows you to control your device by performing motions above the sensor (without touching the device).
   - **Air view**: displays helpful information when you hover your finger over the screen.
   - **Air command**: allows you to activate or deactivate the Air command function that appears on-screen once you remove the S Pen from its internal slot.
   - **Motions**: allows you to control your device using natural movements (on the screen).
   - **Palm motion**: allows you to control your device by touching the screen with your entire hand.
   - **Smart screen**: allows you to control your device by using intelligent face detection features such as: Smart stay, Smart rotation, Smart pulse, and Smart scroll.
   - **Auto-adjust touch sensitivity**: allows you to increase the screen's touch sensitivity.

To activate Air gesture:

1. From the main **Settings** page, tap **Controls** tab.
2. In a single motion touch and slide the **Air gesture** slider to the right to turn it on.
   If the feature is available for your selected action, an Air gesture icon will appear in the status bar.
3. Read the on-screen notification and tap **OK**.

Note: At least one feature must be activated before Air gesture can be activated.

4. Tap **Learn about sensor and icon** field to review on-screen information about the Air gestures sensor and related icon.
5. In a single motion, slide a feature's activation slider to the on position.

The following is a description some of the most commonly used gestures:

- **Quick glance**: Once enabled, you can move your hand over the air gesture sensor (located above the on-screen clock at the upper-right) to temporarily activate preview window that can be used to display selected user-enabled information such as: Time & Date, Notification icons, Missed calls, etc.
- **Air jump**: Once enabled, you can move your hand over the air gesture sensor (up or down) and easily jump to either the top or bottom of a lengthy display page (ex: Internet or Email).
- **Air browse**: Once enabled, you can move your hand over the air gesture sensor (left or right) and easily move to either the previous or next item in a series (ex: music tracks, pictures, or pages).
- **Air call-accept**: Once enabled, you can simply wave your hand over the air gesture sensor to accept any incoming call.

To activate Air View:

With the Air view feature, you can hover your finger over the screen and Air view features will be displayed. For example, you can hover your finger over a scheduled item in your calendar to see more details.

1. From the Home screen, tap ➔ **Settings** ➔ **Controls**.
2. In a single motion touch and slide the **Air view** slider to the right to turn it on.
3. Tap the **Air view mode** field to select the method used to activate the feature. Choose from Pen, Finger, or Auto switch.
4. Tap the **Air view pen options** field and configure the available options:
   - **Information preview**: allows you to see information previews, extended text, and enlarged images when you hover your S Pen over the screen.

Note: It is recommended that the Information preview function be enabled if using Air view.

- **Progress preview**: allows you to preview a scene or show elapsed time when you hover your S Pen over the progress bar while watching a video.
- **Speed dial preview**: allows you to see the contacts and their speed dial numbers when you hover your S Pen over them in your contacts list.
- **Icon labels**: activate the ability to hover over an icon and display an on-screen pop up description.
- **List scrolling**: allows you to enable the ability to scroll up and down a screen by holding the S Pen over the edge of the screen.
- **Sound and haptic feedback**: allows you to play sound and feel vibration when you hover your S Pen over Air view items.

5. When enabled via the Air view mode menu, tap the **Air view finger options** field and configure the available options.

To activate Air Command:

With the Air command feature active, the Air Command button toolbar appears once you remove the S Pen from its slot. This toolbar allows you to quickly activate frequently used applications or actions.

1. From the Home screen, tap → **Settings** → **Controls**.
2. In a single motion touch and slide the **Air command** slider to the right to turn it on.

To activate Motion:

1. From the Home screen, tap → **Settings** → **Controls**.
2. In a single motion touch and slide the **Motions** slider to the right to turn it on.
3. Read the on-screen notification and tap **OK**.

Note: At least one feature must be activated before Motion can be activated.

4. The following motions are available:

- **Direct call**: Once enabled, the device will dial the currently displayed on-screen Contact entry as soon as you place the device to your ear.
- **Smart alert**: Once enabled, pickup the device to be alerted and notified of you have missed any calls or messages.
- **Zoom**: Once enabled, you must be on a screen where content can be zoomed. In a single motion, touch and hold two points on the display then tilt the device back and forth to zoom in or out.
- **Browse an image**: Once enabled, touch and hold a desired on-screen image to pan around it. Move the device left or right to pan vertically or up and down to pan horizontally around the large on-screen image.
- **Mute/pause**: Once enabled, mute incoming calls and any playing sounds by turning the device display down on a surface. This is the opposite of the Pickup to be Notified Gesture.

To activate Palm Motion:

1. From the Home screen, tap → **Settings** →

Controls.
2. In a single motion touch and slide the **Palm motion** slider to the right to turn it on.
3. Read the on-screen notification and tap **OK**.

Note: At least one feature must be activated before Palm motion can be activated.

4. In a single motion, slide a feature's activation slider to the on position.

The following is a description some of the most commonly used gestures:

- **Capture screen**: Once enabled, you can capture any on-screen information swiping across the screen. In a single motion, press the side of your hand on the screen and swipe form left to right. The image is then copied to the clipboard.
- **Mute/pause**: Once enabled, you can pause any on-screen video or mute any current sound by simply covering the screen with your hand. Once you remove your hand from the screen, the device goes back to normal by either continuing to play the current video or unmuting the current sound.

To activate Smart Screen:

The Smart screen options allow you to customize your screen settings to make the screen more responsive and easier to use.

1. From the Home screen, tap ➔ **Settings** ➔ **Controls** ➔ **Smart screen**.
2. Tap any of the following options to create a checkmark and activate the features:
   - **Smart stay**: disables the screen timeout if your phone detects that your face is watching the screen.
   - **Smart rotation**: disables the auto screen rotation by checking the orientation of your face and the device.
   - **Smart pause**: pauses videos when your device detects that your head has moved away from the screen.
   - **Smart scroll**: once your eyes have been detected, the screen will scroll according to your device's tilt angle. Tap the slider to the right of the Smart scroll field to activate the feature. With Smart scroll, the screen will scroll depending on the phone's tilt angle once your eyes have been detected.

To Increase touch sensitivity:

Activating this feature allows you to increase the screen's sensitivity to touching while wearing gloves.

1. From the Home screen, tap ➔ **Settings** ➔ **Controls**.
2. Place a check mark alongside the **Auto-adjust touch sensitivity** field to turn it on.

Add Account

This menu allows you to set up, manage, and synchronize accounts, including your Google and email accounts.

Adding an Account

1. From a Home screen, tap ➔ **Settings** ➔ **General** ➔ **Accounts** ➔ **Add account**.
2. Tap one of the account types.
3. Use the keyboard and follow the prompts to enter your credentials and set up the account.

   A green circle will appear next to the account type once you have created an account. Your account will also be displayed in the **My accounts** section of the main Accounts menu.

Removing an Account

Important! Removing an account also deletes all of its messages, contacts, and other data from the device.

1. From a Home screen, tap ➔ **Settings** ➔ **General** ➔ **Accounts**.
2. Tap the account which is located in the **My accounts** section.
3. Tap the account name.
4. At the bottom of the screen, tap **Remove account**, then tap **Remove account** at the prompt to remove the account and delete all its messages, contacts, and other data.

Synchronizing Accounts

Select the items you want to synchronize on your account such as Books, Calendar, Contacts, and more.

1. From a Home screen, tap ➔ **Settings** ➔ **General** ➔ **Accounts**.
2. Tap the account which is located in the **My accounts** section.
3. Tap the account name.
4. Tap **Sync now** to synchronize your account or only tap the Sync items that you want to synchronize.
5. Tap **Cancel sync** to stop the synchronization.
6. Tap **Account settings** to access your account settings.
7. Tap **Storage usage** to see your storage usage for different applications.

Backup and reset

The Back up and reset settings allow you to back up your data, back up accounts, automatically restore your phone, and reset your phone settings to the factory settings.

Back Up My Data

By setting this option, the Google server will back up all of your settings and data.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Back up and reset**.
2. Tap **Back up my data** to enable or disable back up of application data, WI-Fi passwords, and other settings to the Google server.

Backup Account

If you have enabled the **Back up my data** option, then the **Backup account** option is available.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Back up and reset**.
2. Tap **Backup account** and tap your Google Gmail account or tap **Add account** to set your Google Gmail account to be backed up to the Google server.

Automatic Restore

By setting this option, when you reinstall an application, all of your backed up settings and data will be restored.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Back up and reset**.
2. Tap **Automatic restore** to enable or disable automatic restoration of settings from the Google server.

Factory Data Reset

From this menu you can reset your phone and sound settings to the factory default settings.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Back up and reset**.
2. Tap **Factory data reset**.

   The Factory data reset screen displays reset information.
3. Tap **Reset device**, then follow the prompts to perform the reset.

Warning! Performing a Factory data reset will erase all data from your phone and internal SD card, including your Google account, system and application data and settings, and downloaded applications. It will not erase current system software, bundled applications, and external SD card files such as music and photos.

Date and time

This menu allows you to change the current time and date displayed.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Date and time**.
2. Tap **Automatic date and time** to allow the network to set the date and time.
3. Tap **Automatic time zone** to allow the network to set the time zone.

Important! Deactivate **Automatic date and time** to manually set the rest of the options.

4. Tap **Set date** and tap the up and down arrows to set the **Month**, **Day**, and **Year** then tap **Set**.
5. Tap **Set time** and tap the up and down arrows to set the **Hour**, **Minute**, and **PM/AM**, then tap **Set**.
6. Tap **Select time zone**, then tap a time zone.
7. Optional: Tap **Use 24-hour format**. If this is not selected the phone automatically uses a 12-hour format.
8. Tap **Select date format** and tap the date format type.

Accessory Settings

This menu allows you to select the Audio output mode when using a car or desk dock.

1. From the Home screen, tap → **Settings** → General → **General** → **Accessory**.
2. Tap **Dock sound** to play sounds when inserting or removing the phone from the dock.
3. Tap **Audio output mode** to use the external dock speakers when the phone is docked.
4. Tap **Desk home screen display** to display the desk home screen whenever the phone is docked.
5. Tap **Automatic unlock** if you are using a phone cover and you want your phone to unlock when you open the cover.
6. Tap **S View window color** to set the window color when you are using the optional S View protective cover.
7. Tap **Select info shown cover** to select the information that you want displayed when you are using the optional S View protective cover.
8. Tap **Audio output** to set your Audio output to Stereo or Surround.

Browser Bar

The Browser Bar enhances your browsing experience by providing contextual tools and quick access to your favorite content.

1. From a Home screen, tap → **Settings** → General → **General** → **Browser Bar**.
2. Select an option and follow the on-screen instructions to set up or modify your Browser Bar.

Application Manager

You can download and install applications from Play Store or create applications using the Android SDK and install them on your device. Use Application manager settings to manage applications.

Warning! Because this device can be configured with system software not provided by or supported by Google or any other company, end-users operate these devices at their own risk.

Memory Usage

See how memory is being used by Downloaded or Running applications.

1. From a Home screen, tap → **Settings** → General → **Application manager**.
2. Tap **DOWNLOADED**, **SD CARD**, **RUNNING**, or **ALL** to display memory usage for that category of applications.

   The graph at the bottom of the Downloaded tab shows used and free device memory. The graph at the bottom of the Running tab shows used and free RAM.

Downloaded

Displays apps you have downloaded onto your device.

1. From a Home screen, tap → **Settings** → General → **Application manager**.
2. Tap the **DOWNLOADED** tab to view a list of all the downloaded applications on your device.
3. To switch the order of the lists displayed in the Downloaded tabs, press → **Sort by size** or **Sort by name**.
4. To reset your application preferences, press → **Reset app preferences**.

Note: This will reset the preferences for disabled apps, disabled app notifications, default applications for actions, and background data restrictions for apps. You will not lose any app data.

5. Tap an application to view and update information about the application, including memory usage, default settings, and permissions.

SD Card

Displays apps you have downloaded onto your SD card.

1. From a Home screen, tap ➔ **Settings** ➔

General ➔ **Application manager**.
2. Tap the **SD CARD** tab to view a list of all the downloaded applications on your device.
3. To switch the order of the lists displayed in the On SD card tab, press ➔ **Sort by size** or **Sort by name**.
4. To reset your application preferences, press ➔ **Reset app preferences**.

Note: When you Reset app preferences, you will not lose any app data.

5. Tap an application to view and update information about the application, including memory usage, default settings, and permissions.

Running Services

View and control services running on your device.

1. From a Home screen, tap ➔ **Settings** ➔

General ➔ **Application manager**.
2. Tap the **RUNNING** tab. All the applications that are currently running on the device display.
3. Tap **Show cached processes** to display all the cached processes that are running. Tap **Show services in use** to switch back.
4. Tap one of the applications to view application information.

   The following options display:

   - **Stop**: Stops the application from running on the device. This is usually done prior to uninstalling the application.

Warning! Not all services can be stopped. Stopping services may have undesirable consequences on the application or Android System.

   - **Report**: Report failure and other application information.

Note: Options vary by application.

Default applications

Set the default applications for your TouchWiz home screen display and your Messaging.

1. From a Home screen, tap ➔ **Settings** ➔ **General** ➔ **Default applications**.
2. Tap **Home** and select **TouchWiz easy home** or **TouchWiz home** for your default.
3. Tap **Message** and set your default to the **Messaging** app or **Hangouts**.

Battery

See how much battery power is used for device activities.

1. From a Home screen, tap ➔ **Settings** ➔ **General** ➔ **Battery**.

   The battery level displays in percentage. The amount of time the battery was used also displays. Battery usage displays in percentages per application.
2. Tap **Screen**, **Android OS**, **Cell standby** or any other listed application to view how it is affecting battery use.

Note: Other applications may be running that affect battery use.

3. From the upper-right tap (**Refresh**) to update the list.
4. Tap the **Show battery percentage** check box to have the battery percentage displayed on your battery charge icon on your status bar.

Power saving mode

Power saving mode allows you to manage your phone to conserve power.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Power saving mode**.
2. Tap the **OFF / ON** icon next to **Power saving mode** to turn Power saving mode on .
3. Tap **Select when turned on** and tap **Always** or **Auto enable**.
4. Tap the following options to create a checkmark and conserve power:
   - **CPU power saving**: allows you to limit the maximum performance of the CPU.
   - **Screen power saving**: allows you to lower the screen power level.

- **Turn off haptic feedback**: allows you to turn off vibration when you tap or touch the screen.

5. Tap **Learn about power saving** to learn about various ways to conserve battery power.

Storage

From this menu you can view the memory allocation for the memory card and USB as well as mount or unmount the SD card.

For more information about mounting or unmounting the SD card, see *"Memory Card"* on page 43.

To view the memory allocation for your external SD card:

- From the Home screen, tap → **Settings** → **General** → **Storage**.The available memory displays under the **Total space** and **Available space** headings for both Device memory and SD card.

SD card

- Tap **Unmount SD card** to unmount your SD card so that you can safely remove it, then tap **OK**.

  – or –

1. Tap **Format SD card** to format your SD card. This will delete all data on your SD card including music, videos, and photos.
2. Tap **Format SD card** again.
3. Tap **Delete all** to continue or press to cancel.

Note: The **Format SD card** option is only available when your SD card is mounted.

Security

The Security settings allow you to determine the security level for your phone.

Encryption

To require a numeric PIN or password to decrypt your phone each time you power it on or encrypt the data on your SD card each time it is connected:

1. From the Home screen, tap ➔ **Settings** ➔

General ➔ **Security**.
2. You must first set up a screen lock type if you haven't already done so. For more information, refer to *"Screen Lock"* on page 101.
3. Tap **Encrypt device**. For more information, read the displayed help screen.
4. Tap **Encrypt external SD card** to enable the encryption on SD card data that requires a password be entered each time the microSD card is connected.

Tip: Make sure your battery is charged more than 80 percent. Encryption may take an hour or more.

Set up/change password

Use this option to set up your password when one is first required or change your current password.

1. From the Home screen, tap ➔ **Settings** ➔

General ➔ **Security** ➔ **Set up/change password**.
2. Enter a new password and tap **Confirm**.
3. Enter the new password again and tap **Confirm**.

Set up SIM card lock

Prevent another user from using your SIM card to make unauthorized calls or from accessing information stored on your SIM card by protecting the information using a PIN code.

When enabled, your phone will ask for a PIN number each time you use the phone. Using this option you can also change your SIM PIN number.

1. From the Home screen, tap ➔ **Settings** ➔

General ➔ **Security**.
2. Tap **Set up SIM card lock**.
3. Tap **Lock SIM card**, enter your SIM PIN code, then tap **OK**.

Note: You must activate Lock SIM card before you can change your SIM PIN code.

4. Tap **Change SIM PIN**.
5. Enter your old SIM PIN code and tap **OK**.
6. Enter your new SIM PIN code and tap **OK**.
7. Re-type your new SIM PIN code and tap **OK**.

Forgotten SIM PIN password

If you enter the wrong SIM PIN more than 3 times, you will need to contact your AT&T Customer Service Representative to get the PUK code for your device.

1. Each time you enter a wrong SIM PIN number the phone will display how many attempts you have remaining.
2. After the third incorrect attempt, **SIM is now disabled, Enter PUK code to continue. Contact carrier for details** displays and your SIM card is locked.
3. Enter the new PUK code that you received from your AT&T Customer Service Representative in the **PUK code** field.
4. Enter a new PIN code in the **Enter a new PIN** field and tap **OK**.
5. Enter the new PIN code again in the **Confirm your new PIN** field and tap **OK**.

Note: While your SIM PIN is locked, you will still be able to make Emergency calls if necessary.

Make passwords visible

When enabled, password characters display briefly as you touch them while entering passwords.

1. From the Home screen, tap ➔ **Settings** ➔

General ➔ **Security**.
2. Tap **Make passwords visible** to create a checkmark and enable or disable the display of password characters.

Device Administrators

The Device Administration feature allows you to select one or more administration applications that control your device for security purposes (for example, if your phone is lost of stolen). These applications enforce remote or local device security policies.

Some of the features a device administration application might control are:

- Setting the number of failed password attempts before the device is restored to factory settings.
- Automatically locking the device.
- Restoring factory settings on the device.

Note: If a device uses multiple enabled administration applications, the strictest policy is enforced.

1. From the Home screen, tap ➔ **Settings** ➔

General ➔ **Security**.
2. Tap **Device administrators**.
3. Select a device administrator and follow the prompts. If no device administrators are listed, you can download them from the Play Store.

Unknown sources

This feature allows you to download and install non-Market applications.

1. From the Home screen, tap ➔ **Settings** ➔

General ➔ **Security**.
2. Tap **Unknown sources**.

   A check mark is displayed to indicate it is active.

Warning! Enabling this option causes your phone and personal data to be more vulnerable to attack by applications from unknown sources.

Verify apps

This feature allows you to either block or warn you before installing apps that may cause harm to your phone.

1. From the Home screen, tap ➔ **Settings** ➔

General ➔ **Security**.
2. Tap **Verify apps**.

   A check mark is displayed to indicate it is active.

Change security level

This option allows you to set the security level for your phone.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Security** ➔ **Change security level**.
2. Select **High** or **Normal** (default).

Security policy updates

When you activate this feature, your phone will automatically check for changes to the security policy and download any updates to improve security and service.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Security**.
2. Tap **Security policy updates** to create a checkmark and activate the feature.

Send security reports

When you activate this feature, your phone will automatically send security reports to Samsung via Wi-Fi for threat analysis.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Security**.
2. Tap **Send security reports** to create a checkmark and activate the feature.

Storage type

This option allows you to select where you will back up your credentials.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Security** ➔ **Storage type**.
2. Select the backup storage location for your credentials.

Trusted Credentials

If a certificate authority (CA) certificate gets compromised or for some other reason you do not trust it, you can disable or remove it.

1. From the Home screen, tap ➔ **Settings** ➔ **General** ➔ **Security**.
2. Tap **Trusted credentials**.

The trusted credentials screen has two tabs:

- **System**: Displays CA certificates that are permanently installed in the ROM of your device.
- **User**: Displays any CA certificates that you installed, for example, in the process of installing a client certificate.

3. Tap a CA certificate to examine its details.
   A scrolling screen displays the details.
4. Scroll to the bottom of the details screen and tap **Turn off** to disable a System certificate or **Remove** to remove a User certificate.

Caution! When you disable a system CA certificate, the **Disable** button changes to **Enable**, so you can enable the certificate again, if necessary. When you remove a user-installed CA certificate, it is permanently deleted and must be re-installed, if needed.

5. Tap **OK** to return to the certificate list.
   When enabled, a check mark appears in the check box.

Install from phone storage

Install encrypted certificates from an installed memory card.

Note: You must have installed a memory card containing encrypted certificates to use this feature.

1. From the Home screen, tap → **Settings** → **General** → **Security**.
2. Tap **Install from phone storage**, then choose a certificate and follow the prompts to install.

Clear credentials

Clear stored credentials.

Note: This setting only appears if you have installed encrypted certificates.

1. From the Home screen, tap → **Settings** → **General** → **Security**.
2. Tap **Clear credentials** to remove all certificates.

About Device

This menu contains legal information, system tutorial information, and other phone information such as the model number, firmware version, baseband version, kernal version, and software build number.

To access phone information:

1. From the Home screen, tap ➔ **Settings** ➔ 
General ➔ **About device**.
2. The following information displays:
   - **Software update**: allows you to update your phone software, if available. For more information, refer to *"Software Update"* on page 140.
   - **Status**: displays the Battery status, Battery level (percentage), Network, Signal strength, Mobile network type, Service state, Roaming status, Mobile network state, the phone number for this device (My phone number), IMEI number, IMEISV number, IP address, Wi-Fi MAC address, Bluetooth address, Serial number, Up time, and Device status.
   - **Legal information**: This option displays information about Open source licenses, Google legal information, and Samsung legal information. This information clearly provides copyright and distribution legal information and facts as well as Google Terms of Service, Terms of Service for Android-powered Phones, and much more pertinent information as a reference. Read the information and terms, then press to return to the Settings menu.
   - **Device name**: displays the phone's model name.
   - **Model number**: displays the phone's model number.
   - **Android version**: displays the android version loaded on this handset.
   - **Baseband version**: displays the baseband version loaded on this handset.
   - **Kernel version**: displays the kernel version loaded on this handset.
   - **Build number**: displays the software, build number.
   - **SE for Android status**: displays the Security Enhancement status of your device.
   - **Security software version**: displays the version of the latest security software.

Note: Baseband, kernal and build numbers are usually used for updates to the handset or support. For additional information please contact your AT&T service representative.

Software Update

The AT&T Software Update feature enables you to use your phone to connect to the network and upload any new phone software directly to your phone. The phone automatically updates with the latest available software when you access this option.

1. From the Home screen, tap ➔ **Settings** ➔

General ➔ **About device** ➔ **Software update**.
2. Tap **Check for updates**.
3. At the **AT&T Software update** prompt, tap **OK** to continue.
4. The phone automatically updates the software (if available), otherwise, when the **Current software is up to date** prompt is displayed, tap **OK**.
5. When updating software, once the update file is downloaded, you can delay the update on the start screen by postponing it for a certain period of time. If you want to resume the update before the selected time, tap **Continue update**.

Section 7: Messaging

This section describes how to send and receive different types of messages. It also includes the features and functionality associated with messaging.

Types of Messages

Your phone provides the following message types:

- Text Messages
- Multimedia (Picture, Video, and Audio) Messages
- Email and Gmail Messages
- AT&T Messages
- Hangouts
- Google+ Messages
- ChatON

The Short Message Service (SMS) lets you send and receive text messages to and from other mobile phones or email addresses. To use this feature, you may need to subscribe to your service provider's message service.

The Multimedia Messaging Service (MMS) lets you send and receive multimedia messages (such as picture, video, and audio messages) to and from other mobile phones or email addresses. To use this feature, you may need to subscribe to your service provider's multimedia message service.

Important! When creating a message, adding an image, a sound file, or a video clip to a text message changes the message from a text message to a multimedia message.

Messaging icons are displayed at the top of the screen and indicate when messages are received and their type. For more information, refer to *"Indicator Icons"* on page 24.

Creating and Sending Messages

1. From the main Home screen, tap **Messaging** → **Compose**.

Note: The main Home screen initially contains the **Messaging** icon. If you delete it, or if you want to access Messaging from another Home screen, you must tap **Apps** → **Messaging**.

2. Tap on the **Enter recipient** field to manually enter a recipient or tap to select a recipient from your Contacts.
3. If adding a recipient from your Contacts, tap the contact to place a checkmark then tap **Done**.

   The contact will be placed in the recipient field.

Note: For the Group option, if the number of recipients is less than 10, all members in the group will be added. You will need to delete any unnecessary members in the list by selecting the trash can icon and deleting unwanted entries.

4. Tap the **Enter message** field and use the on-screen keypad to enter a message. For more information, refer to *"Entering Text"* on page 44.
5. Add more recipients by tapping the **Enter recipient** field.
6. Review your message and tap **Send**.

Note: If you exit a message before you send it, it will be automatically saved as a draft.

Messaging Options

Options before composing a message

1. From the main Home screen, tap **Messaging**.
2. Before composing a message, press to reveal additional messaging options:
   - **Search**: allows you to search through all of your messages for a certain word or string of words. Enter a search string in the Messaging Search window and tap .
   - **Delete threads**: allows you to delete any message thread. Select the messages to delete and a green checkmark will appear next to the message. Tap **Delete**.
   - **Draft messages**: displays the draft messages folder and its contents.

- **Locked messages**: displays the locked messages folder and its contents.
- **Scheduled messages**: displays the scheduled messages folder and its contents.
- **Spam messages**: displays the spam messages folder and its contents.
- **Font size**: allows you to set the size of your letters when messaging.
- **Settings**: allows you to access Messaging settings. For more information, refer to *"Messaging Settings"* on page 147.

Options while composing a message

1. While composing a message, press to reveal additional messaging options.
   - **Insert smiley**: allows you to add emoticons, such as a happy face to your message.
   - **Add text**: allows you to copy text from your contacts, calendar, or from a memo to add to your message. This is a convenient feature for adding names, phone numbers, events, etc. to your message. For more information, refer to *"Adding Additional Text"* on page 145.
   - **Add to Contacts**: allows you to add the recipient to your Contacts list. This option only appears if the recipient is not already in your Contacts list.
   - **View contact**: allows you to see information on the recipient. This option only appears if the recipient is in your Contacts list.
   - **Add slide**: allows you to add a new page to a message.
   - **Add recipients**: allows you to add additional recipients.
   - **Scheduling**: allows you to schedule a time for the current message to be delivered.
   - **Add to spam numbers**: allows you to register the number as spam.
   - **Remove from spam numbers**: allows you to unregister a number from the spam number list. This option only appears if the number was previously registered as spam.
   - **Discard**: allows you to delete the message.
   - **Font size**: allows you to set the size of your letters when messaging.

Note: You must be logged into your Samsung account prior to using the S Translator feature.

- **Translate**: launches a Translate popup menu. Here you can both assign the sender's original language and assign a target language for the recipient (they will receive your message in the designated language). Enable the translate feature then configure the available options as desired. Tap **OK** to store the new settings.

Adding attachments to a message

To add an attachment to your message, tap and select one of the following options:

- **Image**: allows you to tap an existing image from your Pictures list to add it to your message.
- **Take picture**: allows you to temporarily exit the message, take a photo with phone's camera, and then add it to your message by tapping **Save**.
- **Video**: allows you to choose an existing video from the Videos list, then add it to your message.
- **Record video**: allows you to temporarily exit the message, record a video clip using the phone's camera, and then add it to your message by tapping **Save**.
- **Audio**: allows you to choose an existing audio file from the Audio list, then add it to your message by tapping the circle to the right of the audio so that it turns green, then tapping **Done**.
- **Record audio**: allows you to temporarily exit the message and record an audio clip using the phone's microphone. It is then automatically attached to the message.
- **S Note**: allows you to add an S Note that you have created.
- **Scrapbook**: allows you to add an attachment from your Scrapbook.
- **Calendar**: allows you to add an event from your calendar. Select the desired event and tap **Done**.
- **Location**: allows you to attach a thumbnail of a map showing your location.
- **Contacts**: allows you to tap on an existing Address Book entry, then add it to your message by tapping **Done**.

Adding Additional Text

You can copy text such as names, phone numbers, and events from your Contacts, Calendar or a Memo.

1. While composing a message, press ➔ **Add text**.
2. At the Add text screen, select one of the following:
   - **S Note**: allows you to insert text from an existing S Note.
   - **Calendar**: allows you to add the name, date, and time of a calendar event to your message.
   - **Location**: allows you to add an address and the link to the location on Google Maps.
   - **Contacts**: allows you to add the name and phone number of any of your contacts to your message.
   - **Text templates**: allows you to add pre-defined phrases and sentences.

   The information is added to your message.

Viewing New Received Messages

1. When you receive a new message, the new message icon will appear at the top of your screen.
2. Open the Notification Panel and select the message. For more information, refer to *"Notification Panel"* on page 42.

   – or –

   From the main Home screen, tap **Messaging** then tap the new message to view it.

   The selected message appears in the display.
3. To play a multimedia message, tap .
   - To pause playback of the multimedia message, tap .
4. To scroll through the message (if additional text pages have been added), touch the screen and in a single motion, scroll up or down the page.

Message Threads

Sent and received text and picture messages are grouped into message threads. Threaded messages allow you to see all the messages exchanged (similar to a chat program) and displays a contact on the screen. Message threads are listed in the order in which they were received, with the latest message displayed at the top.

To open a threaded message follow these steps:

1. From the main Home screen, tap **Messaging** . Tap the message thread you want to view.
2. Touch and hold the message thread to display the following options:
   - **View contact**: displays the contact's information. This option only displays if the sender is in your Contacts list.
   - **Add to Contacts**: displays the Contacts information screen. This option only displays if the sender is not in your Contacts list.
   - **Delete**: displays a confirmation dialog box that when pressed, deletes the entire thread.
   - **Add to spam numbers**: allows you to register the number as spam.
   - **Remove from spam numbers**: allows you to unregister a number from the spam number list. This option only appears if the number was previously registered as spam.

Deleting Messages

Deleting a single message thread

1. From the main Home screen, tap **Messaging** .
2. Touch and hold a message, then tap **Delete**.
3. At the **Delete** prompt, tap **OK** to delete or **Cancel** to cancel.

Deleting multiple message threads

1. From the main Home screen, tap **Messaging** .
2. Press ➔ **Delete threads**.
3. Tap each message you want to delete. A checkmark will appear beside each message you select.
4. Tap **Delete**.
5. At the **Delete** prompt, tap **OK** to delete or **Cancel** to cancel.

Message Search

You can search through your messages by using the Message Search feature.

1. From the main Home screen, tap **Messaging** .
2. Tap ➔ **Search**.
3. Use the on-screen keypad to enter a word or phrase to search for, then tap .
4. All messages that contain the search string you entered are displayed.

Messaging Settings

To configure the settings for text messages, multimedia messages, Voice mails, and Push messages.

1. From the main Home screen, tap **Messaging** ➔ ➔ **Settings**.
2. Tap **Default messaging app** and set your default to the **Messaging** app or **Hangouts**.
3. The following message settings are available under three different tabs:

General Tab:

- **Delete old messages**: deletes old messages when the limit is reached, rather than having them overwritten.
- **Text message limit**: allows you to set a limit on how many text messages can be in one conversation.
- **Multimedia message limit**: allows you to set a limit on how many multimedia messages can be in one conversation.
- **Text templates**: allows you to edit or add new text templates to use in your messaging.
- **Bubble style**: allows you to choose from several bubble styles for your messages. Bubbles are the rounded boxes that surround each message.
- **Background style**: allows you to choose from several background styles for your messages.
- **Split view**: when in Landscape mode, allows you to view both the message list and the contents of the currently selected message.
- **Use the volume key**: allows you to change the text size by using the up or down volume keys.
- **Add signature**: when enabled, this feature allows you to create a signature at the end of your outgoing text messages.

- **Signature text**: allows you to enter a desired signature for your message.

SMS/MMS Tab:

- **Manage SIM card messages**: allows you to manage the messages that you have stored on your SIM card.
- **Message center**: allows you to enter the number of your Message center where your messages reside while the system is attempting to deliver them.
- **Input mode**: allows you to set the input mode for your text messages. Choose between GSM Alphabet, Unicode, or Automatic.
- **Group messaging**: allows you to send a single message to multiple recipients.
- **Auto retrieve**: allows the message system to retrieve messages automatically.
- **Creation mode**: allows you to select the creation mode, Free, Restricted, or Warning.
  - **Restricted**: you can only create and submit messages with content belonging to the Core MM Content Domain.
  - **Warning**: the phone will warn you via pop up messages that you are creating a multimedia message which does not fit the Core MM Content Domain.
  - **Free**: you may add any content to the message.
- **MMS alert**: allows you to receive an alert when MMS mode becomes active.

More Tab:

- **Push messages**: allows you to receive push messages from the network.
- **CB activation**: allows you to receive Cell Broadcast (CB) messages.
- **Channel configuration**: allows you to set up the channel that you will receive CB messages on.
- **Notifications**: allows you to see message notifications on your status bar.
- **Select ringtone**: allows you to set the ringtone for your message notifications.
- **Vibrate**: allows you to configure the vibration mode associated with message alerts.

- **Message alert repetition**: allows you to set the interval for new message alerts. Choose from: Once, Every 2 minutes, or Every 10 minutes.
- **Preview message**: when enabled, allows you to view a preview of new message text on the Status bar.
- **Emergency alerts**: allows you to receive wireless emergency alerts from the Commercial Mobile Alerting System (CMAS). For more information, refer to *"Emergency Alerts"* on page 149.
- **Emergency notification preview**: allows you to play the emergency alert tone so you will know what to expect when an alert is received.
- **Alert reminder**: allows you to set reminders after you receive an alert. You can select Once, Every 2 minutes, Every 15 minutes, or Off (default).
- **Spam settings**: when enabled, allows you to configure available spam settings such as:
- **Add to spam numbers**: allows you to manually enter and assign a phone number as being sent from a spam source.
- **Add to spam phrases**: allows you to assign a specific text phrase as belonging to a spam message. Ex: Dear friend.
- **Block unknown senders**: when active, automatically blocks incoming messages from unknown sources or blocked numbers.

Emergency Alerts

This device is designed to receive wireless emergency alerts from the Commercial Mobile Alerting System (CMAS) which may also be known as the Personal Localized Alerting Network (PLAN). If your wireless provider has chosen to participate in CMAS/PLAN, alerts are available while in the provider's coverage area. If you travel outside your provider's coverage area, wireless emergency alerts may not be available. For more information, please contact your wireless provider.

Emergency Alerts allows customers to receive geographically-targeted messages. Alert messages are provided by the US Department of Homeland Security and will alert customers of imminent threats to their safety within their area. There is no charge for receiving an Emergency Alert message.

There are three types of Emergency Alerts:

- Alerts issued by the President
- Alerts involving imminent threats to safety of life (Extreme and Severe)

- AMBER Alerts (missing child alert)

Customers may choose not to receive Imminent Threats (Extreme and Severe) and AMBER Alerts. Alerts issued by the President can not be disabled. To disable Imminent Threats and AMBER Alerts, follow the instructions below:

1. From the main Home screen, tap **Messaging** .
2. Press ➔ **Settings** ➔ **More** tab.
3. Scroll to the bottom and tap **Emergency alerts**.
4. All alerts are enabled by default (checkmark showing). Tap on an alert option to disable the alert and remove the checkmark.

Using Email

Email enables you to review and create email using various email services. You can also receive text message alerts when you receive an important email.

Creating an Email Account

1. From the Home screen, tap ➔ **Email** .
   Your accounts screen displays with an Email setup screen displayed.
2. Enter you email address in the **Email address** field.
3. Enter your password in the **Password** field.
4. If you want to see your password as it is being typed, tap **Show password** to create a checkmark.
5. Tap **Next**.
6. At the **Account options** screen, tap any of the options you would like.
7. Tap **Next**.
8. Enter a name for this email account (optional).
9. Tap **Done**.

Creating a Corporate Email Account

Use the following procedure to configure your phone to synchronize with a corporate email account.

1. From the Home screen, tap ➔ **Email** .
   Your accounts screen displays with an Email setup screen displayed.
2. Enter you email address in the **Email address** field.
3. Enter your password in the **Password** field.
4. If you want to see your password as it is being typed, tap **Show password** to create a checkmark.
5. If you want all of your emails sent from this email account by default, tap checkbox to create a checkmark.

6. Tap **Manual setup**.
7. Tap the **Microsoft Exchange ActiveSync** field.
8. Enter all the Exchange server information, Domain, User name and Password, then tap **Next**.
9. At the **Activation** prompt, tap **OK**.
   The **Account options** screen is displayed.
10. Enter the desired information in the different fields, then tap **Next**.
11. Enter an Account name for this account (Optional) and tap **Done**.
    Wait for the Inbox to synchronize before use.
12. Press ➔ **Settings** to change the account settings.

Creating Additional Email Accounts

To create additional email accounts after setting up your first account, follow these steps:

1. From the Home screen, tap ➔ **Email**.
   Your Email screen displays showing your emails from the active account.
2. Press ➔ **Settings**.
3. Tap **Add account** to add another email account.
4. Enter the information required to set up another account. For more information, refer to *"Creating an Email Account"* on page 150.

Switching Between Email Accounts

1. From the Home screen, tap ➔ **Email**.
   Your Email screen displays showing your emails from the active account.
2. Tap the Inbox button at the top of your screen that displays the optional name you assigned to your active email account, for example, Work, Gmail, etc.
   Your Email accounts screen is displayed.
3. Tap the Email account you would like to switch to. You can also select **Combined view** which will display email messages from all accounts.
4. The new Email account is displayed.

Using Gmail

Gmail is Google's web-based email. When you first setup the phone, Gmail is configured. Depending on the synchronization settings, Gmail is automatically synchronized with your Gmail account.

Signing into Your Gmail

Note: You must sign in to your Gmail account in order to access Gmail.

1. Sign on to your Google account if you are not already signed on. For more information, refer to *"Creating a New Google Account"* on page 13.
2. From the Home screen, tap → **Gmail** .
3. Follow the on-screen instructions.
   The Inbox loads conversations and email.

Creating a Gmail Message

1. From the Gmail Inbox, tap at the bottom of the screen to create a new message.
2. Enter the recipients Email address in the **To** field. Separate multiple recipient email addresses with a comma.
3. Tap and select **Add Cc/Bcc** to add a carbon or blind copy.
4. Enter the subject of this message in the **Subject** field.
5. Tap the **Compose email** field and begin composing your message.
6. Tap to send.

Viewing a Gmail Message

1. From the Gmail Inbox, tap a message to view it.
2. The following options are available after a message has been selected:
   - **Archive** : archives the selected message.
   - **Delete** : deletes the message.
   - **Mark Unread** : after reading a message, marks as unread.
   - **Newer**: swipe your screen to the right to see newer messages.
   - **Older**: swipe your screen to the left to see older messages.
3. Press for additional options.

Hangouts

Hangouts is a free Windows and web-based application for instant messaging offered by Google. You can connect with your friends across computers and various Android devices. You can have conversations or video calls with up to 10 friends.

Note: The first time you use Hangouts, you will need to download the updated application from the Play Store. When the Play Store page displays, tap **Update**. For more information, refer to *"Play Store"* on page 189.

1. Log on to your Google account if you have not already done so. For more information, refer to *"Creating a New Google Account"* on page 13.
2. From the Home screen, tap ➔ **Hangouts** .
3. The first time you access Hangouts, tap **Confirm** to confirm your mobile number. If the number is not correct, tap **Edit Number** to change it.
4. Begin using Hangouts.
5. Press ➔ **Help** for more information on using Hangouts.

Google +

Google+ makes messaging and sharing with your friends a lot easier. You can set up Circles of friends, visit the Stream to get updates from your Circles, use Messenger for fast messaging with everyone in your Circles, or use Instant Upload to automatically upload videos and photos to your own private album on Google+.

1. Sign on to your Google account. For more information, refer to *"Creating a New Google Account"* on page 13.
2. From the Home screen, tap ➔ **Google+** .
3. Select the account you want to use to sign in to Google+.

   – or –

   Tap **Add account** to create another account.
4. Follow the on-screen instructions to use Google+.
5. Visit www.google.com/mobile/+/ for more information.

AT&T Messages App

AT&T Messages brings your texts, calls, and voicemail messages together into a single conversation thread and is accessible by phone or computer.

1. From the Home screen, tap ➔ **Messages** .
2. The first time you use AT&T Messages, tap **Update AT&T Messages**.
3. Sign on to your Google account if you are not already signed on. For more information, refer to *"Creating a New Google Account"* on page 13.

Note: The first time you use the AT&T Messages app, you will need to download the updated application from the Play Store. When the Play Store page displays, tap **Update** then follow the on-screen instructions. For more information, refer to *"Play Store"* on page 189.

---

4. At the **Legal stuff...** screen, tap **Accept** to continue.
5. Tap **Call Voicemail** to record a personal greeting and set up your app.
6. Follow the on-screen instructions to use the AT&T Messages app.

ChatON

Provides a global mobile communication service where you can chat with more than 2 buddies via a group chat. Share things such as pictures, videos, animation messages (Scribbles), audio, Contacts, Calendar entries, and Location information.

For more information, visit: https://web.samsungchaton.com.

1. Sign on to your Google account if you are not already signed on. For more information, refer to *"Creating a New Google Account"* on page 13.
1. From the Home screen, tap ➔ **ChatON** .
2. The first time you access the ChatON application, read the Terms and conditions and the Privacy policy, then tap **Accept**.
3. Follow the on-screen instructions to use ChatON.

Section 8: Connections

This section describes the various connections your phone can make including accessing Wi-Fi, Bluetooth, and Connecting your PC.

Wi-Fi

About Wi-Fi

Wi-Fi (short for "wireless fidelity" and sometimes referred to as wifi) is a term used for certain types of Wireless Local Area Networks (WLAN). These device types use an 802.11 wireless specification to transmit and receive wireless data. Wi-Fi communication requires access to an existing and accessible Wireless Access Point (WAP). These WAPs can either be Open (unsecured) as within most Hot Spots, or Secured (requiring knowledge of the Router name and password).

Turning Wi-Fi On

By default, your device's Wi-Fi feature is turned off. Turning Wi-Fi on makes your device able to discover and connect to compatible in-range WAPs.

1. From the Home screen, tap ➔ **Settings** ➔

Connections ➔ **Wi-Fi**.
2. Tap the ON/OFF slider, located to the right of the Wi-Fi field, to turn Wi-Fi ON

.

Connect to a Wi-Fi Network

1. From the Home screen, tap ➔ **Settings** ➔

Connections ➔ **Wi-Fi**.
The network names and security settings (Open network or Secured with WEP) of detected Wi-Fi networks are displayed in the Wi-Fi networks section.
2. Tap the network you want to connect to.

Note: When you select an open network, you will be automatically connected to the network.

3. Enter a wireless password if necessary.

Manually add your new network connection

1. From the Home screen, tap ➔ **Settings** ➔

Connections ➔ **Wi-Fi**.
2. Tap **Add Wi-Fi network**.

3. Enter the **Network SSID**. This is the name of your Wireless Access Point.
4. Tap the **Security** field and select a security option. This must match the current security setting on your target WAP.
5. If secured, you will also need to enter your WAP's password.
6. Tap **Show advanced options**, if you need to add advanced options such as Proxy settings, IP settings, or Key management.
7. Tap **Connect** to store the new information and connect to your target WAP.

Note: The next time your device connects to a previously accessed or secured wireless network, you are not prompted to enter the WAP key again, unless you reset your device back to its factory default settings.

Turning Wi-Fi Off

1. From the Home screen, tap → **Settings** → **Connections** → **Wi-Fi**.
2. Tap the ON/OFF slider, located to the right of the Wi-Fi field, to turn Wi-Fi OFF .

Note: Use of wireless data connections such as Wi-Fi and Bluetooth can cause an added drain to your battery and reduce your use times.

Manually Scan for a Wi-Fi Network

1. From the Home screen, tap → **Settings** → **Connections** → **Wi-Fi**.
2. Tap **Scan**.

   All available Wi-Fi networks are displayed.

Wi-Fi Status Indicators

The following icons show your Wi-Fi connection status at a glance:

Displays when Wi-Fi is connected, active, and communicating with a Wireless Access Point (WAP).

Displays when there is a Wi-Fi access point available but you are not connected to it. May also display if there is a communication issue with the target Wireless Access Point (WAP).

Displays when connected to another device using Wi-Fi Direct. For more information, refer to *"Wi-Fi Direct"* on page 158.

Wi-Fi Advanced Settings

The Advanced Wi-Fi menu allows you to set up many of your device's advanced Wi-Fi services.

1. From the Home screen, tap ➔ **Settings** ➔

Connections ➔ **Wi-Fi**.
2. Press ➔ **Advanced**.

   The following options are available:

   - **Network notification**: alerts you when a new WAP is available.
   - **Passpoint**: allows you to connect to passpoint-enabled Wi-Fi Access Points automatically. Touch and slide the slider to the right to turn it on

.
   - **Sort by**: allows you to sort by alphabet or RSSI.
   - **Keep Wi-Fi on during sleep**: allows you to specify when to disconnect from Wi-Fi.
   - **Always allow scanning**: allows the Google location service and other apps to scan for networks, even when Wi-Fi is turned off.
   - **Auto network switch**: allows the device to automatically switch between a Wi-Fi network or a cellular network.
   - **Auto connect**: allows you to be automatically connected to an AT&T Wi-Fi Hotspot as soon as your phone detects it.
   - **Install certificates**: allows you to install security certificates that you have on a MicroSD card.
   - **MAC address**: view your device's MAC address, required when connecting to some secured networks (not configurable).
   - **IP address**: view your device's IP address.

Wi-Fi Direct

Wi-Fi Direct allows device-to-device connections so you can transfer large amounts of data over a Wi-Fi connection.

Note: See your service plan for applicable charges for Wi-Fi Direct.

1. From the Home screen, tap ➔ **Settings** ➔

Connections ➔ **Wi-Fi**.
2. Tap the ON/OFF slider, located to the right of the Wi-Fi field, to turn Wi-Fi ON

.
3. At the bottom of the Wi-Fi screen, tap the **Wi-Fi Direct** button.
4. Repeat **steps 1 - 3** on the other device you want to connect with. The steps on a different model of phone, may be different.
5. On your phone, tap **Scan**.

   The device scans for other Wi-Fi Direct devices.
6. Once the device you want to connect to is displayed, tap on it to create a checkmark, then tap **Done**.
7. The other device has 2 minutes to tap **Connect** for the connection to be made.
8. Once connected, the other device will show as **Connected** in your list of Wi-Fi Direct devices and the icon will display at the top of your screen.

Sharing Information with Connected Device

To share Videos, Photos, or other information with the connected device, follow these steps:

1. View the information that you want to share. For example, if you want to share a photo, find the photo in your camera viewer or **My Files** folder, then tap the **Share, Share via,** or **Send via** option.
2. Tap the **Wi-Fi Direct** option.
3. Tap the connected device name to create a checkmark. For example, Android_49ba.
4. Tap **Done**.
5. The file is transferred and the other device will receive a screen notification that a Wi-Fi file has been received. The file can be found in the **My Files** ➔ **All** ➔ **ShareViaWiFi** folder.

Note: Depending on the other device model, the prompts and shared folder information may differ.

AT&T Smart Wi-Fi

With AT&T Smart Wi-Fi, you can maximize your battery performance, maximize your data, simplify access to AT&T Hot Spots and Wi-Fi networks, automate your Wi-Fi connections, and track your data use.

1. From the Home screen, tap ➔ **AT&T Smart Wi-Fi** .
2. The first time you access AT&T Smart Wi-Fi, you will need to install it. Tap **OK** at the prompt.
3. Sign on to your Google account if you have not already done so.
4. The Play Store displays the **AT&T Smart Wi-Fi** application. Tap **Update**.
5. Tap **Accept & download**.
6. Follow the on-screen instructions to use AT&T Wi-Fi.

   For more information on how to use this application, go to www.att.com/smartwifi.

NFC

NFC (Near Field Communication) allows data exchange when you touch your device with another compatible device. This is used for applications such as S Beam and Android Beam. To activate NFC on your device, see *"NFC"* on page 94.

Bluetooth

About Bluetooth

Bluetooth is a short-range communications technology that allows you to connect wirelessly to a number of Bluetooth devices, such as headsets and hands-free car kits, and Bluetooth-enabled handhelds, computers, printers, and wireless devices. The Bluetooth communication range is usually up to approximately 30 feet.

Turning Bluetooth On and Off

To turn Bluetooth on:

1. From the Home screen, tap ➔ **Settings** ➔ **Connections**.
2. Tap the ON/OFF slider, located to the right of the Bluetooth field, to turn Bluetooth ON .

   When active, appears within the Status area.

To turn Bluetooth off:

1. From the Home screen, tap → **Settings** → **Connections**.
2. Tap the ON/OFF slider, located to the right of the Bluetooth field, to turn Bluetooth OFF.

Bluetooth Status Indicators

The following icons show your Bluetooth connection status at a glance:

Displays when Bluetooth is active.

Displays when Bluetooth is connected (paired) and communicating.

Bluetooth Settings

The Bluetooth settings menu allows you to set up many of the characteristics of your device's Bluetooth service, including:

- Entering or changing the name your device uses for Bluetooth communication and description
- Setting your device's visibility (or "discoverability") for other Bluetooth devices

To access the Bluetooth Settings menu:

1. From the Home screen, tap → **Settings** → **Connections**.
2. Verify your Bluetooth is ON.
3. Tap **Bluetooth**.

To change your Bluetooth name:

1. From the Home screen, tap → **Settings** → **General** → **About device** → **Device name**.
2. Use the keyboard to modify your device name and tap **OK**.

To make your device visible:

1. From the Bluetooth settings page, press → **Visibility timeout**.
   - Making your device visible allows it to be detected by other devices for pairing and communication.
2. Select a time that you would like your device visibility to time-out.

To show received files:

- From the Bluetooth settings page, press → **Received files**.

  A list of all files received from Bluetooth is displayed.

To scan for Bluetooth devices:

1. Verify your Bluetooth is active.
2. From the Bluetooth settings page, tap **Scan** to search for visible external Bluetooth-compatible devices such as headsets, devices, printers, and computers.

Pairing Bluetooth Devices

The Bluetooth pairing process allows you to establish trusted connections between your device and another Bluetooth device. When you pair devices, they share a passkey, allowing for fast, secure connections while bypassing the discovery and authentication process.

To pair your device with another Bluetooth device:

1. Verify your Bluetooth is active.
2. Tap **Scan**. Your device will display a list of discovered in-range Bluetooth devices.
3. Tap a device from the list to initiate pairing.
4. Enter the passkey or PIN code, if needed, and tap **OK**.
5. The external device will then have to also accept the connection and enter your device's PIN code.

   Once successfully paired to an external device, appears within the Status area.

Note: Due to different specifications and features of other Bluetooth-compatible devices, display and operations may be different, and functions such as transfer or exchange may not be possible with all Bluetooth compatible devices.

Note: Pairing between two Bluetooth devices is a one-time process. Once a pairing has been created, the devices will continue to recognize their partnership and exchange information without having to re-enter a passcode again.

Disconnecting a paired device

Disconnecting a paired device breaks the connection between the device and your phone, but retains the knowledge of the pairing. At a later point when you wish to reconnect the device, there is no need to setup the connection information again.

1. Verify your Bluetooth is active.
2. From the Bluetooth settings page, tap the previously paired device (from the bottom of the page).
3. Tap **OK** to confirm disconnection.

Note: Disconnections are manually done but often occur automatically if the paired device goes out of range of your phone or it is powered off.

Deleting a paired device (unpair)

Deleting a device from your list removes its "connection record" and upon reconnection would require that you re-enter all the previous pairing information.

1. Verify your Bluetooth is active.
2. From the Bluetooth settings page, tap next to the previously paired device. This opens the connected device's menu options.
3. Tap **Unpair** to delete the paired device.
4. Tap **Rename** to change the name of the paired device.
5. Tap **Call audio** to enable or disable call audio from the paired device.
6. Tap **Media audio** to enable or disable media audio from the paired device.

Sending Contacts via Bluetooth

Depending on your paired devices' settings and capabilities, you may be able to send pictures, Contact information, or other items using a Bluetooth connection.

Note: Prior to using this feature, Bluetooth must first be enabled, and the recipient's device must be visible.

1. Verify your Bluetooth is active.
2. From the Home screen, tap **Contacts** .
3. Press ➔ **Share namecard via**.
4. Tap each contact that you would like to send via Bluetooth. A green checkmark will appear next to each entry you select.
5. Tap **Done**.
6. Tap **Bluetooth**.
7. Select the paired device to send the contacts to.

Note: The external Bluetooth device must be visible and communicating for the pairing to be successful.

8. A Bluetooth share notification will appear in your notifications list.

PC Connections

You can connect your device to a PC using your PC data cable using various USB connection modes.

Media device (MTP): allows you to transfer media files in Windows, or using an Android file transfer on a Mac.

Camera (PTP): allows you to transfer photos using the camera software, and transfer any files onto a PC that does not support MTP.

Media device (USB 3.0): allows you to transfer media files in Windows with USB 3.0, or using an Android file transfer on a Mac with USB 3.0.

Kies: allows you to manage music, movies and photos. You can also backup precious contacts and calendars, download apps and podcasts and automatically upgrade device firmware. Kies conveniently syncs your life across all your devices.

Caution! Using USB 3.0 increases the data transfer speed, but may cause an unstable network connection. If the USB 3.0 connection mode is not in use for ten minutes, it will be automatically switched to the USB 2.0 connection mode.

Note: To sync your device to your PC, it is highly recommended that you install Samsung Kies which is available at http://www.samsung.com/kies (for Windows/ Mac).

Note: If you are a Windows XP user, ensure that you have Windows XP Service Pack 3 or higher installed on your computer. Also, ensure that you have Samsung Kies 2.0 or Windows Media Player 10 or higher installed on your computer.

Connecting as a Storage Device

You can connect your device to a PC as a removable disk and access the file directory. If you insert a memory card in the device, you can also access the files directory from the memory card by using the device as a memory card reader.

Note: The file directory of the memory card displays as a removable disk, separate from the internal memory.

1. Connect the USB cable to the device and connect the cable to the computer. After a few seconds, a pop-up window displays on the PC when connected.
2. On the PC pop-up, click **Open device to view files**.
3. Copy files from the PC to the memory card.

Enabling the USB 3.0 Connection

1. Connect the USB 3.0 cable to an active 3.0 USB port.

Important! The 3.0 configuration option will not be displayed if you cable is not plugged into an Active USB 3.0 port or if it is plugged into a USB 2.0.

2. In a single motion, touch and drag the Status bar to the bottom of the screen to open the Notifications panel.
3. Tap the **Media device (USB3.0)** field to place a checkmark and activate the USB 3.0 connectivity mode. The USB 3.0 icon is displayed on your status bar .
4. Read the on-screen information and tap **Use USB 3.0** to initiate the mode.

To return to USB 2.0 connectivity mode:

- Tap either the MTP or PTP fields to re-enable USB 2.0 connectivity.

Section 9: Applications

This section contains a description of each application that is available in the Apps Menu, its function, and how to navigate through that particular application. If the application is already described in another section of this user manual, then a cross reference to that particular section is provided.

Note: This manual only addresses applications that have been loaded on your device as of the date of purchase. Information concerning third party applications that you may choose to download from the Google Play Store or otherwise should be obtained from the application provider directly and not from Samsung.

Tip: To open applications quickly, add the icons of frequently-used applications to one of the Home screens. For details, see *"Customizing Your Home Screen"* on page 37.

Application Icons

The Apps menu provides quick access to the items you use most frequently.

The following table contains a description of each application. If the application is already described in another section of this user manual, then a cross reference to that particular section is provided.

For information on navigating through the Apps icons, see *"Navigating Through the Application Menus"* on page 31.

1. From the Home screen, tap , then tap one of the application icons.
2. Follow the on-screen instructions.
3. To return to the main Home screen, tap .

Action Memo

Action Memo allows you to quickly write memos and link them to actions such as making a call, sending, a message, or searching the web.

1. From the Home screen, tap ➔ **Action Memo** .
2. Tap an existing Memo to open it then tap the screen to enter edit mode.

   – or –

   Tap (**Create**) to create a new action memo.
3. Use the on-screen options to create your memo.
4. Tap (**Save**) to store the new memo.

The icons that you see displayed on the screen are described in the following table:

Allows you to add free-format drawing and change the input color.

Allows you to erase marks and drawings.

Circle an on-screen text or drawing to then assign that as an action item to an available application such as: Call, Contacts, Messaging, Email, Internet, Maps Calendar event.

Displays additional functions.

Allows you to edit the current color.

Detaches the current memo and converts it in a small popup box.

Reduces the number of on-screen options.

Closes the current session and save the action memo.

Cancels the current memo.

Saves the current memo and creates a new one.

Add an additional page to the memo.

5. From within the main application screen select the following functions:

- **Search (** **)**: allows you to search for information within existing memos.
- **Create (** **)**: allows you to create a new memo.
- **Delete (** **)**: allows you to delete an existing memo.

AT&T Code Scanner

AT&T Code Scanner allows you to scan two-dimensional (QR and datamatrix codes) and one-dimensional (UPC and EAN) barcodes found in magazines, stores, and online.

1. From the Home screen, tap → **AT&T Code Scanner** .
2. Sign on to your Google account if you are not already signed on. For more information, refer to *"Creating a New Google Account"* on page 13.
3. The first time you use the AT&T Code Scanner, you will need to download the updated application from the Play Store. Tap **Update AT&T Code Scanner**.
4. When the Play Store page displays, tap **Update** and follow the on-screen instructions to download the app. For more information, refer to *"Play Store"* on page 189.
5. At the License screen, tap **Agree** to continue or **Disagree** to exit.
6. At the Welcome screen, follow the on-screen instructions to use the AT&T Code Scanner.
7. Press → **Help** for additional information.

AT&T FamilyMap

AT&T FamilyMap provides peace of mind by being able to conveniently locate a family member from your wireless phone or PC and know that your family's location information is secure and private.

Note: To sign up for service, visit http://www.att.com/familymap for more information.

1. From the Home screen, tap → **AT&T FamilyMap** .
2. Sign on to your Google account if you are not already signed on. For more information, refer to *"Creating a New Google Account"* on page 13.
3. The first time you access the AT&T FamilyMap application, tap **Get FamilyMap**.

4. From the Play Store, tap **UPDATE** and follow the on-screen instructions to update the app.
5. At the AT&T FamilyMap webpage, follow the on-screen instructions to use AT&T FamilyMap.

AT&T Locker

AT&T Locker allows you to store, share, and sync all of your photos, videos, and documents in one safe, convenient place; the AT&T cloud.

1. From the Home screen, tap ➔ **AT&T Locker** .
2. Sign on to your Google account if you are not already signed on. For more information, refer to *"Creating a New Google Account"* on page 13.
3. The first time you access AT&T Locker, tap **Sign Up** to create an account. After setting up an account, you only need to tap **Log In**.
4. Follow the on-screen instructions to set up your account and to use AT&T Locker.

AT&T Navigator

AT&T Navigator provides you with access to real-time GPS-driven applications. These programs not only allow you to achieve turn-by-turn navigation, but also access local searches.

Important! You must have a data plan to use this feature.

Note: These services may require the purchase of a subscription.

To launch the AT&T Navigator application, follow these steps:

1. From the Home screen, tap ➔ **AT&T Navigator** .
2. Read the **Terms of Service** and tap **Accept** to acknowledge the terms of use.
3. For security purposes, a code is sent to your device via text message. Enter the code in the provided field and tap **Continue**.
4. Tap an AT&T Navigator plan that you choose. There are paid and free plans.

5. Follow the on-screen instructions to use AT&T Navigator.

AT&T Ready2Go

AT&T Ready2Go allows you to quickly and easily setup your phone by using the web browser on your PC. You can set-up email accounts, import contacts, set wallpaper, configure Wi-Fi and many more features. For more information, refer to *"Configuring your Phone"* on page 12.

AT&T Smart Wi-Fi

With AT&T Smart Wi-Fi, you can maximize your battery performance, maximize your data, simplify access to AT&T Hot Spots and Wi-Fi networks, automate your Wi-Fi connections, and track your data use. For more information, refer to *"AT&T Smart Wi-Fi"* on page 159.

Beats Music

1. From the Home screen, tap → **Beats Music**.
2. Sign on to your Google account if you are not already signed on. For more information, refer to *"Creating a New Google Account"* on page 13.
3. The first time you access Beats Music, you will be taken to the Play Store. Tap **Update**.
4. Tap **Accept & download**.
5. After the app is downloaded, tap **Open** to access the feature.
6. Follow the on-screen instructions to use Beats Music.

Calculator

With this feature, you can use the phone as a calculator. The calculator provides the basic arithmetic functions; addition, subtraction, multiplication, and division. The Calculator also keeps a history of recent calculations.

1. From the Home screen, tap → **Calculator**.
2. Enter the first number using the on-screen numeric keys.
3. Enter the operation for your calculation by tapping the corresponding on-screen arithmetic function key.
4. Enter the second number.
5. To view the result, tap equals (=).
6. To view calculator history, tap located at the top of the calculator buttons. A history of your past calculations is displayed. Tap again to display the calculator keypad.
7. To clear the calculator history, press → **Clear history**.

8. Press → **One-handed operation on** to set the display so that it is easier to use the calculator with one hand. Press → **One-handed operation off** to turn it off.
9. Turn your phone sideways to the landscape position to display the scientific calculator.

Calendar

With the Calendar feature, you can consult the calendar by day, week, or month, create events, and set an alarm to act as a reminder, if necessary.

To access the Calendar:

1. From the Home screen, tap → **Calendar** 31.
2. The following tabs are located on the right side:
   - **Year**: displays the Year view.
   - **Month**: displays the Month view.
   - **Week**: displays the Week view.
   - **Day**: displays the Day view.
   - **List**: displays the List view.
   - **Task**: allows you to search for tasks.
3. Tap (**Create event**) to create a new Calendar event.
4. Tap **Today** to display the current date indicated by a blue box.
5. Press and select one of the following options:
   - **Go to**: displays a specific date.
   - **Delete**: allows you to delete All events, All events before today, or an individual event.
   - **Search**: allows you to search within your current events.
   - **Sync**: allows you to synchronize your calendar with one or all of your accounts. This option only appears when an account has been opened.
   - **Calendars**: allows you to view the current Calendar accounts.
   - **Settings**: displays a list of configurable settings.
6. When in month view, tap (**Handwriting mode**) to activate handwriting mode. This allows you to jot down freehand notes using your S pen or finger.

Calendar Settings

1. From any Calendar view, press → **Settings**.
2. Tap **View styles** → **Month view styles** and select an option.
3. Tap **View styles** → **Week view** and select a type: **Timeline** or **Analog**.

4. Tap **First day of week** and select either **Local default, Saturday, Sunday** or **Monday**.
5. Tap **Hide declined events** to activate this option. A check mark indicates selection.
6. Tap **Lock time zone** (to lock event time based on your current user-selected time zone). Select a time zone from within the **Select time zone** field.
7. Tap **Show week number** to display the week numbers along the side of the week entries.
8. Tap **Hide completed tasks** to activate this option. A check mark indicates selection.
9. Tap **Weather** to activate this option. A check mark indicates selection.
10. Tap **Set alerts and notifications** to adjust the event notification method. Choose from: **Alert**, **Status bar notification**, and **Off**.
11. Tap **Select ringtone** to assign a ringtone to a calendar event notification.
12. Tap **Vibration** to assign a vibration notification to this event.
13. Tap **Quick responses** to edit your default quick responses for outbound emails. These are default responses similar to those used by text templates.

Camera

Use your 13.0 megapixel camera feature to produce photos in a JPEG format. Your phone also functions as a Camcorder to take videos. For more information, refer to *"Pictures and Videos"* on page 74.

ChatON

With the ChatON application, you can interact with friends and family with text, images, hand-written notes and video shared instantly. You can chat in groups, while a Web client will allow the easy sharing of content and conversations between your phone and PC. For more information, refer to *"ChatON"* on page 154.

Chrome

The Google Chrome app allows you to use the Google Chrome web browser on your phone.

1. From the Home screen, tap ➔ **Chrome** .
2. Read the Google Chrome Terms of Service and tap **Accept and Continue**.

3. If you have an existing Chrome account, tap **Sign in** to bring your open tabs, bookmarks, and omnibox data from your computer to your phone, otherwise tap **No thanks**.
4. Follow the on-screen instructions to use Google Chrome.

Clock

The Clock application allows you to access alarms, view the World Clock, set a stopwatch, and use a timer.

Alarm

This feature allows you to set an alarm to ring at a specific time.

1. From the Home screen, tap ➔ **Clock** ➔ **Alarm** ➔ **Create alarm** . The following options display:
   - **Time**: tap (**Up**) or (**Down**) to set the new time for the alarm to sound. Tap AM or PM.
   - **Alarm repeat**: use this option to set the repeating status for the alarm by tapping one the days that you want the alarm to sound. Tap the Repeat weekly checkbox to have the alarm repeat weekly.
   - **Alarm type**: sets the way in which the alarm sounds when activated (Melody, Vibration, or Vibration and melody).
   - **Alarm tone**: sets the sound file which is played when the alarm is activated. Select an option or tap Add for additional options.
   - **Alarm volume**: drag the slider to adjust the alarm's volume.
   - **Location alarm**: when activated, the alarm only sounds when you are at a specific location. Touch and slide the slider to the right to turn it on

then follow the on-screen instructions to enter a location.
   - **Snooze**: use this option to set a Duration (3, 5, 10, 15, or 30 Minutes) and Snooze repeat (1, 2, 3, 5, or 10 Times). Tap the ON/OFF slider to activate.
   - **Smart alarm**: tracks body movements and calculates the best time for sounding the alarm. Place the phone somewhere on your bed then the phone's movement sensor (also known as accelerometer) is sensitive enough to work from any part of the bed. Set the Interval and the Tone. Tap the ON/OFF slider to activate.
   - **Name**: allows you to use a specific name for the alarm. The name will appear on the display when the alarm activates.
2. Tap **Save** to store the alarm details.

Turning Off an Alarm

- To stop an alarm when it sounds, touch and sweep the icon to the right.

Setting the Snooze Feature

- To activate the Snooze feature after an alarm sounds, touch and sweep the icon to the left. Snooze must first be set in the alarm settings. For more information, refer to *"Alarm"* on page 172.

Deleting Alarms

To delete an alarm, follow these steps:

1. From the Home screen, tap ➔ **Clock** ➔ **Alarm** ➔ ▭ ➔ **Delete**.
2. Tap the alarm or alarms you wish to delete. A green checkmark will appear next to each selection. Tap **Select all** to delete all alarms.
3. Tap **Delete**.

World clock

World clock allows you to view the time of day or night in other parts of the world. World clock displays time in hundreds of different cities, within all 24 time zones around the world.

1. From the Home screen, tap ➔ **Clock** ➔ **World clock**. The clock for your time zone is displayed.
2. Tap **Add city** to add another city to the World clock.
3. Scroll through the list of cities to find the city you want to add, or tap the Search bar and use the keypad to enter a city to search for.
4. Tap the city you want to add. The clock for that city will display.
5. To set Daylight Savings time, press and hold a city, then tap **DST settings**.
6. Select **Automatic**, **Off**, or **1 hour**.
7. If Daylight Savings Time is selected, a sun symbol on the World clock listing will appear.

Deleting a World clock entry

1. From the Home screen, tap ➔ **Clock** ➔ **World clock** ➔ ▭ ➔ **Delete**.
2. Press and hold a city clock that you wish to delete.
3. At the prompt, tap **Delete**.

Stopwatch

You can use this option to measure intervals of time.

1. From the Home screen, tap ➔ **Clock** ➔ **Stopwatch**.
2. Tap **Start** to start the stopwatch and tap **Lap** to mark a unit of time per lap.
3. Tap **Stop** to stop the stopwatch.
4. Tap **Restart** to continue or tap **Reset** to erase all times recorded.

Timer

You can use this option to set a countdown timer. Use a timer to count down to an event based on a preset time length (hours, minutes, and seconds).

1. From the Home screen, tap ➔ **Clock** ➔ **Timer**.
2. The **Minutes** field is highlighted and set to 1 minute. Use the keypad to set the number of minutes you want.
3. Tap the **Hours** field to set hours if desired. As you tap different fields, they will become highlighted.
4. Tap the **Seconds** field to set seconds.
5. Tap **Start** to begin the timer and tap **Stop** to pause the timer.
6. After stopping, tap **Restart** to continue or tap **Reset** to set the timer back to the original setting.

Contacts

You can manage your daily contacts by storing their name and number in your Address Book. Address Book entries can be sorted by name, entry, or group.

You can also synchronize your phone Address Book with AT&T Address Book, the network backup service.

For more information, refer to *"Contacts and Your Address Book"* on page 61.

Device Help

Device Help provides online information to help with your device questions.

1. From the Home screen, tap ➔ **Device Help** .
   The **Device Health** screen is displayed.
2. Follow the on-screen instructions for accessing helpful information.

Downloads

The Downloads application allows you to manage all of your downloads from the Play Store and the Browser.

1. From the Home screen, tap ➔ **Downloads** .
   All of your downloads are listed.
2. Tap an available file and select it for use.
3. Choose an available action such as Share via, Delete, Sort by size/date, or Clear list.

Drive

With the Google Drive application, everything that you add to your Drive from work or home is also available on your device. You can create and edit documents on your device and the changes are saved everywhere.

1. Sign on to your Google account if you are not already signed on. For more information, refer to *"Creating a New Google Account"* on page 13.
2. From the Home screen, tap ➔ **Drive** .
3. Follow the on-screen instructions to use Google Drive.
4. Press ➔ **Help** for more information.

DriveMode

With the AT&T DriveMode application, you can set your phone to auto reply when you are driving and don't want to answer the phone. You can set auto reply to Messages, Emails, and Phone Calls. You can also allow up to five of your contacts to contact you while you are in Drive mode.

1. From the Home screen, tap ➔ **DriveMode** .
   The **AT&T DriveMode** screen is displayed.
2. Read the Terms and Conditions and Privacy Policy and tap **I Accept** to continue.
3. Read the additional information and tap **Continue**.
4. Follow the on-screen instructions to set up your AT&T DriveMode options.

Email

Email enables you to review and create email using various email services. You can also receive message alerts when you receive an important email. For more information, refer to *"Using Email"* on page 150.

Flipboard

This application creates a personalized digital magazine out of everything being shared with you. Access news stories, personal feeds and other related material. Flip through your Facebook newsfeed, tweets from your Twitter account, photos from friends and much more.

1. From the Home screen, tap ➔ **Flipboard** .
2. Swipe the screen up and select some on-screen categories that you are interested in, then follow the on-screen instructions to build your flipboard.

   – or –

   Tap **Tap to sign in** to log into your previously created profile.
3. Follow the on-screen instructions.

Gallery

The Gallery is where you view photos and play back videos. For photos, you can also perform basic editing tasks, view a slideshow, set photos as wallpaper or contact image, and share as a picture message. For more information, refer to *"Gallery"* on page 82.

Games

Access social and premium games. Join Game Hub to enjoy free games with your friends.

1. From a Home screen, touch ➔ **Games**.
2. Tap a game and follow the on-screen instructions.

Gmail

Gmail is a web-based email service. Gmail is configured when you first set up your phone. Depending on your synchronization settings, Gmail can automatically synchronize with your Gmail account on the web. For more information, refer to *"Using Gmail"* on page 152.

Google

The Google Search application is the same on-screen Internet search engine that is on the Google Search Bar on your main Home screen. For more information, refer to *"Google Search Bar"* on page 28.

Google Settings

As Google has become more intertwined with other applications, this menu provides a quick and ready access point to configure preferences for Google+, Maps & Latitude, Locations, etc. You can also use the Search function to initiate a Google Search from this menu.

1. From the Home screen, tap ➔ **Google Settings** and select an on-screen option.
2. Tap one of the Google Settings options.
3. Follow the on-screen prompts to modify your Google Settings.

Google +

Google+ makes messaging and sharing with your friends a lot easier. You can set up Circles of friends, visit the Stream to get updates from your Circles, use Messenger for fast messaging with everyone in your Circles, or use Instant Upload to automatically upload videos and photos to your own private album on Google+. For more information, refer to *"Google +"* on page 153.

Group Play

Group Play allows you to share pictures, music, and documents in real-time with your friends. You can create a group from your device or join other groups.

1. From the Home screen, tap ➔ **Group Play** .
2. The first time you access Group Play, read the Disclaimer and tap **Agree**.

   The Group Play main screen is displayed.

Creating a group

If you have media you want to share, create a group.

1. From the Group Play main screen, if you want to set a group password, tap the **Set group password** checkbox.
2. Tap **Create group**.
3. If you selected the **Set group password** checkbox in step 1, enter a group password at the **Set group password** prompt, and tap **OK**.

   Mobile AP is enabled.
4. Tap one of the media items listed under the **Share and play content** heading.
5. Tap the items you want to share to create a checkmark, then tap **Done** or **OK**.

6. Have your friends sign onto Group Play from their devices and they can view your media using you as a Mobile AP.
7. Press → **Info** for information on the device that is hosting the Mobile AP.

Joining a group

If you want to see media from your friend's phone, join a group.

1. From the Group Play main screen, tap **Join group**.
2. Your phone scans for available groups for you to join.
3. Tap a group to join.

   You will now be able to see your group's shared media.
4. Press → **Info** for information on the device that is hosting the Mobile AP.

Hangouts

Hangouts is a free Windows and web-based application for instant messaging offered by Google. You can connect with your friends across computers and various Android devices. You can have conversations or video calls with up to 10 friends. For more information, refer to *"Hangouts"* on page 153.

Help

The Help application provides detailed help for using your phone and the included features and applications.

1. From the Home screen, tap → **Help**.
2. Tap one of the following for more information:
   - **New features**: provides help on all of the new features and applications.
   - **Basics**: provides basic information on using your device.
   - **Applications**: provides information on how to use basic applications.
   - **Settings**: provides information on various settings.
   - **Online help**: provides more detailed online help for additional questions you may have.

Internet

The Browser is your access to the mobile web. This section explains how to navigate the Browser and introduces you to the basic features.

Accessing the Mobile Web

To access the Browser:

- From the Home screen, tap **Internet** .

  The AT&T/YAHOO! mobile homepage displays.

Navigating with the Browser

1. To select an item, tap an entry.
2. To scroll through a website, sweep the screen with your finger in an up or down motion.
3. Sweep the screen left to right to move laterally across a web page.
4. To return to a previous page, press .
5. To move forward to a web page, press .

Browser Options

- From the home page, press to access your browser options.

Using the Browser Bar

The Browser Bar enhances your browsing experience by providing contextual tools and quick access to your favorite content.

1. Tap at the bottom of any web page to display the Browser Bar.
2. Swipe the Browser Bar to the left or right to access favorite shortcuts and tools.
3. To modify your Browser Bar settings, from any Home screen, tap → **Settings** → General → **Browser Bar**.

Enter a URL

You can access a website quickly by entering the URL. Websites are optimized for viewing on your phone.

To enter a URL and go to a particular website, follow these steps:

1. Tap the **URL** field at the top of your screen.
2. Enter the URL using the on-screen keypad.

   The website displays.

Search the Internet

To perform an internet search using keywords, follow these steps:

1. From the Google homepage, tap the URL field.
2. Enter the keyword(s) to search using the on-screen keypad and tap **Go**.
3. Tap a link to view the website.

Adding and Deleting Windows

You can have up to eight Internet windows open at one time. To add a new window, follow these steps:

1. From your browser, press ➔ **New window**.
   A new browser window is opened.
2. Tap (**Windows**) to see thumbnails of all open windows.
3. Tap a window listing to open up that Internet window.
4. Tap at the top right corner of the web page thumbnail to delete the window.

Going Incognito

The incognito feature allows you to view Internet sites outside of the normal browsing. Pages viewed in this incognito window won't appear within your browser history or search history, and no traces (such as cookies) are left on your device.

Note: Any downloaded files will be preserved and will stay on your device after you exit the incognito mode.

To add a new incognito window:

1. From your browser window, press and select **Incognito mode**.
2. At the information prompt, tap **OK**.
3. A new browser window displays.

To exit from the incognito window:

1. From your browser window, tap (**Windows**).
2. Scroll across the available windows and locate the incognito window. The incognito icon appears in the upper-left of the new browser window while you are in this mode.

3. Tap next to the incognito listing to delete this window.

Using Bookmarks

While navigating a website, you can bookmark a site to quickly and easily access it at a future time. The URLs (website addresses) of the bookmarked sites are displayed in the Bookmarks page. From the Bookmarks page you can also view your Most visited websites and view your History.

1. From the Home webpage, tap (**Bookmarks**). The Bookmarks page is displayed.
2. Press to display additional options.

Adding Bookmarks

1. From any webpage, tap ➔ .
2. Use the on-screen keypad to enter the Title.
3. Tap **Save**.
4. **Saved to bookmarks** will appear at the bottom of the page.

Editing Bookmarks

1. From the Bookmarks page, tap and hold the bookmark you want to edit.
2. Tap **Edit**.
3. Use the on-screen keypad to edit the Title, Address, and Location.
4. Tap **Save**.

Deleting Bookmarks

1. From the Bookmarks page, tap and hold the bookmark you want to delete.
2. Tap **Delete**.
3. At the **Delete bookmark** confirmation window, tap **OK**.

Browser Settings

To make adjustments in your browser settings:

- Tap **Internet** ➔ ➔ **Settings**.

Lookout Security

Lookout Security™ provides mobile device-specific security features that are coupled with a minimal performance hit. Lookout Mobile Security provides key security options that

are unique to the mobile market. Along with the antivirus and anti-malware tech, there's a lost and stolen phone locator service, an application privacy adviser, and a backup service.

1. From the Home screen, tap ➔ **Lookout Security** .
2. Read the on-screen information, then tap **Get started**.
3. Read the on-screen descriptions and activate those desired features. Tap **Next** to progress to the next screen.
4. Tap **New user** or **Existing user**.
5. Create a Lookout account by entering an email address and account password.
6. Re-enter the password and tap **Start Lookout**.
7. Follow the on-screen instructions.

Maps

Depending on your location, you can view basic, custom, and satellite maps and local business information, including locations, contact information, and driving directions. You can also post public messages about a location and track your friends.

Important! Before using Google Maps you must have at least an active data (3G) connection. The Maps application does not cover every country or city.

To receive better GPS signals, avoid using your device in the following conditions:

- inside a building or between buildings
- in a tunnel or underground passage
- in poor weather
- around high-voltage or electromagnetic fields
- in a vehicle with tinted windows

Using Maps

1. From the Home screen, tap ➔ **Maps** .
   A map will display with your location in the very center.
2. Press to display additional options.

Messages (AT&T)

The AT&T Messages app brings your texts, calls, and voicemail messages together into a single conversation thread and is accessible by phone or computer. For more information, refer to *"AT&T Messages App"* on page 154.

Messaging

You can send and receive different types of messages. For more information, refer to *"Messaging"* on page 141.

Mobile Hotspot

This application allows you to share your phones's mobile data connection via USB or as a portable Wi-Fi hotspot. For more information, refer to *"Tethering & portable hotspot"* on page 88.

Mobile TV

Mobile TV is a subscription service that allows you to watch your favorite TV shows using your handset.

Note: This feature requires a paid subscription. See your AT&T Customer Service Representative for more information.

1. Tap ➔ **Mobile TV** .
2. Read the **7 day Trial for Mobile TV** screen and tap **Accept & Start Trial** to continue or **Exit** to exit.
3. The Mobile TV main page displays. Follow the on-screen instructions to watch TV.

Note: Mobile TV will use a large amount of data and you are responsible for all data charges. It is strongly recommended that you upgrade to a large data plan in addition to this purchase.

Music

The Music Player is an application that can play music files. The Music Player supports files with extensions AAC, AAC+, eAAC+, MP3, WMA, 3GP, MP4, and M4A. Launching the Music Player allows you to navigate through your music library, play songs, and create playlists (music files bigger than 300 KB are displayed).

Playing Music

1. From the Home screen, tap ➔ **Music** .
2. Tap a library category at the top of the screen (Songs, Playlists, Albums, Artists, or Folders) to view the available music files.
3. Scroll through the list of songs and tap an entry to begin playback.
4. The following Music Player controls are available:

Pause the song.

Start the song after being paused.

Press and hold to rewind the song. Tap to go to previous song.

Press and hold to fast-forward the song. Tap to go to next song.

Volume control and SoundAlive.

Repeat one: repeats the currently playing song.

Repeat all: replays the current list when the list ends.

Play All: plays the current song list once.

Shuffle On: the current list of songs are randomly shuffled for playback.

Shuffle Off: songs play in order and are not shuffled.

Lists the current playlist songs.

Provides access to the SoundAlive feature. Tap the Volume control icon to access this feature.

Returns the user to the music category screen.

Assign the current song as a Favorite.

Streams the current music file to another device via Samsung Link.

5. Press → **Settings** to modify your Music settings.
6. Press to access additional options.

Making a Song a Phone Ringtone

1. From within the **Music** application, tap the **Songs** tab.
2. Touch and hold a song from the list to reveal the on-screen context menu.
3. Tap **Set as** → **Phone ringtone.**
4. Choose a starting point for the ringtone to start playing from. Select either **From the beginning** or **Auto recommendations** (you can allow the application to choose the best part to start from).
5. Select **Done**.

Note: Additional Set as options include **Caller ringtone** and **Alarm tone**.

Using Playlists

Playlists are used to assign songs to a list of preferred media which can then be grouped into a list for later playback. These Playlists can be created via either the handset's Music Player options menu or from within a 3rd party music application (such as Windows Media Player) and then downloaded to the handset.

Creating a Playlist and Adding Music

1. From the Home screen, tap ➔ **Music** .
2. Tap the **Playlists** tab.
3. Press ➔ **Create playlist**.
4. Type a name for this playlist in the field and tap **OK**.
5. Tap **Add music**.
6. Tap a music file, or tap **Select all** to add all the music tracks to this playlist then tap **Done**.

Removing Music from a Playlist

To remove music files from a playlist:

1. From the Home screen, tap ➔ **Music** .
2. Tap the **Playlists** tab.
3. Tap the playlist name in which to delete music.
4. Press ➔ **Remove**.
5. Tap the checkbox to the left of each track you want to remove from this playlist, or tap **Select all** to remove all the music tracks from this playlist, then tap **Remove**.

Editing a Playlist

Besides adding and removing music files in a playlist, you can also rename the playlist.

To edit a playlist:

1. From the Home screen, tap ➔ **Music** .
2. Tap **Playlists**.
3. Press ➔ **Edit title**.
4. Tap a playlist name to edit.
5. Enter a new name for the playlist then tap **OK**.

My Files

My Files allows you to manage your sounds, images, videos, bluetooth files, Android files, and other memory card data in one convenient location.

1. From the Home screen, tap ➔ **My Files** ➔ **All**.
2. Tap **Device storage** to see the contents that is stored on your phone.

Note: Different folders may appear depending on how your phone is configured.

3. If you have an external SD card inserted, tap **SD memory card** to see the contents of your external SD card (memory card).

My Magazine

Enjoy all of your available updates in a single place. My Magazine recommends content, information, and applications within a single location.

1. From the Home screen, flip up from the bottom of the screen.
2. Tap **Next**, read and agree to the Terms of Use, and tap **Start**.

Navigating My Magazine

1. Scroll up or down the on-screen pages to view more content.
2. Swipe left or right to move among the previous or next page.
3. Tap an available tile to view more details.

Other Options

1. Tap (**Menu**) to view available options.
2. Tap (**Options**) to select or deselect content assigned to each page.
3. Tap (**Omnibutton**) to make a call, take a picture, send a message, search, open the internet, or access your application menu.
4. Tap for additional options.

myAT&T

The myAT&T application allows you to manage your own AT&T account. You can review and pay your bill, check minutes and data usage, upgrade to a new device, or change your rate plan.

1. From the Home screen, tap → **myAT&T**. The **myAT&T** page is displayed.
2. Read the Terms and Conditions and tap **Accept** to continue.
3. Enter your **User ID** and **Password** using the onscreen keypad, then tap **Login**.
4. Follow the on-screen instructions.

PEN.UP

This Samsung application allows you to join a an online community, follow your favorite artists, show off your artwork, and connect with other artists.

This community brings together anyone that uses the S Pen to draw, sketch, scribble or paint. Share pictures, comment on other creations, or just browse through the pages for something to add to your personal collection.

1. From the Home screen, tap ➔ **PEN.UP** .
2. From the main screen tap either **Sign up** or **Explore PEN.UP**.
3. Follow the on-screen instructions.

Phone

The Phone application allows you to access the dialer keypad, call logs, and favorites. For more information, refer to *"Call Functions"* on page 49.

Photos

Google Photos allows you to share you photos more easily using the Google+ application.

1. Sign on to your Google account. For more information, refer to *"Creating a New Google Account"* on page 12.
2. From the Home screen, tap ➔ **Photos** .
3. Follow the on-screen instructions to use Photos.

Play Books

With Google Play Books, you can find more than 3 million free e-books and hundreds of thousands more to buy in the eBookstore.

1. From the Home screen, tap ➔ **Play Books** .
2. Log on to your Google account. For more information, refer to *"Creating a New Google Account"* on page 13.
3. Follow the on-screen instructions for using the Play Books application.

Play Games

This application takes you directly to the Play Store Games area where you can download games.

1. From the Home screen, tap ➔ **Play Games** .
2. Log on to your Google account if you have not already done so.
3. Select an available on-screen option and follow the on-screen instructions.

Play Movies & TV

With Google Play Movies & TV, you can rent thousands of different movies and television shows. You can watch instantly, or download your movie or show for offline viewing at a later time.

1. From the Home screen, tap ➔**Play Movies & TV** .
2. Log on to your Google account if you have not already done so.
3. Following the on-screen instructions for renting and viewing movies and TV shows.
4. Press for additional options.

Play Music

With Google Play Music, you can play music that you have added to your music file as well as any music you copied from your PC. While offline, you can listen to music you have copied from your PC.

1. From the Home screen, tap ➔ **Play Music** .
2. Log on to your Google account if you have not already done so. For more information, refer to *“Creating a New Google Account”* on page 13.
3. At the Google play screen, tap **Add account** if you have not previously used Play Music, and follow the on-screen instructions to create your account and use Play Music.

Play Newsstand

With Google Play Newsstand, you can subscribe to your favorite magazines and have them available to read on your phone at any time or any place.

1. From the Home screen, tap ➔ **Play Newstand** .
2. Log on to your Google account if you have not already done so. For more information, refer to *“Creating a New Google Account”* on page 13.
3. Sweep the screen to the left or right to view Categories, Featured, Top Selling, and New Arrivals.
4. Tap a magazine to see more information and subscribe.
5. Follow the on-screen instructions to subscribe to a magazine.

Play Store

Play Store provides access to downloadable applications and games to install on your phone. Play Store also allows you to provide feedback and comments about an application, or flag an application that might be incompatible with your phone.

Before using the Play Store you must have a Google Account. For more information, refer to *“Using Gmail”* on page 152.

1. From the main Home screen, tap **Play Store** .
2. Sign in to your Google account.
3. Tap a category to download or purchase games or applications. You can also download updates to existing applications.
4. Follow on the on-screen instructions.

POLARIS Office 5

POLARIS® Office 5 is a Microsoft Office compatible office suite. This application provides a central place for managing your documents online or offline. The application can also open Adobe PDF (Portable Document Format) files.

1. From the Home screen, tap ➔ **POLARIS Office 5** .

2. Enter your Email information (if desired) and touch **Register** to complete the process.

   – or –

   Touch **Skip** to ignore this registration.

   The main Polaris Office screen displays.

3. Follow the on-screen instructions to use Polaris Office.

S Health

S Health is a wellness application that allows you to better manage your health by providing you with relevant information.

1. From the Home screen, tap ➔ **S Health** .
2. Read the introduction and tap **Start**.
3. Read the Use of S Health, Connecting Third Party Devices and Programs, Information Used, Proprietary Rights and Licences, and Disclaimer of Warranty.
4. Tap the **Agree** checkbox.
5. Tap **Next**.
6. Sign in to your Samsung account if you have not already done so. For more information, refer to *"Creating a Samsung Account"* on page 12.
7. Follow the on-screen instructions to use S Health.
8. Tap ➔ **Help** for more detailed information.

Before You Start Exercising

This app can be used to monitor your exercise. While moderate physical activity, such as brisk walking, is safe for most people, health experts suggest that you talk with your doctor before you start an exercise program, particularly if you have any of the following conditions:

- Heart disease;
- Asthma or lung disease;
- Diabetes, or liver or kidney disease;
- Arthritis.

You should also check with your doctor if you have symptoms suggestive of heart, lung, or other serious disease, such as:

- Pain or discomfort in your chest, neck, jaw, or arms during physical activity;
- Dizziness or loss of consciousness;
- Shortness of breath with mild exertion or at rest, or when lying down or going to bed;
- Ankle swelling, especially at night;
- A heart murmur or a rapid or pronounced heartbeat;

- Muscle pain when walking upstairs or up a hill that goes away when you rest.

Finally, the American College of Sports Medicine recommends that you see your doctor before engaging in vigorous exercise if two or more of the following apply:

- You are a man older than age 45 or a woman older than age 55;
- You have a family history of heart disease before age 55;
- You smoke or quit smoking in the past six months;
- You have not exercised for three months or more;
- You are overweight or obese;
- You have high blood pressure or high cholesterol;
- You have impaired glucose tolerance, also called pre-diabetes.

When in Doubt - Check it Out

If you are unsure of your health status, have several health problems, or are pregnant, you should speak with your doctor before starting a new exercise program. Working with your doctor ahead of time is a good way to plan an exercise program that is right and safe for you. Consider it the first step on your path to physical fitness.

S Note

Use this application to create notes with productivity tools that turn handwriting into typed text and correct drawn shapes, lines, and formulas to make them perfect.

1. From the Home screen, tap ➔ **S Note** .
2. At the S Note Welcome screen, tap **Start**.
3. Select a cover style and tap **Next**.
4. Select a template and tap **Next**.
5. Tap an account if you would like to sync your notes, otherwise, tap **Set later**.
6. Tap **Start**.
7. Follow the on-screen instructions to use S Note.
8. Press for additional options.
9. Tap ➔ **Help** from the main S Note screen to learn more about the application, then follow the on-screen instructions.

S Translator

With the S Translator you can easily translate words and phrases into many different languages.

1. Sign in with your Samsung Account if you have not already done so. For more information, refer to *"Creating a Samsung Account"* on page 12.
2. From the Home screen, tap → **S Translator** .
3. The first time you use S Translator, tap **Install** the install the application.
4. At the S Translator screen, tap the top language bar and enter your language.
5. Tap the language bar at the bottom of the screen to select the language that you would like to translate to.
6. Enter text into the upper box and tap .

   It will be translated into the language of the upper box.

   – or –

   Enter text into the lower box and tap .

   It will be translated into the language of the lower box.
7. Tap either of the **Speak** buttons at the bottom of the screen to translate using either language by using your voice. The translation will appear automatically in the appropriate box.
8. Press for additional options.

S Voice

With the S Voice application you can use your voice to perform operations that you would normally have to do by hand such as dialing a phone number, texting a message, playing music, etc.

1. From the Home screen, tap → **S Voice** .
2. Read the **Samsung Disclaimer** then tap **Confirm** to continue.
3. Read the **Terms of Service** then tap **Agree** to continue.
4. Read the information on the **About S Voice** screen, then tap **Next**.
5. Read the information on the **Say what you want** screen, then tap **Next**.
6. Read the information on the **Wake up S Voice** screen, then tap **Next**.

7. Read the information on the **Edit what you said** screen, then tap **Next**.
8. Read the information on the **Help** screen, then tap **Finish**.
9. At the S Voice screen, say “Hi Galaxy” to wake up S voice.
10. Speak into the phone and follow the on-screen instructions.

Samsung Apps

With Samsung Apps, you can download hundreds of applications from a variety of categories.

1. Sign on to your Samsung account if you have not already done so.
2. From the Home screen, tap → **Samsung Apps** .
3. Tap an application that you would like, then follow the on-screen instructions to download.
4. Press → **Help** for additional information.

Samsung Hub

Samsung Hub makes it easy to find, sample, and purchase movies, TV shows, books, games, and music, in one user-friendly location. You can rent or purchase your favorite content and watch from any location. Samsung Hub is your gateway to mobile entertainment.

Note: Samsung Hub usage is based on service availability.

Important! You must be using an active Wi-Fi/4G/LTE connection to preview and download a media file. The internal memory acts as a storage location for your downloaded rental or purchase.

Creating a New Samsung Hub Account

Before you can rent or buy media, you must first create an account. Enter the required information.

1. Log in to your Samsung account if you have not already done so.
2. From the Home screen, tap → **Samsung Hub** .
3. When prompted to connect via mobile networks, select either **Cancel** or **Connect**.

4. If notified your Samsung account is not yet active or verified, tap **OK**. You must be signed in to your Samsung account to use the application's various features.
5. Press → **Help** for additional information.

Using Samsung Hub

The main Samsung Hub screen provides an overview of all the available categories on one page such as: Music, Video, Books, and Games. The overview page also displays recently added media that you can rent or purchase.

1. From the Home screen, tap → **Samsung Hub** .
   - The Overview screen (landing page) displays an main access for all available categories and recently available content for purchase or rental.
2. Scroll across the screen to select from the following available pages:
   - **MUSIC**: displays featured Music content available for purchase/stream from the Music store & Radio. This page also allows you to search for new content, or navigate directly to the Music store page by clicking on the Music link at the top of the page.
   - **VIDEO**: displays featured film and TV content available for purchase/rent from the video store. This page also allows you to search for new content, or navigate directly to the Movie & TV store page by clicking the Video link at the top of the page.
   - **BOOKS**: displays featured Book content available for purchase from the Book store. This page also allows you to search for new content, or navigate directly to the Book store page by clicking the Books link at the top of the page.
   - **GAMES**: displays featured Game content available from the Game store. This page also allows you to search for new content, or navigate directly to the Game store page by clicking the Games link a the top of the page.
3. The first time you access Samsung Hub, after you make a selection, you will need to install the stores that you want. Tap the stores to make a checkmark then tap **Install**.
4. To purchase or view featured content in more detail, tap on any content (Thumbnail or text) to navigate to the product detail page.

5. Depending on the content, you can either purchase, rent, or stream the content directly from the product detail page.
6. Choose a payment method, then follow the on-screen instructions.

Samsung Hub Notices

- Any media item (Media Content) may be rented or purchased after you create an account in Samsung Hub.
- Media Content that is purchased and downloaded may be viewed concurrently on up to five (5) devices with Samsung Hub (or "the service") that are also registered to the same account.
- You may remove a device from your account no more than once every 90 days.
- You may remove Media Content from a device as many times as you'd like. You will have the ability to re-download the Media Content later subject to content re-download availability and content provider permissions.
- You may need network coverage to access Media Content you have acquired through the Service.
- You can use 3G, 4G, or Wi-Fi connectivity to download Media Content.
- Unlike purchased Media Content, rented Media Content will be viewable on only 1 device in your account at a time.
- Media Content is downloaded and saved to your authorized device's SD card. No SD Card included out of box.
- Your Media Content may pause/stop or not download in networks where there is a weak signal.
- You may begin watching downloaded Media Content as soon as a) license acquisition has occurred and b) sufficient amount of the Media Content has been buffered.
- You must finish watching Media Content within the time limit set out for each piece of content (which may be as short as 24 consecutive hours).
    - Stopping, pausing or restarting rented Media Content does not extend the available viewing time.

- In no event will rented Media Content be available for a period of more than thirty (30) days (or shorter on a title-by-title basis) after the Media Content has been rented (e.g., if you begin viewing rented Media Content on the 29th day after the rental transaction, but do not finish viewing the entire title, that rented Media Content may not be available for the entire twenty-four (24) consecutive hour period if such period would extend the viewable time beyond the thirty (30) day rental window).

- Unless otherwise restricted by the Content Providers, you can download Media Content to your TV using HDMI connections; otherwise, you cannot play Media Content downloaded from your mobile device output.

Samsung Link

This application wirelessly synchronizes your Samsung mobile phone with your TV, streams content and even keeps tabs on who calls or sends text messages with real-time, on-screen monitoring. Samsung's Samsung Link makes staying connected easy.

Allows users to share their in-device media content with other external devices using DLNA certified™ (Digital Living Network Alliance) Devices. These external devices must also be DLNA-compliant. Wi-Fi capability can be provided to TVs via a digital multimedia streamer.

Important! You must first connect both of your communicating devices to the same Wi-Fi and be using an active/registered Samsung account prior to using this application. For more information, refer to *"Wi-Fi Settings"* on page 86. For more information, refer to *"Creating a Samsung Account"* on page 12.

1. Log in to your Samsung account if you have not already done so.
2. From the Home screen, tap ➔ **Samsung Link** .
3. If prompted with an on-screen notification about no Wi-Fi detected, tap **Cancel** (to continue by using your network connection) or **Connect** to continue.
4. Tap **Sign in**.

5. If prompted to log into your Samsung account, tap **Sign in** and follow the on-screen instructions.

Note: If the main screen still shows a Sign in box, close the application and restart it.

6. Follow the on-screen prompts.
7. From the main screen the following headings are displayed:
   - **Registered devices** allows you to stream/share selected multimedia content from your device to DLNA compliant device connected to the same Wireless Access Point.
   - **Registered storage**: allows you to receive and playback media stored externally (server, laptop, etc.) directly on your device by allowing you to add a Web storage service for streaming content.

Configuring Samsung Link Settings

The Samsung Link™ application must first be configured prior to its initial use. You must setup parameters such as connected Wi-Fi, Items to share, source server address, and external device acceptance rights.

1. From the Home screen, tap ➔ **Samsung Link** .
2. Press and then tap **Settings** and configure the following settings as desired:
   - **Registered storage**: allows you to add a Web storage location. Without a storage service/location added, you will not be able to use Samsung Link.
   - **Save to**: allows you to save your media to your internal phone memory or to an SD card.
   - **Auto upload**: allows you to enable automatic upload of images from your device to those storage locations specified within the Web storage list. Move the slider to the on position to activate the feature.
   - **Video optimization**: allows you to setup the video quality for streamed video content. Move the slider to the on position to activate the feature.

- **Password lock**: allows you to restrict access to Samsung Link by requiring a user enter the currently active and associated Samsung account password. Move the slider to the on position to activate the feature.
- **My account**: displays Samsung account information.
- **About this service**: displays application information.

Sharing Media via Samsung Link to a Target Device

Important! Make sure all communicating devices are connected to the same Wi-Fi.

1. Launch Samsung Link on the target device (such as an Internet TV, Samsung Tablet, etc.).
2. From the Home screen, tap ➔ **Samsung Link** .

Note: You must be signed in to your Samsung Account before you can use this feature.

3. Select your device name from the **Registered devices** area.
4. Tap an available category tab (Photo, Music, Video, or Document) and select a file.
   - A file with in the upper-left indicates it is stored remotely on a Web storage location. Selecting this media causes your device to access the file currently stored on your services' servers.
5. Tap an available on-screen file, image, or video to place a green check mark alongside it.
6. Tap (**Stream to connected devices**) and select an available target device to begin streaming.
7. On a target device (ex: Internet TV) select the on-screen **Allow** button to continue.

Note: At this stage your device is requesting access to share media with the external source.

8. Confirm (**Samsung Link Controller enabled**) appears in the Notification area at the top of the device to indicate you are using your device as the media source.

Scrapbook

This application allows you to combine documents, images, and music into a digital scrapbook.

1. From the Home screen, tap → **Scrapbook** .
2. Tap **Start** and follow the on-screen tutorials.
3. Press → **Help** for additional information.

For more information, refer to *"S Pen - Using Scrap booker"* on page 20.

Settings

This widget navigates to the sound and phone settings for your phone. It includes such settings as: display, security, memory, and any extra settings associated with your phone. For more information, refer to *"Changing Your Settings"* on page 85.

SketchBook for Galaxy

This application allows you to explore your imagination through sketches using the SketchBook for Galaxy application and S Pen.

1. From the Home screen, tap → **SketchBook for Galaxy** .
2. The first time you use SketchBook for Galaxy, you must install it. At the prompt, tap **OK**.
3. Tap **Install**.
4. Follow the on-screen instructions to set up SketchBook for Galaxy and to get started.

Story Album

With Story Album, you can create a digital Album of your story in media. Special moments will be on a timeline, and if you wish, you can have your album published as a hard copy.

1. From the Home screen, tap → **Story Album** .
2. The first time you access Story Album you will need to install the application. Read the introductory information and tap **OK**.
3. Tap **Install**.

4. At the Story Album Welcome screen, tap **Start** to begin your Story Album.
5. Follow the on-screen instructions.
6. Press ➔ **Help** for additional information.

TripAdvisor

With the TripAdvisor, you can plan and have your perfect trip. With over 75 million reviews and opinions by travelers, it is easy to find the best hotels, restaurants, and fun things to do.

1. From the Home screen, tap ➔ **TripAdvisor**.
2. The first time you access TripAdvisor you will need to install the application. Read the introductory information and tap **OK**.
3. Tap **Install**.
4. Sign in with your Samsung Account if you have not already done so.
5. Follow the on-screen instructions to use TripAdvisor.
6. Press for additional options.

Usage Manager

This app is a shortcut to your Data usage settings so you can manage your data.

- Tap ➔ **Usage Manager**.

  For more information, refer to *"Data Usage"* on page 89.

Video

The Video Player application plays video files stored on your microSD card.

1. Tap ➔ **Video**.
2. All videos that you have on your phone and memory card will be displayed. Tap the video that you want to play.
3. The video will begin to play.
4. The following video controls are available:

   Pause the video.

   Start the video after being paused.

   Press and hold to rewind the video. Tap to go to previous video.

Press and hold to fast-forward the video. Tap to go to next video.

Volume control.

PIP (Picture In Picture) view. The video will be played in a small window so you can use your phone for other purposes while watching the video. Double-tap screen to return to previous size.

Original size view. The video will be played in its original size.

Full-screen in ratio view. The video is enlarged as much as possible without becoming distorted.

Keep aspect ratio view.

Full-screen view. The entire screen is used, which may cause some minor distortion.

Allows you to select another device to stream the video to using Samsung Link.

Note: The screen view icons are a three-way toggle. The icon that is displayed, is the mode that will appear after the icon is tapped.

For more information on downloading videos for your phone, see *"Samsung Hub"* on page 193.

Voice Recorder

The Voice Recorder allows you to record an audio file up to one minute long and then immediately share it using Samsung Link, Messaging, Gmail, or via Bluetooth. Recording time will vary based on the available memory within the phone.

1. From the Home screen, tap ➔ **Voice Recorder** .
2. To start recording, tap **Record** and speak into the microphone.

3. During the recording process you can either tap **Stop** to stop and save the recording or **Pause** to temporarily halt the recording. After pausing, tap **Record** to resume recording. Once the audio recording has stopped, the message is automatically saved. Tap **Cancel** to cancel the recording without saving.
4. Tap **Bookmark** to bookmark the current recording.
5. Tap **List** to display a list of all your voice recordings. Tap a voice recording to play it.
6. Tap **Recording quality** to adjust the recording quality. Choose from: Normal, Interview, Conversation, or Voice memo.
7. For additional options, press .

Voice Search

The Google Voice Search application allows you to search the web using only your voice.

1. From the Home screen, tap ➔ **Voice Search** .
2. When the Google Voice Search screen displays, speak the word or words that you would like to search for on the internet.
3. If the timer expires and the mic icon changes from red to gray, tap the mic icon and speak the word or words that you would like to search for on the internet.

   Results are displayed on your phone.
4. The following options are available at the bottom of your screen:
   - **Web**: After selecting a different option, tap Web to return to the original search results.
   - **Images**: Displays images for your search.
   - **News**: Displays news items related to your search.
   - **More**: After tapping More, sweep your screen to the left to see additional options such as Shopping, Videos, Blogs, Discussions, Books, and Applications.
   - **Phone**: Displays a phone number if applicable.

Wallet

Isis Wallet uses NFC technology to let you pay for purchases with just a tap of your phone. The Wallet holds credit, debit, and loyalty cards while organizing offers, deals, and promotions. Isis helps you manage your spending by showing you card balances and recent purchases for most of the cards in your Wallet.

Note: Isis Wallet requires a special SIM card. See your AT&T Customer Service representative for more information.

1. Make sure NFC is activated on your phone. For more information, refer to *"NFC"* on page 94.
2. From the Home screen, tap ➔ **Wallet** .
3. Sign into your Google Account if you haven't already done so. For more information, refer to *"Creating a New Google Account"* on page 12.
4. The first time you access Wallet, you will be taken to the Play Store. Tap **Update**.
5. Tap **Accept & download**.
6. After the app is downloaded, tap **Open** to access the feature.
7. Follow the on-screen instructions to use Wallet.

WatchON

Important! Before initiating use, verify you have an active Internet connection available (either mobile network or Wi-Fi connection).

Note: Before beginning your initial WatchON application setup, confirm your TV is turned off.

For more information, refer to www.samsungwatchon.com.

Initial Configuration

1. Sign into your Samsung account.
2. From the Home screen, tap ➔ **WatchON** .

Note: If you are not connected to an active Wi-Fi, you may be prompted to continue the set up process via a mobile network. Click **Connect** to proceed.

3. Select your desired country or region for your TV Guide's source listing.

4. Enter your current zip code and tap **Done**. This zip code must correspond to the location of your desired TV and set top box.
5. From the **Find your TV service** screen, select a service provider from the available channel listing.
6. From the **Personalize** screen, you can either follow the on-screen prompts to personalize your desired content or tap **Skip** to continue without customizing your content.
7. Read the on-screen Peel Disclaimer agreement and tap **Agree** to complete the set up process.

Customizing Your Remote

1. From the top of the main screen, tap (**Remote Control**) ➔ **Continue**.
2. From the **Select your TV brand** screen, tap your TV's manufacturer name.
   - If you have a brand of TV not listed or you are using a projector, select from one of the following two options. Choose from either **Show other brands** or **I have a home projector**.
3. Aim your device at the TV and tap (**Power**) to confirm the set up process completed successfully and the correct TV IR codes were selected.

Note: The process of the initial TV activation can take up to 10 seconds. Please do not press the button again.

4. If the TV turned on, tap **Yes, this code 1 works**.
   – or –
   If the TV did not turn on after tapping (**Power**) and waiting 10 seconds, tap **No, test next code 2** or **Send this code 1 again**.
5. From the **Select your channel source** screen, select the entry that corresponds to your current channel control method:
   - **Set-top Box**: selected when changing channels is done via a receiver box. Channels are not changed via the TV remote but rather through the receiver/box.
   - **My xxx TV**: selected when a signal is fed directly into the TV and no box is used. Channels are changed directly on the TV by using the TV remote and not a box's remote.

Note: Try matching your current channel selection method.

6. Select the Satellite Box Brand from the available list. For example, DirectTV®.
   - If your brand does not appear in the list, tap **Show other brands** and follow the on-screen instructions.

Important! You must configure your set top box for IR communication with your device. If you do not select **More info** below and follow the on-screen instructions you may not be able to properly use the application.

7. When prompted to Enable IR, tap **More info** to learn how to configure your set top box to receive and respond to IR controls.
8. Only after completing the IR setup process and programming your box, press (**Back**).

Note: This IR programming of your set top box is a one-time process and once successful should not need to be repeated.

9. If prompted to personalize your experience, follow the on-screen instructions.

Using WatchON

To change channels:

1. Sign into your Samsung account.
2. From the Home screen, tap → **WatchON** .
3. From the top of the main screen, tap (**Remote Control**). This launches an on-screen remote control.
   - **Easy remote**: provides the most common used control features. Scroll down to view additional functions.
4. In a single motion touch and drag up from the bottom-right of the screen to access additional remote tabs Choose from one of the following:
   - **TV**: provides access to control functions specific to your TV.
   - **[Set top box]**: displays customized control specific to your configured set top box. Ex: satellite dish remote control functions.
5. From the remote screen press and then tap (**Change room**) to choose from different receivers/boxes in different rooms. Ex: Living Room box, Bedroom box, etc.

6. Press (**Back**) to return to the main menu.

Locating your favorite programming:

1. Sign into your Samsung account.
2. From the main WatchON screen, tap (**Combined View**) to reveal available media categories.
3. Select an available category.

   – or –

   Tap **Channel Guide** to display on your TV an on-screen listing of available set top box shows.

For additional information on the WatchON application, press and then select **Help**.

WatchOn Settings

- From the main WatchON screen, press and then select an available on-screen option:
  - **Change room**: allows you to select a previously configured room.
  - **Edit channels**: allows you to add or remove channels from your custom list. Press and hold a channel number to update the channel entry.
  - **Settings**: provides access to the Samsung WatchON settings menu.
  - **About**: displays on-screen information about the application.
  - **Help**: displays on-screen help information.

Personalize WatchON

You can personalize your application to do things such as show content only from your selected media categories, or add an additional room's set top box.

To configure your Just for you settings:

The Just for you option displays available content matching your activated media categories. These categories can be configured during your initial set up or at any later time.

1. Sign into your Samsung account.
2. From the main WatchON screen, tap (**Combined View**) ➔ **Just for you**.
3. From the **On TV** tab, press and then select **Settings**.
4. Access parameters such as **Basic profile**, **Genres** and **Sports** to then configure and enable those parameters you would like to show in the Just for you tab.

To add a new room:

Your device can be used to control boxes/receivers from several rooms. You could go from controlling your set top box in your living room and then move into your bedroom to do the same.

1. Sign into your Samsung account.
2. From the main WatchON screen, tap the **On TV** tab
3. Press and then select **Settings** ➔ **Add room**.
4. Name the new room and tap **Next**.
5. Enter your current zip code and tap **Done**. This zip code must correspond to the location of your desired TV and set top box.
6. Follow the steps under **Initial Configuration** on page 203 to complete the process.

YouTube

YouTube™ is a video sharing website on which users can upload and share videos. The site is used to display a wide variety of user-generated video content, including movie clips, TV clips, and music videos, as well as video content such as video blogging, informational shorts and other original videos.

Note: YouTube is a data-intensive feature. It is recommended that you upgrade to a large data plan to avoid additional data charges.

1. From the Home screen, tap ➔ **YouTube** .
2. Tap the search field to search for specific videos, scroll down to browse through the main page thumbnails, or scroll to the bottom to explore additional options.
3. To view a video, tap an available preview thumbnail or tap the title link.
4. Press for additional options.

Note: It is not necessary to sign in to the YouTube site to view content. However, if you wish to sign in to access additional options, tap **Sign in** at the top left corner, enter your YouTube or Google username and password, and tap **Sign in**.

YP

The YP (Yellowpages) application provides quick and ready access to businesses, map locations, and storage of your favorite searches. This application allows you to tap into local businesses, locations, and events, connecting you to your search in real-time.

Note: The first time you use YP, you will need to download the updated application from the Play Store. When the Play Store page displays, tap **Update** or **Install** then follow the on-screen instructions. For more information, refer to *"Play Store"* on page 189.

1. From the Home screen, tap → **YP** .
2. Sign on to your Google account if you have not already done so. For more information, refer to *"Creating a New Google Account"* on page 13.
3. The first time you access YP, tap **Take a Tour!** to learn more about the YP app, or tap **Skip**.
4. Sign in using an email account or your Facebook account or tap **Skip to Home**.
5. Tap the **What do you want to find?** field to start a search.
6. Results will be displayed.
7. Follow the on-screen instructions to use the YP app.
8. Tap to display additional options.
